

MODULE SPECIFICATION

Part 1: Basic Data					
Module Title	Complexities of Caring for Older People				
Module Code	UZTRWN-20-M	Level	M	Version	2
UWE Credit Rating	20	ECTS Credit Rating	10	WBL module?	No
Owning Faculty	HAS	Field	Continuing Care Adult Nursing		
Department	Nursing and Midwifery	Module Type	Project		
Contributes towards	MSc Advanced Practice PG Cert Health and Social Care PG Dip Advanced Practice				
Pre-requisites	none	Co- requisites	none		
Excluded Combinations	none	Module Entry requirements	Registered practitioner in health or social care		
Valid From	September 2017	Valid to	March 2021		

Part 2: Learning and Teaching	
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <ol style="list-style-type: none"> 1. Critically debate how the concept of frailty influences the management of complex needs in older people (Component A) 2. Articulate how the relationship between co-morbidity, polypharmacy and ageing impacts on the older person's health (Component A) 3. Critically evaluate and justify the evidence base underpinning the tools used to assess frailty (Component A) 4. Identify, and managing complex care needs and provide possible solutions to improve outcomes for older people (Component A) 5. Debate the impact that older peoples choices and decisions may have on their care and support needs (Component A) 6. Critique the principal theories, concepts, policies and practices that influence delivery of health and social care for the older person (Component A).
Syllabus Outline	<ul style="list-style-type: none"> • Changing context of ageing and care; Old old vs baby boomers • The ageing population; epidemiology, demography • Admission avoidance including iatrogenic admission • Outcome measures • Bio-psycho-social theories • Spiral of decline • Definition of frailty • Pre frailty • Assessment of early signs of frailty • Frailty syndromes • Assessment tools <ul style="list-style-type: none"> • Introduction to Comprehensive Geriatric assessment • Poly pharmacy • Frailty at home

- Falls assessment and management
- Health promotion and education with older people
- Three d's differential diagnosis; delirium, depression and dementia
- Recognising deterioration and exacerbation of co morbidity
- Positive risk taking
- Mental Capacity Act / Deprivation of Liberty Standards
- Working with and supporting carers and relationships
- Integrated teams
- Interagency collaboration
- Natural death orders
- Advanced care planning
- Advocacy, choice and independence
- Recovering from mental health distress

Contact Hours 48 contact hours

Teaching and Learning Methods The module can be taken as a 20 credit module or as individual days. The approach is blended learning
Scheduled learning includes lectures, seminars, tutorials,
Independent learning includes hours engaged with essential reading, case study preparation, assignment preparation and completion etc.
 TEL: The module will be supported by a Blackboard module site where a range of course materials will be available. Students will be expected to access reading materials through the Blackboard site, and engage with additional activities such as accessing video and weblinks. Discussion boards will be enabled for student use, facilitated by the module leader. TEL activities will be utilised for self-directed study

Key Information Sets Information Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.

Key Information Set - Module data				
<i>Number of credits for this module</i>				20
Hours to be allocated	Scheduled learning and teaching study hours	Independent study hours	Placement study hours	Allocated Hours
200	48	52	100	200

The table below indicates as a percentage the total assessment of the module which constitutes a -

Coursework: Written assignment

Please note that this is the total of various types of assessment and will not necessarily reflect the component and module weightings in the Assessment section of this module description:

Total assessment of the module:			
Written exam assessment percentage		0%	
Coursework assessment percentage		100%	
Practical exam assessment percentage		0%	
			100%

Reading Strategy

Core reading

It is essential that students read one of the many texts on older people available through the Library. The module handbook will also reflect the range of reading to be carried out.

Further reading

Students are expected to identify all other reading relevant to their chosen topic for themselves. They will be encouraged to read widely using the library search, a variety of bibliographic and full-text databases, and Internet resources. Many resources can be accessed remotely.

Access and skills

The development of literature searching skills is available through the library web pages, including interactive tutorials on finding books and journals, evaluating information and referencing. Sign-up workshops are also offered by the Library.

Indicative Reading List

Indicative reading list

The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, *current* advice on readings will be available via the module handbook.

Part 3: Assessment

Assessment Strategy	<p>Students will complete a critical account of a situation or incident related to an older person and which utilises a timeline or trajectory framework. The situation or incident must be related to either frailty or complex care needs.</p> <p>The critical account will be structured utilising the students choice of trajectory or timeline framework and will comprise of these three stages</p> <ol style="list-style-type: none"> 1. Initial indications 2. Midpoint crisis 3. Resolution / solution <p>This critical approach gives students an opportunity to explore a situation or incident as it unfolds through either a timeline approach, or meanders through a trajectory. The final stage should clearly articulate either resolution, a potential solution or solutions or recognition that there are no solutions possible to the situation presented.</p> <p>Opportunities will be given throughout the module for students to discuss their situation or incident in groups and with the module team.</p>
