## **Part 2: Description**

**Overview:** Not applicable

**Features:** Not applicable

**Educational aims:** Approach

An aspiration of this module is that students become practiced at utilising Technology Enhanced Learning (TEL), in particular through use of common online

resources (on topics such as good ethical practice, developing research questions, writing research proposals) developed by the module team.

**Outline syllabus: Content**

The nature and impact of ethics and governance processes upon the generation of knowledge research in Politics and International Relations.

Formulating research questions and using appropriate research design and data collection skills.

Evaluating evidence of diverse kinds and drawing appropriate conclusions.

Managing and analysing data including indexing and retrieval of qualitative data, and use of basic statistics.

Different approaches to research in political science and international relations.

Comparative methods in analysing politics and international relations.

Research design in the social sciences including exploratory research; case studies; evaluation research; action research; comparative research; negotiating access; managing field work; reflexivity and the use of self in research.

The politics of research including positivism versus interpretivism; anti-discriminatory research; participative methods; ethics, privacy and confidentiality; legal issues; context and uses of social research; and working with marginalised and 'hard to reach' groups.

**Part 3: Teaching and learning methods**

**Teaching and learning methods:** In scheduled classes, students will attend weekly lectures and engage in facilitated activities such as debates, problem based learning,

group working, research.

Integral to this programme is the use of subject based as well as generic use of technologies. For instance, data analysis and modelling, are subject areas reliant on a range of contemporary technologies using public domain data sources such as Home Office crime statistics, World Health Organisation Databases.

In addition modern technologies may be incorporated by programme teams delivering the module as vehicles of learning (for example, blogs, podcasts) and as vehicles for learning through formative assessment (for example, online portfolios, online tests, wikis).

For each contact hour, students will spend approximately 3 hours in independent study, including preparing their assessed research proposal.

**Module Learning outcomes:** On successful completion of this module students will achieve the following learning outcomes.

**MO1** Formulate questions appropriate to research in Politics and International Relations

**MO2** Understand and engage in the processes through which knowledge is generated and claims to truth are evaluated in their subject area

**MO3** In classroom activities, acquire skills in communicating information from their discipline to the public.

**Hours to be allocated:** 150

**Contact hours:**

Independent study/self-guided study = 114 hours

Face-to-face learning = 36 hours

Total = 150

**Reading list:** The reading list for this module can be accessed at [readinglists.uwe.ac.uk](https://uwe.rl.talis.com/modules/uzqsta-15-2.html) via the following link <https://uwe.rl.talis.com/modules/uzqsta-15-2.html>

## Part 4: Assessment

**Assessment strategy:** Students are assessed through a research proposal (Assessment part A). The research proposal will prepare students for a final year project, and reflect a synthesis of relevant syllabus content, and be written for subject specialists. Formative assessment, including learning the principles and skills of communicating research to the general public, will be undertaken within seminar sessions, using techniques from a range of online approaches such as quizzes, wikis, and online discussion.

### Assessment tasks:

#### Written Assignment (First Sit)

Description: Research proposal (1500 words)

Weighting: 100 %
