|                      | Part 2: Learning and Teaching   |
|----------------------|---|
| Learning<br>Outcomes | <ul> <li>On successful completion of this module students will be able to:</li> <li>Appraise relevant knowledge and skills to support the work-based learning</li> <li>Critically analyse situations which informs the development of work-based learning</li> <li>Reflect on own responsibilities and management of learning via a personal development plan and agreed learning contract</li> <li>Critically review the context of change and the outcomes of a range of solutions or actions taken in the workplace</li> </ul> |
| Syllabus<br>Outline  | The syllabus is dictated by the nature of the work based learning. The range of work based learning projects that can be undertaken may be linked to professional competencies articulated in professional practice modules, for example; the Standards for Pre-registration Education (Nursing and Midwifery Council) or the Standards of Proficiency (Health and Care Professions Council). Students will be expected to demonstrate that the scope of their project lies within the identified and relevant standards.         |
| Contact Hours        | Self-directed learning  |

| Key<br>Information<br>Sets<br>Information | Key Information Sets (KIS) are produced at programme level for all<br>programmes that this module contributes to, which is a requirement set by<br>HESA/HEFCE. KIS are comparable sets of standardised information about<br>undergraduate courses allowing prospective students to compare and contrast<br>between programmes they are interested in applying for. |   |   |   |  | ut  |           |

|                     | Part 3: Assessment   |
|---------------------|--|
| Assessment Strategy | The assessment strategy for individual students depends on the<br>learning contract negotiated with the facilitator. The assessment states<br>that it must be equivalent to a project of 3,000 words because some<br>options of assessment will not take the form of written work in the form<br>of an orthodox essay or report. Other options include |
|                     | A portfolio of evidence  |
|                     | <ul> <li>A presentation with associated reflection</li> </ul>  |
|                     | <ul> <li>Production of a patient/service user information leaflet or<br/>video with associated reflection.</li> </ul>  |
|                     | <ul> <li>A paper or letter prepared for publication with associated reflection.</li> </ul>   |
|                     | Clearly where there are different options for assessment there will<br>need to be guidelines so that students and academic staff can have<br>confidence that assessments are comparable. Assessment strategies<br>need to meet three criteria.   |
|                     | 1. That the negotiated learning outcomes are met   |
|                     | 2. That the correct academic level is reached  |
|                     | 3. That the learning, including assessment, represents 150 hours of study, nominally.  |
