Part 2: Learning and Teaching	
Learning Outcomes	On successful completion of this module students will be able to: <ul style="list-style-type: none"> Critically analyse an episode of work-based learning.
Syllabus Outline	The syllabus is dictated by the nature of the work based learning, bounded only by the limits of what students actually do and learn about at work.
Contact Hours	1 hour face to face contact with a supervisor. Remaining hours are through independent study and practice focussed learning to support the development of the students project work
Teaching and Learning Methods	There is little teaching within this module – the emphasis is very much upon student learning undertaken in practice and facilitated by an academic supervisor, and where appropriate, a workplace mentor. Students will identify an area of learning need or interest based on their performance at work. The methods of learning will be identified in an individually negotiated learning contract. Scheduled learning will be restricted to an introductory tutorial. Students will have access to online material.

Independent learning will form the vast majority of the educational activity in the module. This can take as many forms as there are activities at work. Students will be required to demonstrate their learning using academic literature which will also require searching and reading and critical reflection appropriate to the level and size of the module.

Part 3: Assessment

Assessment Strategy

The learning outcome can be demonstrated in a number of ways as discussed and documented in the learning contract. The 'default' position is a piece of critical reflection supported by appropriate literature, but any evidence at the appropriate level meeting the outcome and consistent with 50 hours learning and equivalent to a 1500 word essay can be used.
