

CORPORATE AND ACADEMIC SERVICES

MODULE SPECIFICATION

Part 1: Basic data							
Module title	Animal Health and Disease						
Module code	UINXKK-15-1 Level 1 Version 1.1						
Owning faculty	Hartpury		Field	Animal and Land Science			
Contributes towards	FdSc Animal Behaviour & Welfare FdSc Animal Science & Management BSc (Hons) Animal Behaviour & Welfare BSc (Hons) Animal Science BSc (Hons) Animal Science (SW) BSc (Hons) Applied Animal Science (SW) BSc (Hons) Applied Animal Science with Therapy BSc (Hons) Applied Animal Science with Therapy BSc (Hons) Applied Animal Science with Therapy (SW) BSc (Hons) Bioveterinary Science MSci Animal Behaviour and Welfare						
UWE credit rating	15	ECTS credit rating	7.5	Module type	Standard		
Pre-requisites	None		Co-requisites	None			
Excluded combinations	None		Module entry requirements	None			
Valid from	01 September 2016		Valid to	01 September 2019			

CAP approval date 29 May 2013

Part 2: Learning and teaching					
Learning outcomes	On successful completion of this module students will be able to:				
	1 Discuss the concept of health and disease, and methods of disease prevention (A).				
	2 Discuss the symptoms of named notifiable diseases, and measures that must be taken in the event of an outbreak (A).				
	3 Identify parasites from the common groups, and understand the basis of control measures (A).				
	4 Review current legislation relating to both domestic and wild animals in the veterinary context within the United Kingdom (A).				
	5 Will be able to complete health assessment examination of an animal recognising the importance of managing risk (B).				
	6 Describe the principles of first aid and evaluate their use in a range of species in emergency situations (A).				
	7 Communicate clearly in a written format within time constraints and in a high pressure environment (A, B).				

Syllabus outline	 Concept of health and disease: review of causative organisms; methods of disease transmission and diagnosis; zoonoses; anthroponoses; notifiable diseases, prevention of spread; health monitoring. Health monitoring: Assess a range of animals recognition of common health indicators and an awareness when an animal needs to be referred for veterinary diagnosis. Parasites and their control: helminths, arthropods and protozoa; basic methods of diagnosis and control. Legislation: Veterinary Surgeons' Act 1966 (as amended), Animal Welfare Act 2006 (as amended), The Veterinary Medicines Regulations 2011; Import and Export legislation; Transport legislation and other welfare legislation; Quarantine; Rabies legislation. First aid in a range of species: theoretical and practical application; assessment of the patient in an emergency situation and as part of a clinical examination. 				
Contact hours	Indicative delivery modes:Lectures, guided learning, seminars etc33Self directed study3Independent learning114TOTAL150				
Teaching and learning methods	A variety of learning strategies will be used including lectures and practicals and self directed study. Students will be expected to engage in independent learning throughout the semester. Scheduled learning May include lectures, seminar, tutorials, demonstration and practical classes including practicals at the Dairy farm, Equine Yard and Animal Care Centre. Independent learning May include hours engaged with essential reading, assignment preparation and completion etc. These sessions constitute an average time per level as indicated in the table below. Scheduled sessions may vary slightly depending on the module choices you make. Virtual learning environment (VLE) This specification is supported by a VLE where students will be able to find all necessary module information. Direct links to information sources will also be provided from within the VLE.				
Key information sets information	Key information sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for. Key information set – module data Number of credits for this module 15 Hours to be allocated Scheduled Independent Study hours Study hours Allocated hours				IS are comparable prospective sted in applying

Reading strategy	 <i>Essential reading</i> The module guide will reflect the range of reading to be carried out and indicate any essential reading. <i>Further reading</i> Further reading is advisable for this module, and students will be encouraged to explore at least one of the titles held in the library on this topic. A current list of such titles will be 				
	given in the module handbook and revised annually.				
	Formal opportunities for students to develop their library and information skills are provided within the induction period and student skills sessions. Additional support is available through online resources. This includes interactive tutorials on finding books and journals, evaluation information and referencing. Sign up workshops are also offered.				
Indicative reading list	The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, CURRENT advice on readings will be available via other more frequently updated mechanisms, including the module guide.

	Part 3:	Assessment			
Assessment strategy	The examination has been chosen so as to allow the knowledge and Intellectual skills gained throughout the module about health and disease, parasites, notifiable diseases, veterinary legislation and first-aid to be assessed in controlled examination settings.				
	The practical report has been chosen so as to facilitate in depth utilisation of the information covered throughout the module in the practicals, as well as via additional study, about the theory related to the health assessment of an animal.				
	Formative feedback can be gained from this module in the module delivery, on VLE, in tutorials and in revision sessions. Summative feedback can be gained upon exam and assignment scripts.				
	In line with the College's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information regarding this please refer to the VLE.
