	Develop time management skills							
	Develop group working skills							
	 Make ir 	Make individual and group presentations						
	Students will be expected to conduct research with both traditional and electronic sources and will be instructed how to do this during the Programme as a whole and, where necessary, within the module.							
	Lectures: In most cases there is no expectation of preliminary work. Occasionally material may be given out in advance so as to provide the basis for more detailed discussion of topics to be conducted within the lecture. Guest speakers will be utilised where appropriate.							
	Operation and p	ourpose:						
	 Lectures: On all the topics covered, outline learning materials will be supplied to students during or in advance of the lectures. Lectures are generally designed to: (a) Communicate the principal features of a topic; (b) To stimulate interest in the topic an provide alternative views; and (c) To update and to provide other information necessary to facilitate further study. 							
	Workshops: Workshops will involve problem-solving and the analysis and synthesis of conceptual and contextual issues, through plenary discussion, small group discussion and presentations by individual students or groups of students. Extra reading may be provided and multiple choice questions attempted. Students are expected to fully participate in discussions and the other activities of the workshop.

Reading Strategy	There are a wide variety of books available at all levels of difficulty. In the end it is up to you to decide which book suits you best. If you can afford two books, a good combination is one introductory book that tries to explain the most important points and another detailed text (perhaps a casebook) that goes into more detail. The latter can be useful for when you have to write assignments.					
Indicative Reading	Textbooks					
List	Buy one of the following three textbooks:					
	Clements and Abass, <i>Complete Equity and Trusts</i> , Oxford University Press, Oxford, New York. Contains extracts of the main cases with a commentary and specimen questions and answers.					
	OR Hudson, <i>Equity and Trusts</i> , Routledge-Cavendish, Abingdon. A good and detailed book. Difficult concepts are clearly explained. OR					
	Todd and Wilson, <i>Textbook on Trusts</i> , Oxford University Press, Oxford, New York. A good, student-friendly book, but it does not cover some areas of the syllabus.					
	Casebooks					
	If you can afford it a casebook can be very useful. Maudsley and Burn, <i>Trusts and Trustees: Cases and Materials,</i> Oxford University Press, Oxford, New York). A well organised book with well-chosen extracts from the main cases. OR					
	Todd and Watts, <i>Cases and Materials on Equity and Trusts</i> , Oxford University Press, Oxford, New York. A good book with briefer extracts than M & B above.					
	Equity and Trusts is a case heavy subject, so Library databases such as Westlaw and LEXIS should prove very useful.					
	Basic information such as lecture outlines and Powerpoint presentations will be put up on Blackboard Government reports and articles will also be added.					
	Journals					
	Cambridge Law Journal Conveyancer and Property Lawyer					
	Law Quarterly Review					
	Modern Law Review

Assessment Strategy	In the first term students will have to submit a 2000 word written answer on a problem or essay style question. This will enable students to show their knowledge of the subject and their understanding of its concepts. In particular it will enable them to show their mastery of case law technique. Research technique can also be demonstrated and the ability to synthesise the results of that research. Communication skills are also important.
	The second assessment that the students will submit is the online Multiple Choice at the end of term 2. This is designed to test the knowledge and understanding gained in the module and promote an incentive to engage with the lectures and seminars for the whole module. As the test is at the end of the course it also provides an opportunity for students to revise in preparation for the examination. By doing the test online, prompt feedback can be given to the students.
	The examination, in the third term will assess knowledge and understanding of the law of Equity and Trusts, the ability to deal with conceptual problems, what the students have learnt from their research, the ability to apply their knowledge to factual situations, competence in dealing with case law and communication skills under time pressure.
	The workshops will enable formative assessment to take place in the form of multiple choice and short questions and the opportunity to make oral presentations.
	The standard Law Department assessment criteria will apply as taken from our standard assessment feedback template.

	Subject knowledge and understanding. The ability to: Identify the appropriate subject area.
	Grasp the issues relevant to the subject. Be aware of arguments in connection with it. Appreciate what is relevant material and what is not. Explain what the topic is about.
	Analysis and evaluation. The ability to:
	Work out what is important in a problem or question, and what is unimportant.
	Apply your knowledge to a problem or question. Bring together relevant information and materials from a variety of sources.
	Explain that information and those materials and not contradict or repeat yourself. Work out what is the best solution to the problem or best argument for
	your assignment. Explain why you have chosen that solution or argument.
	Communication and Literacy. The ability to:
	Use language appropriate to the task and the audience. Present information or argument clearly, concisely and comprehensively. Understand and use legal terminology correctly. Use correct grammar, punctuation and spelling.
