

MODULE SPECIFICATION

Part 1: Basic Data					
Module Title	Exploring Occupation, Health & Well-being: Part One				
Module Code	UZYS1S-30-1	Level	1	Version	1
Owning Faculty	Health and Applied Sciences	Field	Allied Health Professions		
Contributes towards	BSc (Hons) Occupational Therapy				
UWE Credit Rating	30	ECTS Credit Rating	15	Module Type	Project
Pre-requisites	None		Co- requisites	None	
Excluded Combinations	None		Module Entry requirements	None	
Valid From	September 2015		Valid to	September 2021	

CAP Approval Date	30 th April 2015
--------------------------	-----------------------------

Part 2: Learning and Teaching	
Learning Outcomes	<p>On successful completion of this module students will be able to:</p> <ol style="list-style-type: none"> 1. Describe and explore the relationship between occupation, health and well-being (Component A) 2. Describe the main theories and concepts of occupational performance and occupational science (Component A) 3. Demonstrate understanding of the importance of occupation to the lives of individuals in all stages of their life course and the factors which influence occupational performance (Component A) 4. Identify the nature of social contexts, sociological theories, sources of evidence and social policy in relation to occupational performance (Component A) 5. Develop and articulate own opinions through questioning and challenging viewpoints, ideas and concepts and competently communicate these in writing (Component A) 6. Demonstrate basic understanding of activity analysis and occupational performance in context and articulate an understanding of its relationship to health and well-being (Component A) 7. Demonstrate understanding of the Occupational Therapy Process and theoretical concepts underpinning practice (Component A)
Syllabus Outline	<p>The aim of this module and the follow on module in the series, 'Exploring Occupation, Health and Well-being Part Two', is to introduce the student to the key theories and science underpinning occupational therapy practice and to understand the classification and study of occupational performance in context. It also introduces the basics of occupational therapy processes and models. This modules specifically considers occupational performance across the lifespan. The syllabus is organised</p>

	<p>under four sections:</p> <p><u>Underpinning Theory:</u></p> <ul style="list-style-type: none"> • Introduction to the occupational therapy paradigm • Complexity of occupation • The links between occupation, health and well-being • Occupational Science: <ul style="list-style-type: none"> ○ History and focus on human activity ○ Current knowledge base and its influence in supporting occupational therapy practice • History of the links between occupation and health, and the profession • Concepts of social context, sociological theories, and social policy on how these impact upon occupational performance and the profession. • Occupation and lifespan development <p><u>Practical Skills:</u></p> <ul style="list-style-type: none"> • Listening and group work skills • Analysis of activity and occupation • Analysis of occupational performance in context • Interview skills • Observation skills • Reflection <p><u>Introduction to Occupational Therapy Practice</u></p> <ul style="list-style-type: none"> • Introduction to the occupational therapy process, Introduction to the Health and Care Professions Standards of Proficiency for Occupational Therapists. • Principles of assessment, intervention aims and goals. <p><u>Transferable Skills:</u></p> <ul style="list-style-type: none"> • Orientation to problem based learning (PBL) nature of PBL, how PBL works and basic group working skills, to include agreeing effective group goals and ground rules • Using the library data bases to search for evidence • Presentation skills • Writing skills • Using communication information technology to organise information, communicate effectively and collaborate.
Contact Hours	As this is a 30 credit module, it assumes 300 hours of study on the part of the student; approximately 72 hours of this will be in scheduled learning, which may take several forms as described below. Students are expected to spend 228 hours on independent learning tasks and preparation for assessments.
Teaching and Learning Methods	<p><u>Scheduled learning.</u> Includes: lectures, practical sessions in small groups (sizes varying due to type of activities and risk assessments) and workshops, supervised problem based learning group work</p> <p><u>Independent learning:</u> includes hours engaged with essential reading, preparation for scheduled teaching and practical sessions, student led practice sessions, on-line project collaboration, assignment preparation and completion. These sessions constitute an average time per level as indicated in the table below.</p> <p><u>Technology Enhanced Learning:</u> MyUWE and Blackboard, the university supported learning portal and virtual learning environment, will be used to support students' learning, conduct activities, organise and communicate learning materials. Students will be able to engage with the material, other students and members of staff through these systems and make use of the various functionalities built into them (e.g., blogs, journals, audio, video, discussion boards, wikis, etc.) as appropriate and useful for the module learning. This module also uses external TEL resources to produce a formative project report.</p>

<p>Key Information Sets Information</p>	<p>Key Information Sets (KIS) are produced at programme level for all programmes that this module contributes to, which is a requirement set by HESA/HEFCE. KIS are comparable sets of standardised information about undergraduate courses allowing prospective students to compare and contrast between programmes they are interested in applying for.</p> <table border="1" data-bbox="459 367 1369 757"> <thead> <tr> <th colspan="5"><u>Key Information Set - Module data</u></th> </tr> </thead> <tbody> <tr> <td colspan="4"><i>Number of credits for this module</i></td> <td style="border: 2px solid black;">30</td> </tr> <tr> <th>Hours to be allocated</th> <th>Scheduled learning and teaching study hours</th> <th>Independent study hours</th> <th>Placement study hours</th> <th>Allocated Hours</th> </tr> <tr> <td>300</td> <td>72</td> <td>228</td> <td>0</td> <td>300</td> </tr> </tbody> </table> <p>The table below indicates as a percentage the total assessment of the module which constitutes a -</p> <p>Written Exam: Unseen written exam, open book written exam, In-class test Coursework: Written assignment or essay, report, dissertation, portfolio, project Practical Exam: Oral Assessment and/or presentation, practical skills assessment, practical exam</p> <p>Please note that this is the total of various types of assessment and will not necessarily reflect the component and module weightings in the Assessment section of this module description:</p> <table border="1" data-bbox="571 1160 1262 1391"> <thead> <tr> <th colspan="2">Total assessment of the module:</th> </tr> </thead> <tbody> <tr> <td>Written exam assessment percentage</td> <td>0%</td> </tr> <tr> <td>Coursework assessment percentage</td> <td>100%</td> </tr> <tr> <td>Practical exam assessment percentage</td> <td>0%</td> </tr> <tr> <td></td> <td>100%</td> </tr> </tbody> </table>	<u>Key Information Set - Module data</u>					<i>Number of credits for this module</i>				30	Hours to be allocated	Scheduled learning and teaching study hours	Independent study hours	Placement study hours	Allocated Hours	300	72	228	0	300	Total assessment of the module:		Written exam assessment percentage	0%	Coursework assessment percentage	100%	Practical exam assessment percentage	0%		100%

<p>Reading Strategy</p>	<p>Core Reading There are no set texts which students are required to purchase for this module. Reading around the topic is, however, essential and students will be directed towards appropriate material in the library resources, in the module handbook and during specific parts of the curriculum as necessary.</p> <p>Further reading If further reading is expected, this will be indicated clearly. If specific texts are listed, a clear indication will be given regarding how to access them and, if appropriate, students will be given guidance on how to identify relevant sources for themselves, e.g. through use of bibliographical databases.</p> <p>Access and skills Formal opportunities for students to develop their library and information skills are provided within the induction period both at a generic and programme specific level. Additional support is available through the Library Services web pages, including interactive tutorials on finding books and journals, evaluating information and referencing. Sign-up workshops are also offered by the Library. Further formal opportunities for students to start to develop their library and information skills are provided within in the level 1 curriculum of this programme,</p>																														

	as part of this module
Indicative Reading List	<p>The following list is offered to provide validation panels/accrediting bodies with an indication of the type and level of information students may be expected to consult. As such, its currency may wane during the life span of the module specification. Current advice on additional reading will be available via the module guide or Blackboard pages.</p> <p>American Occupational Therapy Association. (2014) Occupational Therapy Practice: Framework: Domain and Process. 3rd ed. <i>American Journal of Occupational Therapy</i> [online]. 68 (Supplement 1), pp. s1-s48. Part 3: Assessment	
Assessment Strategy	<p>Students will be given formative feedback on their project work and skills as they progress through the module.</p> <p>There is one component to the summative assessment of learning outcomes on this module</p> <ul style="list-style-type: none"> • A 4000 word essay (Component A) that assesses the students' achievement of the key learning outcomes and their ability to source and research evidence, formulate own opinions and articulate their ideas in writing. <p>The choice of assessment for this module has been made to ensure variety of assessments across level 1, to enable students to demonstrate written communication skills, and to start to demonstrate ability to analyse and</p>

	<p>evaluate information and synthesise this with experience in order to develop critical thinking which is an important skill for occupational therapists.</p> <p>The assignment criteria for this assessment is clearly explained in the module handbook, including the SEEC descriptor breakdown.</p>
--	---

Identify final assessment component and element	Component A	
% weighting between components A and B (Standard modules only)	A:	
First Sit		
Component A Description of each element	Element weighting	
1.) 4000 word essay	100%	

Resit (further attendance at taught classes is not required)		
Component A (controlled conditions) Description of each element	Element weighting	
1.) 4000 word essay	100%	
<p>If a student is permitted an EXCEPTIONAL RETAKE of the module the assessment will be that indicated by the Module Description at the time that retake commences.</p>
