STUDENT AND ACADEMIC SERVICES

Part 2: Description

Overview: The purpose of this module is to enable students to apply their learning from the programme to a work context. It is also anticipated that this opportunity will also support students in considering and planning for their own professional futures.

Educational Aims: See Learning Outcomes

Outline Syllabus: This module will require the student to organise, engage with and reflect appropriately upon work-based learning opportunities relating to education. This can be in a single setting or a number of relevant contexts. . If the student has taken the opportunity to gain experience in more than one setting all of these may feature in their assignments, but at least one of these experiences needs to be of sufficient length to enable the student to reflect on this in depth in their assignments. The work-based learning can vary in length according to the needs of the student and the arrangement/s arrived at with the organisation/s but need to total a minimum of 15 full days (except in exceptional circumstances). The possibilities for the work-based learning is very broad, but it needs to be relevant to the programme context of education.

Teaching and Learning Methods: Students will be supported through a taught input, and through tutor and peer support during their work-based experience/s. This may be face-to-face or virtual/online as appropriate.

Part 3: Assessment

The module will be assessed by a reflective log and a report which will evidence their individual engagement, critical reflections on their experiences, and their learning within the chosen educational context/s. Student will be expected to draw links between theory and practice, identify and explore critical incidents and analyse relevant themes to inform their subsequent learning. The format of the report should be appropriate to the work context.
