Part 2: Description
<p>Educational Aims: See Learning Outcomes.</p> <p>Outline Syllabus: The specific content of the module will be negotiated with a member of academic staff of the Faculty and will vary as a function of the identified area of practice for exploration.</p> <p>Teaching and Learning Methods: A learning contract will be negotiated between the student and a member of academic staff from which a direction of study will be agreed. This may include use of one or more of the following: self-directed learning; tutorials; seminars; study days; open or distance learning.</p> <p>Contact time with staff will take the form of supervision and academic support sufficient to enable the student to reflect upon and map their development and focus for the Independent Study (IS). The student will engage with the staff member and identify early on what their focus for the Independent Study will be. Support is available in order to refine and focus this as the study develops. There is no formal contact time and the student can expect to receive sufficient support to remain focused. The student is encouraged to integrate their practice activities into the study</p>

perhaps visiting specialist areas of practice to inform their own. This is for the student to arrange. This IS does NOT entitle the student or expect them to carry out research.

Contact time may also take asynchronous virtual form rather than face-to-face, through the use of email discussion groups, virtual learning environments (VLEs) and other technology-aided means. It can also take place in a work based setting by negotiation.

Part 3: Assessment

A 2500 word submission (or equivalent). The title to be agreed.

The student will have the opportunities for formative assessment and to discuss their approach and negotiate the content and process of their report with the supervisor.

The title to be agreed as part of the learning contract and will reflect an area of practice identified for exploration. This assessment strategy is most suited to Independent Study as it enables the student to agree on a design that best represents their aim and agree how they prefer to approach the assignment and required assessment.

This assessment is flexible to enable the student to represent their achievements, refinements, developments and planning of their practice. A reflective approach is encouraged to enable the student to best represent their academic and practice achievements.

There is no standard module time length but there are constraints from assessment influences, timescales for completion within certain awards and subject to maximum length of completion. Again, the completion timetable is by negotiation and agreement with the student, module leader and any other interested party e.g. Programme Lead for the student's programme of study.
