

Module Specification

Chronic and Acute Care Management of Chronic Obstructive Pulmonary Disease (COPD)

Version: 2024-25, v2.0, 02 Feb 2024

Contents

Module Specification	1
Part 1: Information	2
Part 2: Description	2
Part 3: Teaching and learning methods	3
Part 4: Assessment	4
Part 5: Contributes towards	6

Part 1: Information

Module title: Chronic and Acute Care Management of Chronic Obstructive Pulmonary Disease (COPD)

Module code: UZWSVT-20-M

Level: Level 7

For implementation from: 2024-25

UWE credit rating: 20

ECTS credit rating: 10

College: College of Health, Science & Society

School: CHSS School of Health and Social Wellbeing

Partner institutions: None

Field: Acute and Critical Care Adult Nursing

Module type: Module

Pre-requisites: None

Excluded combinations: None

Co-requisites: None

Continuing professional development: Yes

Professional, statutory or regulatory body requirements: None

Part 2: Description

Overview: Not applicable

Features: Module entry requirements: Registered Practitioners who work with people with Chronic Obstructive Pulmonary Disease in the community and in hospital. Offered as CPD or stand alone.

Educational aims: See Learning Outcomes.

Outline syllabus: The syllabus typically includes:

Overview of COPD:

Anatomy and pathophysiology of the respiratory system

Epidemiology of COPD

Factors that influence disease progression for example risk factors, such as,
Smoking, chest Infections, indoor and outdoor air quality.

Assessment; Diagnosis and monitoring:

Physical examination and history taking

Multi-professional roles in assessment; diagnosis and monitoring

Management of COPD:

Treating Tobacco dependency

Pharmacological therapy

Oxygen therapy

Pulmonary Rehabilitation

Therapeutic interventions

Management of exacerbations of COPD in primary and secondary care:

Palliative management of COPD

Self-Management; personalised care planning

Investigations and treatment

Integrated care pathways

Non Invasive Ventilation (NIV)

Psychological and sociological support for service users, carers and their families.

Assessing and supporting mental well being

Comorbidities and differential diagnosis.

Part 3: Teaching and learning methods

Teaching and learning methods: Scheduled learning includes lectures, seminars, reflection on practice, practical classes and workshops.

Independent learning includes hours engaged with essential reading especially activities online, case study preparation and presentation.

Contact Hours: The actual contact time is 48 hours and this is complemented by self-directed learning and online learning resources.

Module Learning outcomes: On successful completion of this module students will achieve the following learning outcomes.

MO1 Demonstrate and apply detailed knowledge and understanding of the physiology and pathophysiology of Chronic Obstructive Pulmonary Disease.

MO2 Critically examine the assessment, diagnosis, treatment, and management of both chronic and acute care of Chronic Obstructive Pulmonary Disease, in both primary, community and secondary care (including pharmacological and non-pharmacological management).

MO3 Critically explore the assessment, care, and management of complications and therapies for Chronic Obstructive Pulmonary Disease, in relation to psychological, physiological, and socio-political aspects.

MO4 Critically analyse and evaluate health literature, providing independent perspectives and applying how evidence-based practice influences the diagnosis, treatment, and impact of Chronic Obstructive Pulmonary Disease on service users, carers and their families.

Hours to be allocated: 200

Contact hours:

Independent study/self-guided study = 152 hours

Face-to-face learning = 48 hours

Reading list: The reading list for this module can be accessed at [readinglists.uwe.ac.uk](https://uwe.rl.talis.com/modules/uzwsvt-20-m.html) via the following link <https://uwe.rl.talis.com/modules/uzwsvt-20-m.html>

Part 4: Assessment

Assessment strategy: Formative: Delivery of concept to peers and facilitators, presenting ideas and research that will contribute and lead to the summative assessment.

Summative: Assessment task is a presentation + critical questioning, maximum of 25 minutes in total.

Students will be asked to present a case study of a patient with Chronic Obstructive Pulmonary Disease. Students will be expected to demonstrate knowledge of the pathophysiological principles of Chronic Obstructive Pulmonary Disease and relate to their chosen treatment intervention. They will be expected to identify a problem list and select an intervention to target this. The focus of this presentation should be on the management of the patient's condition and the evidence base underpinning treatment selection. This will be followed by critical questions from the examiner.

The presentation will be pre-recorded with live questioning.

Assessment tasks:

Presentation (First Sit)

Description: Presentation + critical questioning maximum 25 minutes

Weighting: 100 %

Final assessment: Yes

Group work: No

Learning outcomes tested: MO1, MO2, MO3, MO4

Presentation (Resit)

Description: Presentation + critical questioning maximum 25 minutes

Weighting: 100 %

Final assessment: Yes

Group work: No

Learning outcomes tested: MO1, MO2, MO3, MO4

Part 5: Contributes towards

This module contributes towards the following programmes of study:
