## **Section 1: Key Programme Details**

### **Part A: Programme Information**

**Programme title:** Civil Engineering [Frenchay]

**Highest award:** BEng (Hons) Civil Engineering

**Interim award:** BEng Civil Engineering

**Interim award:** DipHE Civil Engineering

**Interim award:** CertHE Civil Engineering

**Awarding institution:** UWE Bristol

**Affiliated institutions:** Not applicable

**Teaching institutions:** UWE Bristol

**Study abroad:** No

**Year abroad:** No

**Sandwich year:** Yes

**Credit recognition:** No

**School responsible for the programme:** CATE School of Architecture and Environment, College of Arts, Technology and Environment

**Contributing schools:** Not applicable

**Professional, statutory or regulatory bodies:**

Joint Board of Moderators

**Apprenticeship:** Not applicable

**Mode of delivery:** Full-time, Part-time, Sandwich

**Entry requirements:** For the current entry requirements see the UWE public website.

**For implementation from:** 01 September 2024

**Programme code:** H29I13

## Section 2: Programme Overview, Aims and Learning Outcomes

### Part A: Programme Overview, Aims and Learning Outcomes

**Overview:** The award is designed and structured to provide an industry recognised, intellectually demanding, engaging and outstanding learning Programme, which equips graduates with enhanced employability as its overall objective, and tools to respond to the Climate Emergency.

**Educational Aims:** On graduation from this Programme, a student will:

- Have knowledge, experience and understanding of engineering science necessary to develop engineering solutions and processes for an effective career in Civil Engineering.
- Through the enhanced experiential team-work, project-based learning Programme, civil engineering graduates will have an enhanced employability at the start of their careers.
- Have gained effective problem-solving skills and experience both within the specialisms of civil engineering and more widely through cross boundary activities within other engineering disciplines.
- Have knowledge, confidence and understanding to effectively contribute to sustainable built environment development and the mitigations and adaptations necessary to respond to the Climate Emergency.
- Have gained the numerical skills appropriate and necessary for a potential international career.
- Have the creative skills and innovative ability to synthesize solutions to complex

real-world problems with a holistic systems approach.

-Be able to reflect critically upon their learning and understanding, as the foundation for continuing professional development and progression to Chartered Engineer.

-Have practiced skills in communicating effectively with other professionals from a variety of disciplines, clients and the public, with understanding and respect for the objectives and values of other stakeholders.

### **Programme Learning Outcomes:**

On successful completion of this programme graduates will achieve the following learning outcomes.

### **Programme Learning Outcomes**

- PO1. Ability to apply critical civil engineering knowledge and theory into practice through practice-led and research-informed learning, demonstrating a comprehensive understanding of appropriate civil engineering laboratory testing and techniques.
- PO2. Apply the engineering principles appropriate to analyse key engineering processes in Civil Engineering infrastructures.
- PO3. Define and investigate a problem considering the impact on the natural and built environment, sustainability, climate emergency and associated ethical issues, health and safety and risk management.
- PO4. Develop creative and innovative design solutions following appropriate standards and codes of practice, embracing global sustainable development goals, cost drivers and functionality throughout the whole life cycle.
- PO5. Model civil engineering systems to be able to specify and assess technical designs to a relevant industry standard.
- PO6. Ability to communicate clearly and coherently using various general and engineering communication processes either as individuals or as members of a team.
- PO7. Reflect on their learning in the contexts of ethics, climate change and broader professional responsibilities, exhibiting an appreciation of complexity and recognition of the value of continuing professional development.

**Part B: Programme Structure****Year 1**

Part-time students must take 75 credits from the modules in Year 1.

Full-time and Sandwich students must take 120 credits from the modules in Year 1.

The programme is designed as a BEng Honours degree allowing students to progress to study at Masters level and hence complete the Educational requirements for Chartered Engineer status.

Students who completed Level 3 in 2023/24 will then transfer onto the new Civil Engineering programme from Level 4 2024/25.

**Year 1 Compulsory Modules (Full-time and Sandwich)**

Full-time and Sandwich students must take 120 credits from the modules in Compulsory Modules (Full-time and Sandwich).

**Part C: Higher Education Achievement Record (HEAR) Synopsis**

This Programme of study requires students to develop a sound intellectual knowledge and understanding of civil engineering science, design and application; enabling creative and innovative synthesis of holistic solutions to complex problems. Alongside these skills students are required to develop effective communication across multiple formats, to technical and non-technical audiences.

**Part D: External Reference Points and Benchmarks**

Set out which reference points and benchmarks have been used in the design of the Programme:

QAA UK Quality Code for HE:

- Framework for higher education qualifications (FHEQ)
- Subject benchmark statements : Subject Engineering 2023

**Part E: Regulations**

Approved to variant University Academic Regulations and Procedures.

The following variant regulation for compensation applies to students on this award which has been accredited by a PSRB that comes under the auspices of Engineering Council UK.

The variant applied to Level 4 September 2023 intake onwards (Note - Compensation applied to all levels not just new students).

- The permitted maximum compensated credit is 30 credits for a Bachelors or Integrated Masters degree and a maximum of 20 credits in a Masters degree.
- The awarding of compensated credit may be considered for an overall module mark in the range 30% to 39%.

No excused credit.
