

CORPORATE AND ACADEMIC SERVICES

MODULE SPECIFICATION

Part 1: Basic data					
Module title	Pharmacy Management for Veterinary Nurses				
Module code	UINXQ4-15-1	Level	1	Version	1.1
UWE credit rating	15	ECTS credit rating	7.5	WBL module?	No
Owning faculty	Hartpury	Field	Animal and Land Science		
Department	Animal and Land	Module Type	Standard		
Contributes towards	BSc (Hons) Veterinary Nursing Science (SW) FdSc Veterinary Nursing Science (SW) FdSc Equine Veterinary Nursing Science (SW)				
Pre-requisites	None	Co-requisites	None		
Excluded combinations	None	Module entry requirements	None		
First CAP Approval Date	11 June 2013	Valid from	01 September 2013		
Revision CAP date	V1.1- 07 April 2016	Revision with effect from	01 September 2016		

Review Date	01 September 2018
-------------	-------------------

Part 2: Learning and teaching			
Learning outcomes	On successful completion of this module students will be able to:		
	Discuss and examine the basic pharmacology of veterinary medicines. (A) Appraise the selection and administration of veterinary medicines. (A) Identify and interpret conditions in which fluid therapy is required. (A) Evaluate the principles relating to prescribing and dispensing veterinary medicines. (A) Evaluate the principles of administration of fluids. (A) Analyse how to safely and effectively manage stock in a veterinary pharmacy. (A) Calculate fluid rates and medicine dosages for different animals. (A) Interpret and communicate technical information clearly within time constraints and in a high pressure environment. (A)		
Syllabus outline	Principles of pharmacy stock management and requirements for safe storage of medicines. Principles, practice and legal requirements for writing a prescription. Categories and legislation governing sale and supply of veterinary medicines. The role of a suitably qualified person.		

	Proprietary versus generic drugs; appropriate and inappropriate use of unlicensed drugs (the cascade) and principles of safe dispensing including abbreviations and compliance. Pharmacokinetics and Pharmacodynamics. Principles of managing adverse reactions and drug interactions. Different routes for drug administration including equipment and reasons for choosing that method. Principles of calculating drugs for administration and dispensing. Principles of fluid therapy and importance of checking and reporting the condition of patient's with a Veterinary Surgeon. Principles of how to support patients in the delivery of fluid therapy; before, during and after including monitoring and maintenance. Health and safety related to the administration of fluid therapy; include disposal of waste. The appropriate use of equipment in the delivery of fluid therapy. How to calculate fluid requirements for different patients including fluid type, quantity and flow-rate. RCVS Day One Competences for Veterinary Nurses; 23, 24, 25 All of the above topics will be considered in line with the current LANTRA Veterinary Nursing Occupational Standards (NOS); AUX7, RVN16 and RVN29.		
	The module is also referenced to the following RCVS day one practical skills for veterinary nurses; VN 7.12 – 7.13 and VN 7.18 – 7.24, VN8, EQVN 23.6 and EQVN 25.8.		
Contact hours	Indicative delivery modes:		
	Lectures, guided learning, seminars etc Self directed study Independent learning TOTAL 48 3 Interpolation of the seminars etc 48 150		
Teaching and learning methods	This module is delivered using large group learning sessions and opportunities for small group work. Additionally essential and recommended reading exercises will be introduced to guide the students through the core syllabus.		
	Scheduled learning May include lectures, seminars, tutorials, project supervision, demonstration, practical classes and workshops and guest lectures.		
	Independent learning May include hours engaged with essential reading, case study preparation, assignment preparation and completion etc. These sessions constitute an average time per level as indicated in the table below. Scheduled sessions may vary slightly depending on the module choices you make.		
	Virtual learning environment (VLE) This module is supported by a VLE where students will be able to find all necessary module information. Direct links to information sources will also be provided from within VLE.		
Key information sets information	Key information sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.

The table below indicates as a percentage the total assessment of the module which constitutes a:

- 1 Written exam: Unseen written exam, open book written exam, in-class test.
- 2 Coursework: Written assignment or essay, report, dissertation, portfolio, project.
- 3 *Practical exam:* Oral assessment and/or presentation, practical skills assessment, practical exam.

Please note that this is the total of various types of assessment and will not necessarily reflect the component and module weightings in the assessment section of this module description:

Reading strategy

Essential reading

Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be expected to purchase a set text, be given a study pack or be referred to texts that are available electronically, or in the Library. Module guides will also reflect the range of reading to be carried out.

Further reading

Further reading is advisable for this module, and students will be encouraged to explore at least one of the titles held in the library on this topic. A current list of such titles will be given in the module handbook and revised annually.

Access and skills

Formal opportunities for students to develop their library and information skills are provided within the induction period and student skills sessions. Additional support is available through online resources. This includes interactive tutorials on finding books and journals, evaluation information and referencing. Sign up workshops are also offered.

Indicative reading list

The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, CURRENT advice on readings will be available via other more frequently updated mechanisms, including the module guide.

Books:

Aspinall, V, ed. (Current Edition) *The Complete Text Book Of Veterinary Nursing*. Oxford: Butterworth Heinemann.

Cooper, B. Mullineaux, E. and Turner, L., ed. (Current Edition) *BSAVA Textbook of Veterinary Nursing*. Gloucester: BSAVA.

Kayne, S. B. and Jepson, M. J., ed. (Current Edition) *Veterinary Pharmacy*. London: Pharmaceutical Press.

Moore, M.C. and Palmer, N. G. (Current Edition) *Calculations for Veterinary Nurses*. Oxford: Wiley Blackwell.

Rock, A. (Current Edition) Veterinary Pharmacology: A Practical Guide for the Veterinary Nurse. Edinburgh: Butterworth-Heinemann

Part 3: Assessment			
Assessment Strategy	The module will be assessed using a written examination to demonstrate students' knowledge and understanding.		
	Students' progress will be monitored throughout the module delivery including formative assessment activities through the use of practical and written tasks as well as formal feedback on the written examination.		
	In line with the College's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information regarding this please refer to VLE.		

Identify final assessment component and element	Written exam	nination.	
% weighting between components A and B (Standard modules only)			B : 0%
First Sit			
Component A (controlled conditions) Description of each element		Element weighting (as % of component)	
1 Written examination (1.5 hours)		100)%

Resit (further attendance at taught classes is not required)		
Component A (controlled conditions) Description of each element	Element weighting (as % of component)	
1 Written examination (1.5 hours)	100%	

If a student is permitted a retake of the module under the University Regulations and Procedures, the assessment will be that indicated by the Module Description at the time that retake commences.

Valid from: 010916
