

## **Module Specification**

# **Business Intelligence and Data Visualisation**

Version: 2021-22, v1.0, 05 May 2020

### **Contents**

<b>Module Specification .....</b>	<b>1</b>
<b>Part 1: Information .....</b>	<b>2</b>
<b>Part 2: Description .....</b>	<b>2</b>
<b>Part 3: Teaching and learning methods .....</b>	<b>3</b>
<b>Part 4: Assessment.....</b>	<b>4</b>
<b>Part 5: Contributes towards .....</b>	<b>6</b>

## Part 1: Information

**Module title:** Business Intelligence and Data Visualisation

**Module code:** UFCFKR-15-M

**Level:** Level 7

**For implementation from:** 2021-22

**UWE credit rating:** 15

**ECTS credit rating:** 7.5

**Faculty:** Faculty of Environment & Technology

**Department:** FET Dept of Computer Sci & Creative Tech

**Partner institutions:** None

**Delivery locations:** Frenchay Campus

**Field:** Computer Science and Creative Technologies

**Module type:** Standard

**Pre-requisites:** None

**Excluded combinations:** None

**Co-requisites:** None

**Continuing professional development:** Yes

**Professional, statutory or regulatory body requirements:** None

## Part 2: Description

**Overview:** This module will emphasise the importance of collecting, analysing and presenting data to address management decision making and problem solving.

It is designed for students interested in roles such as : business intelligence analyst, data visualisation specialist, management information specialist.

**Features:** Not applicable

**Educational aims:** The broad aims of the module will be to foster confidence and dexterity with business intelligence tools platforms and methods, to develop evidence-based practice in data visualisation, and to connect both of these to the essential skills of understanding business problems and communicating trends and solutions

**Outline syllabus:** Overview of business decisions and challenges requiring BI input. Effective design critique and professional practice

Connecting to enterprise data sources. Verifying and annotating data according to provenance.

Use of BI tools and platforms (e.g. Tableau, Power BI, Qlik) to analyse data and to present results in tabular and graphical formats.

Principles of visual literacy and visual perception. Designing with colour, shapes and animation. Approaches for different data types. Accessibility.

Working with stakeholders on requirements gathering, resolving differences and validation of approaches. Selling your message succinctly and with impact.

### **Part 3: Teaching and learning methods**

**Teaching and learning methods:** The module will rely heavily on design tasks with productive peer and tutor critique and iteration. Design principles and good practice will be immediately implemented and practiced in order to be contextualised.

As many high quality resources exist for learning skills with BI tools (e.g. LinkedIn Learning), students will be expected to use private study time to develop their knowledge of different software - with guidance and worksheets provided by tutors - then use class time to practice and share technical approaches or to get help with specific tasks.

**Module Learning outcomes:** On successful completion of this module students will achieve the following learning outcomes.

**MO1** Define, demarcate and explore business problems interactively in communication with key stakeholders

**MO2** Select, evaluate and employ appropriate tools, platforms and methods to generate BI and visualisation solutions.

**MO3** Reflect upon, critique and improve upon own and others informational and visual artefacts

**MO4** Deliver a data-driven narrative appropriately and effectively to stakeholders, based on a theoretical underpinning of communicating for impact

**Hours to be allocated:** 150

**Contact hours:**

Independent study/self-guided study = 120 hours

Computer-based activities = 10 hours

Total = 150

**Reading list:** The reading list for this module can be accessed at [readinglists.uwe.ac.uk](https://readinglists.uwe.ac.uk) via the following link

<https://rl.talis.com/3/uwe/lists/89F7CEEB-2820-E803-84DD-B92F63935DE0.html?lang=en-US&login=1>

## Part 4: Assessment

**Assessment strategy:** The overall assessment context will be chosen from a selection of realistic or real-world case studies with accompanying data to be provided by tutors and / or external partners.

The written component will be a reflective portfolio updated periodically during the term and covering:

Problem definition and scoping;

Identification and selection of data;  
Exploration of comparable approaches in the literature and on the web;  
Data analysis;  
Prototyping of visualisations / artifacts;  
Peer, tutor, or external client feedback from critique

Students will be expected to draw on relevant research in reflecting on the above and to utilise appropriate tools to undertake analysis and design.

The final, presentation component will be a presentation by the student of findings and conclusions of the module-long analysis, with QA from tutors or external clients.

### **Assessment components:**

#### **Reflective Piece - Component B (First Sit)**

Description: Annotated history of learning connected to the module task, including research, design prototypes, feedback from critiques and reflective commentary.

Approx. 4000 words.

Weighting: 50 %

Final assessment: No

Group work: No

Learning outcomes tested: MO1, MO2, MO3

#### **Presentation - Component A (First Sit)**

Description: Presentation of work done, including graphics and conclusions to panel including tutors / invited guests, with questions. 15 minutes.

Weighting: 50 %

Final assessment: Yes

Group work: No

Learning outcomes tested: MO2, MO4

#### **Presentation - Component A (Resit)**

Description: Presentation of work done, including graphics and conclusions to panel including tutors / invited guests, with questions. 15 minutes.

Weighting: 50 %

Final assessment: Yes

Group work: No

Learning outcomes tested:

### **Reflective Piece - Component B (Resit)**

Description: Annotated history of learning connected to the module task, including research, design prototypes, feedback from critiques and reflective commentary.

Approx. 4000 words.

Weighting: 50 %

Final assessment: No

Group work: No

Learning outcomes tested:

### **Part 5: Contributes towards**

This module contributes towards the following programmes of study:

Information Management [Sep][FT][Frenchay][1yr] MSc 2021-22

Data Science [Sep][FT][GCET][1yr] MSc 2021-22

Information Technology [Sep][FT][Frenchay][1yr] MSc 2021-22

Data Science [Sep][FT][Frenchay][1yr] MSc 2021-22

Data Science [Sep][PT][Frenchay][2yrs] MSc 2021-22

Information Technology [Sep][PT][Frenchay][2yrs] MSc 2020-21

Information Management [Sep][PT][Frenchay][2yrs] MSc 2020-21
