Part 2: Description

Students will engage in practical workshops and experimental drawing projects to introduce elements of practice in a range of ideas, media and materials including, 2D, 3D, and 4D studies. Assessment will be through a reflective journal, a portfolio of practical work and an evaluative statement.

The theme of the module is the acquisition of basic subject specific skills, which will provide a sound basis for further development. Students will be expected to begin to develop their specialist practice based on their own ideas and direction. There is an emphasis upon questioning, exploring and contextualising ideas through the experience of making and encountering images/objects.

This module will consist of two related themes:

1) Materials and Processes – Workshops to introduce students to a range of materials and processes in Art, Media and Design

The work requirement for this module is a body of work, which the student produces in response to the briefs.

Summative assessment of this module will normally be based upon the following:

a reflective journal, a portfolio of practical work an evaluative statement of 500 words.

Students will be assessed according to their fulfilment of the learning outcomes in respect of the following criteria:

learning outcomes	Criteria	Source of evidence
