Department	Nursing and M	idwifery	Module type	Project		
Pre-requisites	None		Co-	None		
			requisites			
Excluded	None		Module Entry	None		
Combinations			requirements			
Valid From	September 2015		Valid to	September 2021		

Review Date

Part 2: Learning and Teaching				
Learning Outcomes	 On successful completion of this module students will be able to: 1. Identify and justify an aspect of practice that lends itself to study and exploration. (Component A) 2. Critically examine and review an extensive range of theories supporting the knowledge base of an aspect of practice identified for focused exploration. (Component A) 3. Justify and analyse her or his ideas and/or views related to the identified aspect of practice and related to professional practice. (Component A) 4. Critically engage with professional debates in relation to ways in which her or his own practice might be enhanced, improved or maintained. (Component A) 			
	 Convincingly evidence detailed and deep understanding and evaluation in specialised areas and of current theory and research (Component A) 			
Syllabus Outline	The specific content of the module will be negotiated with a member of academic staff of the Faculty and will vary as a function of the identified area of practice for exploration.			

Contact Hours	Contact time with staff will take the form of supervision and academic support sufficient to enable the student to reflect upon and map their development and focus for the Independent Study (IS). The student will engage with the staff member and identify early on what their focus for the Independent Study will be. Support is available in order to refine and focus this as the study develops. There is no formal contact time and the student can expect to receive sufficient support to remain focused. The student is encouraged to integrate their practice activities into the study perhaps visiting specialist areas of practice to inform their own. This is for the student to arrange. This IS does NOT entitle the student or expect them to carry out research. Contact time may also take asynchronous virtual form rather than face-to-face, through the use of email discussion groups, virtual learning environments (VLEs) and other technology-aided means. It can also take place in a work- based setting by negotiation.									
Teaching and Learning Methods	acao use	A learning contract will be negotiated between the student and a member of academic staff from which a direction of study will be agreed. This may include use of one or more of the following: self-directed learning; tutorials; seminars; study days; open or distance learning

Reading Strategy	Students are expected to identify most of the reading relevant to their topic for themselves and will be encouraged to make full use of the print and electronic resources available to them through membership of the university. These include a range of electronic journals and a wide variety of resources available through websites and information gateways. It will be expected that the assignment reference list will reflect the range of reading carried out.
	It is anticipated that some students will not have studied recently and will therefore need support in developing their literature searching skills. The Library provides a literature searching workshop and the student is encouraged to book themselves onto this if they require it. Interactive online tutorials are also available.
Indicative Reading List	Any recommended reading will be tailored to individual learning contracts and your supervising teacher may make further suggestions for reading. Indicative reading list – The student will identify their own indicative reading lists in order to support their Study. The students are encouraged, however, to familiarise themselves with their Professional Body Documents and the guidelines, policies and protocols that govern their practice as the Independent Study is designed to reflect current practice even in the context of an historical overview and mapping of development and progression.

Part 3: Assessment			
Assessment Strategy	A 2500 word submission (or equivalent). The title to be agreed.		
	The student will have the opportunities for formative assessment and to discuss their approach and negotiate the content and process of their report with the supervisor.		
	The title to be agreed as part of the learning contract and will reflect an area of practice identified for exploration. This assessment strategy is most suited to Independent Study as it enables the student to agree on a design that best represents their aim and agree how they prefer to approach the assignment and required assessment.		
	This assessment is flexible to enable the student to represent their achievements, refinements, developments and planning of their practice. A reflective approach is encouraged to enable the student to best represent their academic and practice achievements.		
	There is no standard module time length but there are constraints from assessment influences, timescales for completion within certain awards and subject to maximum length of completion. Again, the completion timetable is by negotiation and agreement with the student, module leader and any other interested party e.g. Programme Lead for the student's programme of study.		

Identify final assessment component and element	Component A		
		A:	B:
% weighting between components A and B (Standard modules only)			

First Sit	
Component A (controlled conditions) Description of each element	Element weighting (as % of component)
1. A 2500 word submission (or equivalent).	100%

Resit (further attendance at taught classes is not required)	
Component A (controlled conditions) Description of each element	Element weighting (as % of component)
1. A 2500 word submission (or equivalent).	100%
If a student is permitted an EXCEPTIONAL RETAKE of the module	the assessment will be that

If a student is permitted an **EXCEPTIONAL RETAKE** of the module the assessment indicated by the Module Description at the time that retake commences.
