MODULE SPECIFICATION

Part 1: Basic Data					
Module Title	Learning Disabilities Nursing Practice 3				
Module Code	UZZSNU-45-3 Level			3	Version 1.1
Owning Faculty	Health and Applied Sciences Fi		Field	Mental Health and Learning Disabilities	
Contributes towards	BSc (Hons) Nursing (Learning Disabilities)				
UWE Credit Rating	45	ECTS Credit	22.5	Module	Professional
-		Rating		Туре	practice
Pre-requisites	None		Co- requisites	None	
Excluded	None		Module Entry	N/A	
Combinations			requirements		
Valid From	September 2013		Valid to	September 2019	

CAP Approval Date 9 May 2013

Part 2: Learning and Teaching				
Learning Outcomes	 On successful completion of this module students will be able to: Appraise current professional codes of conduct, ethical and legal principles which protect people with learning disabilities, carers and the public (Component A and B) Evaluate and compare the diverse nature of service provision and the effectiveness of service improvement initiatives (Component A and B) Critically evaluate and reflect on the contribution and barriers of interprofessional/inter-agency practice (Component A and B) Appraise, share and actively promote evidence based approaches to nursing care delivery and health outcomes (Component A and B) Demonstrate the skills required to safely manage and co-ordinate high quality care to people with learning disabilities whilst employing effective resource management (Component A and B) Demonstrate effective teaching and learning skills to facilitate the development of others (FLAP) (Component A and B) Act as a resource, contributing to an effective learning environment in which safe evidence based practice is fostered, implemented and evaluated (Component A and B) Apply and appraise own skills in involving people with learning disabilities and their carers in planning and delivering care by fostering client autonomy and independence (Component A and B) Analyse current research and literature that underpins interprofessional practice and leadership (Component A and B) Reflect on own practice and develop leadership skills to enhance interprofessional team working (Component A and B) Analyse the principles and practices of effective learning and assessment in the workplace(FLAP) (Component A and B) 			
	 Analyse current research and literature that underpins interprofessional practice and leadership (Component A and B) Reflect on own practice and develop leadership skills to enhance interprofessional team working (Component A and B) Analyse the principles and practices of effective learning and assessment in 			

	 setting (Component A and B) Utilise skills to teach, coach and supervise others (Component A and B) Critically evaluate the effectiveness of quality assurance systems in a variety of clinical settings (Component A and B) Demonstrate the ability to use a variety of interpersonal communication strategies (Component A and B) Demonstrate flexibility and innovation when seeking resolutions to conflicts, ethical dilemmas and the management of change (Component A and B) Utilise available information technology whilst adhering to local and national information governance (Component A and B) Appraise organisational change utilising change, learning organisation and leadership theories (Component A and B) Establish effective working relationships that facilitate personal development in self and others (Component A)
Syllabus Outline	 Professional Values Legal and Ethical Dilemmas in complex care settings Issues of vulnerability, abuse and exploitation of people with learning disabilities Communication and Interpersonal Skills Managing violence and aggression Involve people with learning disabilities and their carers Autonomy and independence Relevant psycho-motor skills Health promotion Nursing Practice and Decision Making Assessment, planning, implementation and evaluation of care for service users with complex care needs Managing complex needs Present and future developments in the organisation and delivery of learning disability care Basic Life Support Manual Handling Numeracy and pharmacology
	Leadership, Management and Team working Team Building and Development Quality and audit in service for people with learning disabilities Stress management and supervision Resource management and commissioning services Transition to Registration: the roles & responsibilities of the qualified nurse, supported supervision Continued Professional Development Teaching and Learning Public health policy Evidence based nursing care: critical analysis of evidence of interventions
Contact Hours/Scheduled Hours	Whilst on placement you will spend 11 days learning with your peers. These days are called `Supervision of Learning Days' (SOLD). These days will be theory and reflection on practice. There will be 108 hours contact with UWE, plus mentor supervised practice. The module will be delivered in conjunction with Management of complex situations in services for people with Learning Disabilities.
Teaching and Learning Methods	 A variety of approaches will be used which may include: Practice Simulation of scenarios through TEL based platforms Simulation and skills

Key Information	 Workshops Enquiry based learning Person centred focused learning E learning (Blackboard) Role play Key Information Sets (KIS) are produced at programme level for all programmes that					at

Reading Strategy	 Core readings It is essential that students read one of the many texts available through the Library. Module guides will also reflect the range of reading to be carried out. Further readings Students are expected to identify all other reading relevant to their chosen research topic for themselves. They will be encouraged to read widely using the library search, a variety of bibliographic and full text databases, and Internet resources. Many resources can be accessed remotely. Access and skills The development of literature searching skills is supported by a Library seminar provided within the first semester. These level three skills will build upon skills gained by the student whilst studying at levels one and two. Additional support is available through the Library Services web pages, including interactive tutorials on finding books and journals, evaluating information and referencing. Sign-up workshops are also offered by the Library. 						

Indicative Reading List	The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. <i>Current</i> advice on additional reading will be available via the module guide or Blackboard pages.

Part 3: Assessment				
Assessment Strategy	This module is assessed with a competency framework (Ongoing Achievement Record) to ensure students meet NMC skills and knowledge relevant to Learning Disabilities Nursing. The final summative assessment takes place at the end of placement 6 in year 3. See OAR document for competencies.			
	There are two components; o OAR pass/fail o Grading of practice			
	Students have three opportunities for formative assessment with feed-forward comments. This is structured to take place at midpoint of placements 5, end of placement 5, and midpoint of placement 6. The students also has the opportunity to speak with the Academic Personal Tutor after placement 1 to review progress			
	Students complete three Multiple Choice Questionnaires (MCQs) in relation to Basic Life Support, Manual Handling and Numeracy. Students are required to achieve a minimum percentage in each MCQ in order to access associated practical sessions where they are required to demonstrate safe practice in Basic Life Support, Manual Handling and medicines administration.			
	Failure to achieve a pass in either element of Component A will preclude the student from being summatively assessed in Component B; in this circumstance a refer for the module will be recorded. Students may engage in formative assessment of Component B.			
	Component B; Grading of Practice consists of observation of practice and critical			

	questioning/reflection r and UWE academics.	elated to practice. Assessmer	nt will involve	mentors
Identify final assessment co	mponent and element	А		
% weighting between components A and B (Standard modules only)				B:
First Sit				
Component A (controlled or Description of each element	,			weighting omponent)
1. Achieve prescribed competencies as identified in the Ongoing Achievement Record			Pass/Fail	
2. Successful completion of Basic Life Support, Manual Handling and Numeracy			Pass/Fail	
Component B Description of each element			Element weighting (as % of component)	
1. Grading of practice			100%	

Resit (further attendance at taught classes is not required)			
Component A (controlled conditions) Description of each element	Element weighting (as % of component)		
1. Achieve prescribed competencies as identified in the Ongoing Achievement Record (At the Discretion of the Award Board)	Pass/Fail		
2. Successful completion of Basic Life Support, Manual Handling and Numeracy	Pass/Fail		
Component B Description of each element	Element weighting (as % of component)		
1. Grading of practice	100%		

If a student is referred/failed in practice they will be required to attend a further placement opportunity at the discretion of the award board. They do not attend other components of the module.

If a student is permitted an **EXCEPTIONAL RETAKE** of the module the assessment will be that indicated by the Module Description at the time that retake commences.
