

## MODULE SPECIFICATION

Part 1: Information			
Module Title	Applied Electrical Technology		
Module Code	UFMFPS-15-1	Level	Level 4
For implementation from	2020-21		
UWE Credit Rating	15	ECTS Credit Rating	7.5
Faculty	Faculty of Environment & Technology	Field	Engineering, Design and Mathematics
Department	FET Dept of Engineering Design & Mathematics		
Module Type:	Standard		
Pre-requisites	None		
Excluded Combinations	None		
Co-requisites	None		
Module Entry Requirements	None		
PSRB Requirements	None		

Part 2: Description
<p><b>Overview:</b> The module will cover material on basic principles of electrical and electronic engineering to students on mechanical engineering and automotive engineering related programmes. Electromechanical systems play an important role in many engineering situations requiring an understanding of basic electronic principles and the operation of electrical motors.</p> <p>The approach to the subject is to ensure that theoretical principles are backed up by laboratory experience and observation.</p> <p><b>Educational Aims:</b> The aim of this module is to provide technical underpinning of basic electrical and electronic principles and concepts and to provide practical experience of designing simple electrical and electronic circuits to allow students to integrate knowledge of electrical and electronic principles with other engineering disciplines.</p> <p><b>Outline Syllabus:</b> The syllabus will include:</p> <p>Basic electrical quantities (charge, electric field, current, voltage and power) and laws (Coulomb electrostatic force law, Faraday's Law of induction, Ohm's law and Ampere's magnetic force law.).</p>

## STUDENT AND ACADEMIC SERVICES

Basic components of electronic circuits: resistors, capacitors, capacitive, inductors, all semiconducting devices.  
 Signal parameters and their types.  
 Operational Amplifiers.  
 Active Filters: Op amps use in active filter, as an integrator and differentiator, as a comparator and as an oscillator.  
 Passive filters.  
 The Cartesian and polar representation of voltage and current.  
 Electromechanical actuators: Plungers, solenoids. Motors: DC motor/generator, synchronous generator, brushless motors (particularly stepping motors).  
 Power supplies and measurement instruments.  
 Principle of operation of common sensors (strain gauges, thermal sensors, and other mechanical sensors).  
 Use of oscilloscopes, multimeters, bench power supplies and waveform generators.  
 Undertaking measurements of voltage, frequency and current in a circuit.

**Teaching and Learning Methods:** Learning materials will be delivered using whole cohort sessions supported by small group tutorials and laboratory sessions.

Concepts and the scope of a topic will be introduced in lectures. These will be supported by directed reading and simulation laboratory based work.

Tutorial exercises will provide students confidence in applying the concepts and analysing and designing simple electrical and electronic circuits. The labs sessions will enhance the understanding of students of real-world applications of the material delivered in the module. The students will learn through applying a variety of analysis methods, mathematical and simulation tools to simple circuits and electromagnetic systems.

### Part 3: Assessment

The assessment is designed to ensure that students have demonstrated practical skills and have developed skills of accurately and concisely recordings taken in laboratory situations and to have demonstrated understanding of underlying principles that determine the behaviour of electrical components. This will ensure that students have the necessary knowledge for modules at higher levels where an understanding of electronic and electrical principles is required.

The module will be assessed using two components.

Knowledge of the properties and characteristic behaviours of electrical components will be consolidated in practical lab sessions and assessed using a laboratory report. (B)

Understanding of underpinning concepts and electrical principles will be assessed by an end of module examination. (A)

The referred assessment will follow the same format as the first sit assessment.

First Sit Components	Final Assessment	Element weighting	Description
Examination (Online) - Component A	✓	50 %	Online Written examination
Laboratory Report - Component B		50 %	Report on selected experiments (1500 words)
Resit Components	Final Assessment	Element weighting	Description
Examination (Online) - Component A	✓	50 %	Online Written examination

## STUDENT AND ACADEMIC SERVICES

Laboratory Report - Component B		50 %	Reflective Individual assignment (based on lab work) submissions (1500 words)
---------------------------------	--	------	---

<b>Part 4: Teaching and Learning Methods</b>																	
Learning Outcomes	<p>On successful completion of this module students will achieve the following learning outcomes:</p> <table border="1"> <thead> <tr> <th style="text-align: left;"><b>Module Learning Outcomes</b></th> <th style="text-align: left;"><b>Reference</b></th> </tr> </thead> <tbody> <tr> <td>Accurately describe the operation of a range of basic electrical/electronic components. (SM1b)</td> <td>MO1</td> </tr> <tr> <td>Provide a detailed explanation the scientific principles of electrical and electromagnetic signals (SM1b)</td> <td>MO2</td> </tr> <tr> <td>Apply relevant scientific principles to the design of electrical and electronic circuits and be able to specify sensor and actuator components to achieve simple design objectives (SM1b, P2, P3)</td> <td>MO3</td> </tr> <tr> <td>Analyse electrical circuits and interpret characteristic behaviour (EA1b, EA2)</td> <td>MO4</td> </tr> </tbody> </table>	<b>Module Learning Outcomes</b>	<b>Reference</b>	Accurately describe the operation of a range of basic electrical/electronic components. (SM1b)	MO1	Provide a detailed explanation the scientific principles of electrical and electromagnetic signals (SM1b)	MO2	Apply relevant scientific principles to the design of electrical and electronic circuits and be able to specify sensor and actuator components to achieve simple design objectives (SM1b, P2, P3)	MO3	Analyse electrical circuits and interpret characteristic behaviour (EA1b, EA2)	MO4						
<b>Module Learning Outcomes</b>	<b>Reference</b>																
Accurately describe the operation of a range of basic electrical/electronic components. (SM1b)	MO1																
Provide a detailed explanation the scientific principles of electrical and electromagnetic signals (SM1b)	MO2																
Apply relevant scientific principles to the design of electrical and electronic circuits and be able to specify sensor and actuator components to achieve simple design objectives (SM1b, P2, P3)	MO3																
Analyse electrical circuits and interpret characteristic behaviour (EA1b, EA2)	MO4																
Contact Hours	<table border="1"> <thead> <tr> <th colspan="2"><b>Independent Study Hours:</b></th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">Independent study/self-guided study</td> <td style="text-align: center;">114</td> </tr> <tr> <td style="text-align: right;"><b>Total Independent Study Hours:</b></td> <td style="text-align: center;">114</td> </tr> <tr> <th colspan="2"><b>Scheduled Learning and Teaching Hours:</b></th> </tr> <tr> <td style="text-align: center;">Face-to-face learning</td> <td style="text-align: center;">36</td> </tr> <tr> <td style="text-align: right;"><b>Total Scheduled Learning and Teaching Hours:</b></td> <td style="text-align: center;">36</td> </tr> <tr> <td><b>Hours to be allocated</b></td> <td style="text-align: center;">150</td> </tr> <tr> <td><b>Allocated Hours</b></td> <td style="text-align: center;">150</td> </tr> </tbody> </table>	<b>Independent Study Hours:</b>		Independent study/self-guided study	114	<b>Total Independent Study Hours:</b>	114	<b>Scheduled Learning and Teaching Hours:</b>		Face-to-face learning	36	<b>Total Scheduled Learning and Teaching Hours:</b>	36	<b>Hours to be allocated</b>	150	<b>Allocated Hours</b>	150
<b>Independent Study Hours:</b>																	
Independent study/self-guided study	114																
<b>Total Independent Study Hours:</b>	114																
<b>Scheduled Learning and Teaching Hours:</b>																	
Face-to-face learning	36																
<b>Total Scheduled Learning and Teaching Hours:</b>	36																
<b>Hours to be allocated</b>	150																
<b>Allocated Hours</b>	150																
Reading List	<p><i>The reading list for this module can be accessed via the following link:</i></p> <p><a href="https://rl.talis.com/3/uwe/lists/527BC48C-A1BE-5CAA-CA83-AA4CD8207BE7.html?lang=en-GB&amp;login=1">https://rl.talis.com/3/uwe/lists/527BC48C-A1BE-5CAA-CA83-AA4CD8207BE7.html?lang=en-GB&amp;login=1</a></p>																

<b>Part 5: Contributes Towards</b>
<p>This module contributes towards the following programmes of study:</p> <p>Mechanical Engineering MEng 2020-21</p>
