

CORPORATE AND ACADEMIC SERVICES

MODULE SPECIFICATION

| Part 1: Basic Data | | | | | | |
|-----------------------|-----------------------------------|-----------------------|---------------------------|-----------------------|---------|-----|
| Module Title | Future Documer | ntary | | | | |
| Module Code | UALANS-30-M | | Level | М | Version | 1.1 |
| Owning Faculty | ACE | | Field | Lens and Moving Image | | |
| Contributes towards | MA Wildlife Film MA Documentar | | | | | |
| UWE Credit Rating | 30 | ECTS Credit Rating | 15 | Module Type | Project | |
| Pre-requisites | | | Co- requisites | | | |
| Excluded Combinations | | | Module Entry requirements | | | |
| Valid From | September 2015 | | Valid to | September 2020 | | |

| CAP Approval Date | March 2015 |
|-------------------|------------|
| | |

| Part 2: Learning and Teaching | | | | |
|-------------------------------|---|--|--|--|
| Learning Outcomes | On successful completion of this module students will be able to: 1. Reflect critically on the impact of established and emergent interactive technologies on the documentary and factual genre (Component A); 2. Demonstrate an advanced critical understanding of the range of specific platforms, their narrative potential and ability to engage different audiences (Component A); 3. Demonstrate engagement with emergent business models appropriate to multiplatform media (Component A); 4. Apply advanced research and creative methodologies appropriate to the development of a design for interactive documentary or factual product for a specific platform (Component A); 5. Apply advanced multi-disciplinary production skills to the initial development of an interactive documentary or factual product (Component A); 6. Critically evaluate the proposed project, situating it within relevant research literature, documentary and factual genre (Component A); 7. Clearly communicate ideas in a variety of forms - orally, written, practically - according to appropriate professional and academic standards (Component A). 8. Demonstrate a professional approach to the presentation of work to industry panel or other appropriate audience (Component A). | | | |
| Syllabus Outline | This module will look at how the documentary genre is continuing to evolve into the | | | |

digital and interactive era and the associated impact on audience expectations and behaviours. It will enable students to critically analyse the opportunities being opened up by new forms and to consider the potential consequences of these innovations.

The module will explore the potential of multiple platforms and emerging innovative production processes on the treatment of documentary subjects, extending students' understanding from linear storytelling into non-linear, trans-media contexts and participatory, collaborative modes. It will also consider the development of broadcast products, looking at how programme assets are re-purposed and refreshed via multiplatform production to create additional content, brand extensions and social media experiences.

It will examine case studies drawn from innovative projects that document the 'real' through a range of digital interactive technologies and distribution modes (e.g. locative and pervasive media, smart phone and ipad apps, web-sites, docu-games, second screen applications and installations). It will also explore the potential of a range of proprietary and open source software.

This module will introduce students to the design principles necessary to produce interactive documentary and factual media products, by exploring the relationship between product design and creative media production processes. Students will pitch and shape content for an interactive documentary or factual media production that engages with the concept of transmedia storytelling.

Students may envision their own interactive project or may address an industry-facing brief and work with a specific set of available assets. Projects may include designing content for BBC Factual, a charity or education or heritage purposes. Students may be required to work individually or in groups depending on the nature of the briefs as specified in the module handbook.

Contact Hours

The scheduled contact hours will be approximately 48 hours encompassing all teaching activity as outlined below.

Teaching and Learning Methods

This module will provide a distinctive, intensive, and well-tested environment through which students can be introduced to new ideas about production processes and understand platforms and markets, under the expert guidance of tutors and industry support teams. The teaching and learning will be underpinned by expertise developed though the university's Digital Cultures Research Centre and the work of UWE Bristol's internationally recognised i-Docs symposium.

The core scheduled teaching and learning will be delivered as a combination of workshops, lectures, master-classes, case studies and technical instruction. This will be accompanied by group and individual supervision, online teaching resources and synchronous online support. The programme will also include induction, plenary and presentation activities.

Working on a self-generated project or responding to briefs set either by teaching staff or industry partners, students will design and evaluate a small-scale interactive project. Students will present work in progress during taught sessions for feedback from peers, tutors and invited appropriate industry professionals. Other opportunities for formative feedback include comments on the group blogs and individual and group tutorials.

Students will then write up pitch documentation that evaluates the audience, the benefits, the future development and industry context in relation to relevant research literature, offers some analysis of their project and their development as a creative producer throughout the module.

Scheduled learning includes lectures, seminars, tutorials, project supervision, demonstration, practical classes and workshops; supervised time in studio/workshop.

Independent learning includes hours engaged with essential reading, case study preparation, assignment preparation and completion etc.

| Key Information | Not applicable | | |
|-----------------------------------|--|--|--|
| Sets Information Reading Strategy | Core readings Any essential reading will be indicated clearly, along with the method for accessing it or be referred to texts that are available electronically or in the Library. Module guides will also reflect the range of reading to be carried out. | | |
| | Further readings Further reading will be required to supplement the set text and other printed readings. Students are expected to identify all other reading relevant to their chosen topic for themselves. They will be required to read widely using the library search, a variety of bibliographic and full text databases, and Internet resources. Many resources can be accessed remotely. The purpose of this further reading is to ensure students are familiar with current research, classic works and material specific to their interests from the academic literature. | | |
| | Access and skills The development of literature searching skills is supported by a Library seminar provided within the first semester. Students will be presented with further opportunities within the curriculum to develop their information retrieval and evaluation skills in order to identify such resources effectively. Additional support is available through the Library Services web pages, including interactive tutorials on finding books and journals, evaluating information and referencing. | | |
| Indicative Reading List | The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. However, as indicated above, current advice on readings will be available via other more frequently updated mechanisms. | | |

BBC Assets

As appropriate, the BBC will provide a range of assets for live brief projects.

Part 3: Assessment

Assessment Strategy

The summative assessment is as follows:

Component A: Portfolio 100%

Students are required to submit a portfolio of work for assessment which will include the outcomes of set tasks throughout the module. These are designed to enable students to develop and demonstrate for the purposes of assessment their acquisition of the skills, knowledge, understandings and experiences that will enable them to meet the learning outcomes.

Examples of the specific tasks to be included in the portfolio will be clearly defined in the Module Handbook.

The portfolio may include:

- A prototype project, including supporting research and production process documentation.
- A project pitch and supporting documents.
- Evaluative statement, analysing the pitch and the project.
- Selected work submitted in class.

| Assess | sment Criteria | Relating to Learning Outcomes |
|--------|---|-------------------------------------|
| 1. | Critical reflection on the impact of emergent interactive technologies on the documentary genre; | 1 |
| 2. | Critical understanding of the affordances of specific platforms, their narrative potential and ability to engage different audiences; | 2 |
| 3. | Engagement with emergent business models appropriate to multiplatform media; | 3 |
| 4. | Application of research and creative methodologies appropriate to the development of a design for interactive documentary product; | 4 |
| 5. | Application of appropriate multi-disciplinary production skills to the initial development of an interactive documentary product; | 5 |
| 6. | Critically evaluation of the proposed project, situating it within relevant research literature and documentary genre and their own development as a creative producer; | 7 |
| 7. | Clarity of communication of ideas in a variety of forms - orally, written, practically - according to appropriate professional and academic standards. | 8 |

| Identify final assessment component and element | Component A | | |
|--|-------------|--------------------------|-----------|
| | | A: | B: |
| % weighting between components A and B (Standard modules only) | | | |
| | | | |
| First Sit | | | |
| Component A (controlled conditions) | | Element v | |
| Description of each element | | (as % of co | emponent) |
| 1. Portfolio | | 100 |)% |
| 2. | | | |
| Component B Description of each element | | Element v (as % of co | |
| 1. | | | |
| 2.(etc) | | | |

| Resit (further attendance at taught classes is not required) | | | |
|--|---------------------|--|--|
| Component A (controlled conditions) | Element weighting | | |
| Description of each element | (as % of component) | | |
| 1. Portfolio | 100% | | |
| 2. | | | |
| Component B | Element weighting | | |
| Description of each element | (as % of component) | | |
| 1. | | | |
| 2.(etc) | | | |

If a student is permitted an **EXCEPTIONAL RETAKE** of the module the assessment will be that indicated by the Module Description at the time that retake commences.
