

MODULE SPECIFICATION

Part 1: Information			
Module Title	Electromechanical Systems Analysis		
Module Code	UFMFWP-30-2	Level	Level 5
For implementation from	2019-20		
UWE Credit Rating	30	ECTS Credit Rating	15
Faculty	Faculty of Environment & Technology	Field	Engineering, Design and Mathematics
Department	FET Dept of Engin Design & Mathematics		
Module type:	Standard		
Pre-requisites	None		
Excluded Combinations	None		
Co- requisites	None		
Module Entry requirements	None		

Part 2: Description
<p>Educational Aims: Learners will develop the theoretical understanding of electromechanical systems and how to use such systems for analysing and testing applications in the nuclear industry.</p> <p>Outline Syllabus: The topics covered in this unit are:</p> <p>Electronic Systems Analysis: Nuclear Detection Electronics Systems. Classification. Microprocessing. Control System Response.</p> <p>Mechanical System Analysis: Simple System Vibration. Vibration Transmission. Continuous System Vibration.</p> <p>Non-Destructive Evaluation: Visual.</p>

STUDENT AND ACADEMIC SERVICES

Electrical.
Sonic.
Other NDE Techniques.
Condition Monitoring.

In this module the following mathematical topics will be introduced and developed:

Laplace Transforms.
Systems of Linear Differential Equations.
Z transforms.

Teaching and Learning Methods: The Electromechanical Systems and Design module introduces principles of electronic systems, vibration analysis and non-destructive evaluation methods in the nuclear industry. Learners will gain a thorough theoretical and practical basis to analyse electromechanical systems.

Part 3: Assessment

Component A – Multiple Choice Exam – 2 hours – This exam will assess the learners' understanding of advanced concepts of Electromechanical Systems analysis. It will also assess the learners' mathematical analysis skills of electromechanical systems calculations.

Component B – Student Led Seminar and Poster Presentation – The seminar will assess the learners' ability to evaluate non-destructive evaluation techniques. Learners will analyse electronic processing systems and mechanical vibration systems and present their findings during a poster presentation.

The resit assessment tasks for this module will involve an expanded poster presentation, to cover all learning outcomes of component B.

First Sit Components	Final Assessment	Element weighting	Description
Set Exercise - Component B		30 %	Seminar
Poster - Component B		45 %	Poster presentation
Examination - Component A	✓	25 %	Multiple choice exam (2 hours)
Resit Components	Final Assessment	Element weighting	Description
Poster - Component B		75 %	Poster presentation covering learning outcomes 2-4
Examination - Component A	✓	25 %	Multiple choice exam (2 hours)

Part 4: Teaching and Learning Methods																	
Learning Outcomes	<p>On successful completion of this module students will achieve the following learning outcomes:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Module Learning Outcomes</th> <th style="text-align: left;">Reference</th> </tr> </thead> <tbody> <tr> <td>Conduct electromechanical systems analysis calculations</td> <td>MO1</td> </tr> <tr> <td>Analyse electronic processing systems for nuclear detection applications</td> <td>MO2</td> </tr> <tr> <td>Analyse mechanical vibration systems for equipment protection purposes</td> <td>MO3</td> </tr> <tr> <td>Evaluate electromechanical systems using non-destructive techniques</td> <td>MO4</td> </tr> </tbody> </table>	Module Learning Outcomes	Reference	Conduct electromechanical systems analysis calculations	MO1	Analyse electronic processing systems for nuclear detection applications	MO2	Analyse mechanical vibration systems for equipment protection purposes	MO3	Evaluate electromechanical systems using non-destructive techniques	MO4						
Module Learning Outcomes	Reference																
Conduct electromechanical systems analysis calculations	MO1																
Analyse electronic processing systems for nuclear detection applications	MO2																
Analyse mechanical vibration systems for equipment protection purposes	MO3																
Evaluate electromechanical systems using non-destructive techniques	MO4																
Contact Hours	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th colspan="2" style="text-align: left;">Independent Study Hours:</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">Independent study/self-guided study</td> <td style="text-align: center;">228</td> </tr> <tr> <td style="text-align: right;">Total Independent Study Hours:</td> <td style="text-align: center;">228</td> </tr> <tr> <th colspan="2" style="text-align: left;">Scheduled Learning and Teaching Hours:</th> </tr> <tr> <td style="text-align: center;">Face-to-face learning</td> <td style="text-align: center;">72</td> </tr> <tr> <td style="text-align: right;">Total Scheduled Learning and Teaching Hours:</td> <td style="text-align: center;">72</td> </tr> <tr> <td style="text-align: left;">Hours to be allocated</td> <td style="text-align: center;">300</td> </tr> <tr> <td style="text-align: left;">Allocated Hours</td> <td style="text-align: center;">300</td> </tr> </tbody> </table>	Independent Study Hours:		Independent study/self-guided study	228	Total Independent Study Hours:	228	Scheduled Learning and Teaching Hours:		Face-to-face learning	72	Total Scheduled Learning and Teaching Hours:	72	Hours to be allocated	300	Allocated Hours	300
Independent Study Hours:																	
Independent study/self-guided study	228																
Total Independent Study Hours:	228																
Scheduled Learning and Teaching Hours:																	
Face-to-face learning	72																
Total Scheduled Learning and Teaching Hours:	72																
Hours to be allocated	300																
Allocated Hours	300																
Reading List	<p><i>The reading list for this module can be accessed via the following link:</i></p> <p>https://uwe.rl.talis.com/index.html</p>																

Part 5: Contributes Towards	
<p>This module contributes towards the following programmes of study:</p> <p>Mechanical Engineering with Nuclear {Apprenticeship} [Sep][PT][BTC][4yrs] BEng (Hons) 2018-19</p> <p>Electromechanical Engineering (Nuclear){Apprenticeship}(Sep)[PT][BTC][3yrs] FdSc 2018-19</p> <p>Electrical, Electronic and Control Engineering with Nuclear {Apprenticeship} [Sep][FT][BTC][4yrs] BEng (Hons) 2018-19</p>
