**Programme code:** B79N12

## **Section 2: Programme Overview, Aims and Learning Outcomes**

### **Part A: Programme Overview, Aims and Learning Outcomes**

**Overview:** The PG Dip Enhanced Clinical Practitioner apprenticeship programme is a multi-professional programme for registered professionals typically working in health and/or social care settings. The programme is modular in approach providing flexibility for the breadth of professionals and roles. The learner will be encouraged to focus on advancing their knowledge and understanding of current issues related to their own field of practice, and the wider context of health and social care.

This apprenticeship programme has been developed to meet the local/regional/national workforce needs. It has been development to meet the Enhanced Clinical Practitioner apprenticeship standard (ST0895 v1.1).

The programme has been created with reference to the NHSE AHP ECP schema (2024) and designed to meet the four pillars of Advanced Practice - Clinical, Research, Leadership & Education.

### **Features of the programme:**

**Educational Aims:** The programme aims to provide practitioners with a flexible route to develop and enhance their academic and practice knowledge and skills.

Critically evaluate practice utilising current evidence based theories and literature.

Understand change, innovation and transformation in health and social care alongside contemporary policy drivers and the current landscape within health and social care systems.

Critically engage in research activity adhering to good research practice guidance, so that evidence based strategies are developed and applied to enhance quality, safety, productivity and service efficiency.

Critically appraise and synthesise the outcomes of relevant research, evaluation and audit, using the results to underpin own practice and to inform that of others.

**Programme Learning Outcomes:**

On successful completion of this programme graduates will achieve the following learning outcomes.

**Programme Learning Outcomes**

- PO1. Demonstrate the ability to apply enhanced clinical knowledge and evidence-based practices to make informed, patient-centred decisions in complex health and social care scenarios.
- PO2. Demonstrate and apply leadership theories and principles to work with multidisciplinary teams effectively, providing high-quality patient care and operational service efficiency.
- PO3. Critically appraise, synthesise, and apply research evidence to inform clinical practice and improve healthcare delivery and address key challenges in clinical practice.
- PO4. Demonstrate an ability to lead on audit and change initiatives in clinical settings, utilising effective communication and collaboration strategies to engage stakeholders.
- PO5. Employ strategic thinking to develop and implement innovative solutions that address emerging challenges in healthcare as well as participating in change initiatives in clinical settings, utilising effective communication and collaboration strategies to engage stakeholders.
- PO6. Demonstrate an ability to participate and engage in initiatives that foster a collaborative culture among health and social care professionals, emphasising shared goals and mutual respect to enhance team-based care and improve patient outcomes.
- PO7. Advocate for patient rights, equity, and access to care, drawing on and utilising an advanced understanding of health systems and policy frameworks.
- PO8. Demonstrate coaching and mentorship skills to provide effective feedback for the development of colleagues and other healthcare professionals, fostering a culture of lifelong learning within the healthcare setting.

**Assessment strategy:** The assessment strategy has been designed to test the programme learning outcomes and enable students to demonstrate the graduate attributes with focus on leadership, clinical competence and use of evidence base to improve health and social care services.

A variety of assessment strategies are employed throughout the programme, such as project reports, quality Improvement proposal and implementation, critical reflection on change management, poster presentations, exams, Clinical OSCEs and research proposal.

**Student support:** The partnership between UWE and health and social care providers will enable students to access support and guidance from a wide range of stakeholders, as well as from their own place of employment.

Ongoing academic and pastoral support will be provided by the wide range of professional services at UWE. The latter includes study skills training through the library, wellbeing and disability support, and access to student advisors, and employability and enterprise advisors.
