## **Section 1: Key Programme Details**

### **Part A: Programme Information**

**Programme title:** Urban Planning Practice {Apprenticeship-UWE} [Frenchay]

**Highest award:** CertHE Urban Planning Practice

**Awarding institution:** UWE Bristol

**Teaching institutions:** UWE Bristol

**Study abroad:** No

**Year abroad:** No

**Sandwich year:** No

**Credit recognition:** No

**School responsible for the programme:** CATE School of Architecture and Environment, College of Arts, Technology and Environment

**Professional, statutory or regulatory bodies:** Not applicable

**Apprenticeship:** ST0536

**Modes of delivery:** Full-time

**Entry requirements:** For the current entry requirements see the UWE public website.

**For implementation from:** 01 September 2026

**Programme code:** K40W00

## **Section 2: Programme Overview, Aims and Learning Outcomes**

### **Part A: Programme Overview, Aims and Learning Outcomes**

**Overview:** Today, urban planners have a wide range of responsibilities, from helping to address issues associated with climate change, to ensuring that new development contributes towards the delivery of healthy, sustainable and highly successful communities. While on the one hand, planners have to deliver new homes, facilitate economic development, and ensure the timely delivery of infrastructure, they also have to protect and conserve the best of our built and natural environments.

The programme develops skills and knowledge in urban planning and development through an offer that is underpinned by both theory and practice. The programme outlines the importance, and the necessary tools, of planning for improving the spaces and places in which we live and the health and well-being of society. The course embraces contemporary planning practice and draws from both UK and international case studies.

The Certificate in Urban Planning Practice provides an appropriate bridging qualification for practising planners who wish to pursue a postgraduate programme in planning but do not currently meet the standard requirements for entry. Collectively, the modules of the Certificate provide students / apprentices with a stimulating and high quality academic experience in the field of urban planning that enables relevant knowledge to be developed and specific skills and behaviours to be nurtured. The programme has been developed with reference to the RTPI's statement on Initial Planning Education (2025) and to the knowledge, skills and behaviours of the approved standard for a Chartered Town Planner. The programme combines learning from two pre-existing professionally-accredited programmes in order to blend workplace learning with a university experience that will allow students / apprentices to contextualise, and at times conceptualise, the learning that is being achieved with their employer.

**Features of the programme:** Core Purpose and Responsibilities:

Addresses climate change, community health and sustainability

Balances development (homes, infrastructure, economy) with conservation of built and natural environments

Equips planners to shape successful, inclusive communities

Programme Structure and Learning Approach:

Combines theory and practice for a well-rounded education

Uses UK and international case studies to reflect contemporary planning challenges

Skills and Knowledge Development:

Focuses on improving spaces and places for societal well-being

Develops specific skills and behaviours aligned with professional standards

Encourages conceptual thinking through integration of workplace and academic learning

**Educational Aims:** The programme aims:

To provide a coherent programme of study in the field of urban planning, as informed by research (including that carried out by staff who teach on the programme) and by Faculty scholarship, consultancy, and links with practice

To provide a stimulating, supportive and responsive learning environment which enables students / apprentices to realise their educational potential in a way that will enhance their employment prospects and contribute towards their personal and social development

To provide students / apprentices with a multi-disciplinary and flexible learning experience

To deliver planners who are able to understand what is necessary to design and implement successful plans and projects

To instil in students / apprentices a sense of vision and purpose, enabling creativity and imagination in their application of urban planning, which can be used to create successful, sustainable and healthy environments

### **Programme Learning Outcomes:**

On successful completion of this programme graduates will achieve the following learning outcomes.

### **Programme Learning Outcomes**

- PO1. Planning Theory and Policy: Understand spatial planning across various contexts and development scales.
- PO2. Planning and Related Law: Comprehend the UK statutory land use planning system and regulatory requirements.
- PO3. Political Framework: Recognize the political nature of spatial planning and democratic decision-making structures.
- PO4. Sustainability and Resource Management: Analyse sustainable development and balance social, economic, and environmental objectives.
- PO5. Placemaking and Design: Evaluate principles for creating high-quality places and enhancing the public realm.
- PO6. Stakeholder Engagement: Demonstrate the importance of stakeholder engagement and plan for effective community involvement.
- PO7. Economic Framework: Understand land and property market economics and the rationale for government intervention.
- PO8. Professional Ethics: Uphold ethical behaviour and professional competence standards for Chartered Town Planners.
- PO9. Evidence and Research: Evaluate evidence quality, devise research strategies, and use effective data collection and analysis.
- PO10. Communication and Teamwork: Communicate complex material effectively and work well in teams and autonomously.

**Assessment strategy:** This programme employs an assessment strategy designed to support academic and professional knowledge and skills development.

The programme includes the following assessment formats:

Academic essays to enable students / apprentices to demonstrate academic research, inquiry, reflection, and thoughtful argumentation underpinned by academic robustness.

Presentations to allow demonstration of effective communication skills, inter-personal skills, confidence, professional presentation skills, and controlled assessment consideration of knowledge and understanding

Reports and practice submissions to allow demonstration of professional research, inquiry, reflection, and effective argumentation underpinned by practice robustness.

Portfolio submissions to enable holistic assessment of both practice and professional skills, knowledge and understanding including design/visual skills.

Assessment will include requirements for both independent and group based work, supporting demonstration of personal and professional skills such as self-reliance, negotiation, mediation, advocacy, independent study, inter-personal skills, project management, and presentation skills (written, visual, and oral).

A core concept underpinning the programme is the intention to create graduates with academic and professional knowledge and understanding, but also practice competence and personal/professional skills.

The assessment strategy is key to the enabling of this, with assessments balancing the academic needs of Higher Education study with the ability to require students / apprentices to create practice orientation assessment outputs which demonstrate professional ability and competencies. As noted above, graduates will not only understand their subject and discipline, they will also have the skills and abilities required to work effectively within their chosen industry.

The assessment strategy further requires students / apprentices to demonstrate technological skills and the use of a range of software packages.

The programmatic approach to assessment ensures that across the programme of study the full range of assessment formats are mapped appropriately. Effective support will ensure that this distance learning group are provided with the support required to enable assessment success. Modules will provide opportunities for formative support and guidance and set clear expectations with respect to both formative and summative forms of assessment. Opportunities will be provided for students / apprentices to gain feedback from staff, their employers and, where appropriate, programme peers.

**Student support:** Students / apprentices will be offered a learning experience that blends the use of the Blackboard VLE with an interactive and inclusive classroom experience. The application of both of these will help to create a student community that is clearly identified and supportive, encouraging and inclusive. From the academic perspective, each module team will provide ongoing learner support, in the context of both the assessments and wider learning journey. Central support, including the library, disability support, student advisors, and careers have all developed experience and capacity over recent years with respect to the delivery of Degree Apprenticeships. Academic Personal Tutors will provide a steady reference point through which both academic and personal development questions can be directed through.

Student wellbeing is a priority for UWE and will be at the centre of the programme's values and ethos. As well as the wider support that the University offers through student support services, Academic Personal.

## Part B: Programme Structure

### Year 1

The student must take 60 credits from the modules in Year 1.

#### Year 1 Compulsory Modules

The student must take 60 credits from the modules in Compulsory Modules.

Module Code	Module Title	Credit
UBGMFJ-15-2	Researching the City 2026-27	15
UBLMGN-30-1	Healthy Sustainable Communities 2026-27	30
UBGLX9-15-1	Communities, Neighbourhoods and Participation 2026-27	15

### Year 2

The student must take 60 credits from the modules in Year 2.

#### Year 2 Compulsory Modules

The student must take 60 credits from the modules in Compulsory Modules.

Module Code	Module Title	Credit
UBLLBX-15-3	Spatial Planning Dissertation 2027-28	15
UBL7H-30-3	Planning Global Cities 2027-28	30
UBLBY-15-3	City Lab: Strategic Planning Skills 2027-28	15

## Part C: Higher Education Achievement Record (HEAR) Synopsis

This programme provides students / apprentices with the academic and professional skills, experience and knowledge necessary to progress towards becoming a chartered Town Planner. The programme explores matters pertaining to managing change within the built and natural environment, inclusive of the implications and demands of, and perspectives on, sustainable development. The programme

enables the development of subject specific and transferable skills, including team working, negotiation, data collection and analysis, evidence interrogations, interpersonal skills, presentation and written skills, and the skills associated with professional practice.

#### **Part D: External Reference Points and Benchmarks**

The programme has been designed to respond to the learning outcomes presented via the RTPI's Initial Statement on Planning Education (2025) and the knowledge, skills and behaviours that a Chartered Town Planner is expected to have and demonstrate.

#### **Part E: Regulations**

Approved to University Regulations and Procedures.
