

MODULE SPECIFICATION

Part 1: Basic Data					
Module Title	Emergency Care for Sports Therapists				
Module Code	UISXTH-15-1	Level	1	Version	3
UWE Credit Rating	15	ECTS Credit Rating	7.5	WBL Module?	No
Owning Faculty	Hartpury	Field	Sport Science		
Department	Sport	Module Type	Standard		
Contributes towards	BSc (Hons) Sports Therapy BSc (Hons) Sports Therapy (SW)				
Pre-requisites	None	Co-requisites	None		
Excluded Combinations	None	Module Entry requirements	None		
First CAP Approval Date	07 March 2014	Valid From	01 September 2014		
Revision CVC Approval Date	08 June 2015 V3.0- 02 May 2018	Revised with effect from	01 September 2015 V3.0- 01 September 2018		

Review Date	01 September 2024
-------------	-------------------

Part 2: Learning and Teaching				
Learning Outcomes	On successful completion of this module students will be able to:			
	1 Demonstrate knowledge of National Governing Body emergency care procedures and professional standards of conduct appropriate for practicing Sports Therapists (B).			
	2 Develop and implement emergency action plans for a range of injuries associated with sport and exercise activities (A, B).			
	3 Evaluate clinical signs and symptoms to make sound judgements on the course of action required (A).			
	4 Demonstrate appropriate practical skills when treating casualties that may require administration of defibrillation, cardiopulmonary resuscitation and basic management of airways, spinal injuries, severe bleeds and traumatic fractures and dislocations (A).			
	5 Apply the methods and techniques previously learned in unpredictable circumstances (A).			
	6 Demonstrate a detailed knowledge of the practices and techniques associated with traumatic injuries common to sport and exercise activities (B).			
Syllabus Outline	 Develop appropriate emergency action plans; Understand traumatic injury signs and symptoms to make sound clinical judgements; Administer defibrillation and cardiopulmonary resuscitation; 			
	4 Basic management of airways, spinal injuries, severe bleeds and traumatic fractures and dislocations;			
	5 Clinical evidence underpinning response and treatment of traumatic injuries.			

Contact Hours	Indicative delivery	modes:

Teaching and Learning Methods	This module is delivered using large group learning sessions and opportunities for small group work. Additionally essential and recommended reading and exercises will be introduced to guide the students through the core syllabus.				
	Scheduled learning May include lectures, seminars, tutorials, project supervision, demonstration, practical classes and workshops.				
	<i>Independent learning</i> May include hours engaged with essential reading, case study preparation, assignment preparation and completion etc.				
			VLE where studer		find all necessary vided from within
Key Information Sets Information	Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.

	Written exam asse Coursework asses Practical exam as	ssment percentage	e 09	%	

Reading Strategy	Essential readings Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be required to purchase a set text, be given a print study pack or be referred to texts that are available electronically or in the Library. Module guides will also reflect the range of reading to be carried out.
	Further readings Further reading will be required to supplement the set text and other printed readings. Students are expected to identify all other reading relevant to their chosen topic for themselves. They will be required to read widely using the library search, a variety of bibliographic and full text databases, and internet resources. Many resources can be accessed remotely. The purpose of this further reading is to ensure students are familiar with current research, classic works and material specific to their interests from their academic literature.
	Access and skills Formal opportunities for students to develop their library and information skills are provided within the induction period and student skills sessions. Additional support is available through online resources. This includes interactive tutorials on finding books and journals, evaluation information and referencing. Sign up workshops are also offered.
Indicative Reading List	The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, CURRENT advice on readings will be available via other more frequently updated mechanisms, including the module guide.

	Part 3:	Assessment		
Assessment Strategy	Assessment of knowledge and understanding is through a variety of formative and summative means in relation to professional body requirements and industry expectations. In particular this module is mapped to the Football Association's requirements for emergency care and pitch-side sports trauma care as well as to the relevant standards of practice and competency of Graduate Sports Therapists. Students are assessed both on their practical skills and their underpinning knowledge. The practical examination is focused on the evaluation of clinical signs and symptoms and appropriate skills for dealing with a range of acute sporting injuries including life and function preserving interventions such as CPR and AED application, splinting and manual handling for stretcher bearing. The practical exam will assess students' underpinning knowledge of these techniques as well as relevant emergency care planning and provision, such as emergency action planning and calculating appropriate first-aid oversight for sporting events. The written exam will comprise short answer questions. Formative feedback and guidance can be gained in the module delivery, on the VLE, in tutorials and in revision sessions. Summative feedback can be gained on assignment scripts, on examination scripts and on the VLE. In line with the College's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information regarding this please refer to the VLE.			
	In addition, no compensation	or condonement may be app
