

CORPORATE AND ACADEMIC SERVICES

MODULE SPECIFICATION

Part 1: Basic data					
Module title	Exercise Physiology				
Module code	UISXSB-15-2	Level	2	Version	1.2
Owning faculty	Hartpury	Field	Sport Science		
Contributes towards	BSc (Hons) Equestrian Sports Science BSc (Hons) Sport and Exercise Sciences BSc (Hons) Sport and Exercise Sciences (SW) BSc (Hons) Sport and Exercise Nutrition BSc (Hons) Sport and Exercise Nutrition (SW) BSc (Hons) Sports Conditioning and Injury Management BSc (Hons) Sports Conditioning and Injury Management (SW) BSc (Hons) Sports Therapy BSc (Hons) Sports Therapy (SW) BSc (Hons) Strength and Conditioning BSc (Hons) Strength and Conditioning (SW)				
UWE credit rating	15	ECTS credit rating	7.5	Module type	Standard
Pre-requisites	Introduction to Human Physiology (UISXL9-15-1); OR Introduction to Exercise Physiology (UISXL7-15-1); OR Introduction to Equestrian Sports (UIEXN7-30-1)	Co-requisites	None		
Excluded combinations	None	Module entry requirements	Stand alone		
Valid from	01 September 2016	Valid to	01 September 2020		

CAP approval date	03 February 2015
--------------------------	------------------

Part 2: Learning and Teaching	
Learning outcomes	On successful completion of this module students will be able to: <ol style="list-style-type: none"> 1 Apply key physiological principles relating to exercise physiology (A). 2 Explain the theoretical principles and physiological mechanisms that underpin the body's responses and adaptation to exercise (A, B). 3 Evaluate and interpret information collected within a sport and/or exercise context (A, B). 4 Demonstrate critical understanding in the acquisition and analysis of information (B).
Syllabus outline	<ol style="list-style-type: none"> 1 Ethics of testing. 2 Pre-test preparation. 3 Anthropometry.

	4 Cardiovascular function during exercise. 5 Respiratory function during exercise. 6 Maximal oxygen uptake. 7 Blood lactate transition thresholds. 8 Lab and field based testing. 9 Assessment of maximal exercise intensity.														
Contact hours	Indicative delivery modes: Lectures, guided learning, seminars etc 33 Self directed study 3 Independent learning 114 TOTAL 150														
Teaching and learning methods	<p>Scheduled learning May include lectures, seminars, tutorials, project supervision, demonstration, practical classes in the Human Performance Laboratory and workshops; fieldwork; external visits; work based learning; supervised time in studio/workshop. Practical activities will focus on specific exercise physiology assessments designed to gauge relevant components of physiological function.</p> <p>Independent learning May include hours engaged with essential reading, case study preparation, assignment preparation and completion etc.</p> <p>Virtual learning environment (VLE) This specification is supported by a VLE where students will be able to find all necessary module information. Direct links to information sources will also be provided from within the VLE.</p>														
Key information sets information	<p>Key information sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.</p> <p>Key Information Set – Module Data</p> <p>Number of credits for this module 15</p> <table border="1" style="width: 100%; border-collapse: collapse; text-align: center;"> <thead> <tr> <th style="width: 15%;">Hours to be allocated</th> <th style="width: 25%;">Scheduled learning and teaching study hours</th> <th style="width: 25%;">Independent study hours</th> <th style="width: 20%;">Placement study hours</th> <th style="width: 15%;">Allocated Hours</th> </tr> </thead> <tbody> <tr> <td>150</td> <td>36</td> <td>114</td> <td>0</td> <td>150</td> </tr> </tbody> </table> <p>The table below indicates as a percentage the total assessment of the module which constitutes a:</p> <ol style="list-style-type: none"> 1 <i>Written Exam</i>: Unseen written exam, open book written exam, in-class test. 2 <i>Coursework</i>: Written assignment or essay, report, dissertation, portfolio, project. 3 <i>Practical Exam</i>: Oral Assessment and/or presentation, practical skills assessment, practical exam. <p>Please note that this is the total of various types of assessment and will not necessarily reflect the component and module weightings in the Assessment section of this module description:</p> <p>Total assessment of the module:</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 60%;">Written exam assessment percentage</td> <td style="border: 1px solid black; text-align: center;">50%</td> </tr> <tr> <td>Coursework assessment percentage</td> <td style="border: 1px solid black; text-align: center;">50%</td> </tr> </table>	Hours to be allocated	Scheduled learning and teaching study hours	Independent study hours	Placement study hours	Allocated Hours	150	36	114	0	150	Written exam assessment percentage	50%	Coursework assessment percentage	50%

--	--------------------------------------	---

Reading strategy	<p>Core readings Any essential reading will be indicated clearly, along with the method for accessing it, e.g. students may be required to purchase a set text, be given a print study pack or be referred to texts that are available electronically or in the Library. Module guides will also reflect the range of reading to be carried out.</p> <p>Further readings Further reading will be required to supplement the set text and other printed readings. Students are expected to identify all other reading relevant to their chosen topic for themselves. They will be required to read widely using the library search, a variety of bibliographic and full text databases, and Internet resources. Many resources can be accessed remotely. The purpose of this further reading is to ensure students are familiar with current research, classic works and material specific to their interests from the academic literature.</p> <p>Access and skills Formal opportunities for students to develop their library and information skills are provided within the induction period and study skills sessions. Additional support is available through online resources. This includes interactive tutorials on finding books and journals, evaluation information and referencing. Sign up workshops are also offered.</p>
Indicative reading list	<p>The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, CURRENT advice on readings will be available via other more frequently updated mechanisms, including the module guide.</p> <ul style="list-style-type: none"> • Astrand, P., Rodahl, K., Dahl, H. and Stromme, S. Part 3: Assessment		
Assessment Strategy	<p>Summative assessment will reflect the approach to the module, whereby students will be expected to demonstrate knowledge and understanding of principles in exercise physiology. The written exam will address students' ability to demonstrate knowledge and understanding of the key principles in exercise physiology. The laboratory report will allow for the development of knowledge and intellectual skills, focusing on the application of theoretical principles.</p> <p>Formative assessment opportunities will be provided through similar formats. Feedback will be provided on these attempts prior to summative assessments.</p> <p>In line with the College's commitment to facilitating equal opportunities, a student may apply for alternative means of assessment if appropriate. Each application will be considered on an individual basis taking into account learning and assessment needs. For further information regarding this please refer to VLE.</p> <p>Students studying the BSc (Hons) Sports Therapy are required to gain a minimum of 40% in each component and element. In addition, no compensation or condonement may be applied.</p>	
Identify final assessment component and element	Written examination	
% weighting between components A and B (Standard modules only)	A:	B:
	50%	50%
First Sit		
Component A (controlled conditions) Description of each element	Element weighting	
1 Written examination (1.5 hours)	100%	
Component B Description of each element	Element weighting	
1 Laboratory report (1,500 words)	100%	
Resit (further attendance at taught classes is not required)		
Component A (controlled conditions) Description of each element	Element weighting	
1 Written examination (1.5 hours)	100%	
Component B Description of each element	Element weighting	
1 Laboratory report (1,500 words)	100%	
If a student is permitted an EXCEPTIONAL RETAKE of the module the assessment will be that indicated by the Module Description at the time that retake commences.
