CORPORATE AND ACADEMIC SERVICES

MODULE SPECIFICATION

Part 1: Basic Data					
Module Title	Investigating Academic and Professional Practice in Higher Education				
Module Code	UTLGBP-15-M		Level	M	Version	1
UWE Credit Rating	15	ECTS Credit Rating	7.5	WBL Module?	No
Owning Faculty	Arts, Creative Industries and Education		Field	Secondary Education and Lifelong Learning	
Department	Education		Module Type	Project	
Contributes towards	PG Cert Education PG Cert Education (Teaching & Learning in Higher Education) PG Cert Education (Teaching & Learning in Higher Education – Nurse /Midwifery Teacher) PG Dip Education MA Education				
Pre-requisites	None		Co- requisites	None	
Excluded Combinations	None		Module Entry requirements	An active role in teaching in higher education, usually above a 0.5 position.	
Valid From	October 2015		Valid to		

CAP Approval Date	January 2015

Part 2: Learning and Teaching	
Learning Outcomes	On successful completion of this module participants will be able to: 1. Consolidate their grasp of policy drivers for curriculum development and the environment of higher education (A); 2. Consolidate their analysis of the role and impact of learning technologies on teaching and learning at module, programme and institutional levels to take account of higher education sector level policies (A) 3. Consolidate their critical grasp of appropriate educational research methodologies and their ability to make and justify methodological choices (A) 4. Develop, lead and contribute to higher education curriculum development and programme design (A) 5. Identify an issue for inquiry, critically examine a selection of research in higher education, carry out a small scale investigation and report on it considering questions of data collection interpretation and application to their own professional practice and context (A)
Syllabus Outline	Research studies selected for study will include attention to (a) substantive issues such as: • the social context of higher education • policy issues in higher education

	- learning in higher education (including graduate studies) - processes of change and innovation - academic professionalism and (b) a range of educational research methodologies and methods
Contact Hours	15 hours
Teaching and Learning Methods	The learning approach is "research-based learning", including experiential learning, problem-based approaches, critical reading, dialogue and discussion and writing activities.
Key Information Sets Information	
Reading Strategy	All participants will be encouraged to make full use of the print and electronic resources available to them through membership of the University. These include a range of electronic journals and a wide variety of resources available through web sites and information gateways. The University Library's web pages provide access to subject relevant resources and services, and to the library catalogue. Many resources can be accessed remotely. Participants will be presented with opportunities within the curriculum to develop their information retrieval and evaluation skills in order to identify such resources effectively. There is no central text for this module but there will be detailed further reading listed for different topics which will be available in the module handbook and on Blackboard or through any other vehicle deemed appropriate by the module/programme leaders. All the further reading will be available from the library and from identified relevant sources such as bibliographical databases.
Indicative Reading List	Barnett R. (2005), Reshaping the university: new relationships between research, scholarship and teaching, Buckingham: Open University Press Bell L., Neary M. and Stevenson H. Part 3: Assessment

Assessment Strategy	As a project module with one component the assessment strategy focuses on the reporting and evaluating of a small scale investigation aimed at improving the participants' academic and/or professional practices.
	The assignment will need to meet the following three assessment criteria:
	ALM: Conceptual Domain (Core)
	The assignment demonstrates that the participant can use and organise coherently

relevant ideas, perspectives or theories to interpret and/or explore issues under study and in addition can critically analyse and/or evaluate those ideas, perspectives or theories showing the ability to synthesise and/or transform ideas in the process of developing an argument.

In meeting this assessment criterion participants will be addressing the following dimensions of the UKPSF:

Areas of Activity
    A1 Design and planning of learning activities and/or programmes of study
    A3 Assess and give feedback to learners
    A4 Develop effective environments and approaches to student support and guidance
Core Knowledge
    K5 Methods for evaluating the effectiveness of teaching
    K6 The implications of quality assurance and quality enhancement for academic and professional practice with a particular focus on teaching

BLM: Literature Domain
The assignment demonstrates that the participant can reference an extensive range of literature and utilise it in the development of analysis and discussion of ideas, including critical engagement with that literature.

In meeting this assessment criterion participants will be addressing the following dimensions of the UKPSF:

Areas of Activity
    A5 Engage in continuing professional development in subjects/disciplines and their pedagogy, incorporating scholarship, research and the evaluation of professional practices

DLM: Research Domain
The assignment demonstrates that the participant can plan for and execute a small scale enquiry in a systematic and reflexive manner, identifying and explaining methodological and epistemological issues around the research process and critically analysing and evaluating research outcomes.

In meeting this assessment criterion participants will be addressing the following dimensions of the UKPSF:

Areas of Activity
    A4 Develop effective environments and approaches to student support and guidance
    A5 Engage in continuing professional development in subjects/disciplines and their pedagogy, incorporating scholarship, research and the evaluation of professional practices
Professional Values
    V1 Respect individual learners and diverse learning communities
    V2 Promote participation in higher education and equality of opportunity for learners
    V3 Use evidence-informed approaches and the outcomes from research, scholarship and continuing professional development
    V4 Acknowledge the wider context in which higher education operates recognising the implications for professional practice

UK Professional Standards Framework
By completing the taught module and the assignment participants will be addressing the following dimensions of the UKPSF:

Areas of Activity
    A1 Design and planning of learning activities and/or programmes of study
    A2 Teaching and/or supporting learning
    A3 Assess and give feedback to learners
    A4 Develop effective environments and approaches to student support and

guidance
    A5 Engage in continuing professional development in subjects/disciplines and their pedagogy, incorporating scholarship, research and the evaluation of professional practices

Core Knowledge
    K4 The use and value of appropriate learning technologies
    K5 Methods for evaluating the effectiveness of teaching
    K6 The implications of quality assurance and quality enhancement for academic and professional practice with a particular focus on teaching

Professional Values
    V1 Respect individual learners and diverse learning communities
    V2 Promote participation in higher education and equality of opportunity for learners
    V3 Use evidence-informed approaches and the outcomes from research, scholarship and continuing professional development
    V4 Acknowledge the wider context in which higher education operates recognising the implications for professional practice

NMC Teachers' Standards
By completing the taught module and the assignment participants will be addressing the following elements of the NMC Standards:
7.1, 7.2, 7.4, 8.1, 8.4

2. Facilitation of learning
    2.1. Promote development of enquiring, reflective, critical and innovative approaches to learning.
6. Context of practice
    6.1. Support students in identifying ways in which policy impacts on practice.
    6.2. Contribute effectively to the process of change and innovation, implementing new ways of working that maintain the integrity of professional roles.
7. Evidence-based practice
    7.1 Advance their own knowledge and practice abilities through access to and involvement in, where appropriate, research and practice development.
    7.2 Consider how evidence based practice, involving patients, clients, carers and other members of the health and social care team, enhances care delivery and learning opportunities.
    7.4 Disseminate findings from research and practice development to enhance the quality of learning, care delivery and academic environments.
8. Leadership
    8.1. Demonstrate effective communication skills to facilitate delivery of educational programmes leading to registration or a recordable qualification.
    8.4 Demonstrate strategic vision for practice and academic development relevant to meeting NMC requirements.
.

Identify final assessment component and element	Component A	
	A:	**B:**
% weighting between components A and B (Standard modules only)	N/A	N/A

First Sit

Component A (controlled conditions) **Description of each element**	**Element weighting** **(as % of component)**
A research study of 3000 words in length that describes, evaluates and reflects the design and conduct of an empirical inquiry into higher education, and reflect on its relevance to the participant's professional practice. Usually, the enquiry will have been designed and conducted solely by the participant, though where there has been an element of collaboration, a statement giving details of the nature and scope of the collaboration, signed by all parties, should be included.	100%

| Those following the Nursing and Midwifery Council (NMC) route will be required to negotiate the focus of their investigation with their Head of Department and/or relevant Programme Pathway Leader. They will need to focus their investigation on programme development relevant to meeting NMC requirements. | |

Resit (further attendance at taught classes is not required)	
Component A (controlled conditions) **Description of each element**	**Element weighting** **(as % of component)**
A research study of 3000 words in length that describes, evaluates and reflects the design and conduct of an empirical inquiry into higher education, and reflect on its relevance to the participant's professional practice. Usually, the enquiry will have been designed and conducted solely by the participant, though where there has been an element of collaboration, a statement giving details of the nature and scope of the collaboration, signed by all parties, should be included. Those following the Nursing and Midwifery Council (NMC) route will be required to negotiate the focus of their investigation with their Head of Department and/or relevant Programme Pathway Leader. They will need to focus their investigation on programme development relevant to meeting NMC requirements.	100%
If a student is permitted an **EXCEPTIONAL RETAKE** of the module the assessment will be that indicated by the Module Description at the time that retake commences.
