Section 2: Programme Overview, Aims and Learning Outcomes

Part A: Programme Overview, Aims and Learning Outcomes

Overview: The Sociology Undergraduate Programme has been designed to provide an intellectually stimulating and practically relevant learning experience. At Level 4, the Programme is designed to provide students with an introduction to the theoretical, methodological and practical aspects of the discipline with a focus on comparative analysis and contemporary social problems. Level 4 of the programme is also designed to develop critical thinking skills, together with the foundations of personal and professional development. An ILM qualification is embedded in two core Level 4 modules.

At level 5, the programme is focused on the further acquisition of conceptual, theoretical and methodological skills with a focus on social inequality, social diversity and social change. Level 5 of the programme is designed to develop research skills and employability skills amongst students and to support them to reflect on personal development and career goals.

At level 6 the programme is focused on the further acquisition of conceptual, theoretical and methodological skills. Students will apply these skills to specialised areas of sociological enquiry through an independent research project or through a work placement. This is achieved through students taking a project/ placement module alongside a range of specialised option modules.

Features of the programme: Induction Programme for orientation and study skills.

Research-led and research-informed teaching.

Core social science curriculum designed to deliver key skills in critical thinking, employability and research methods and placement opportunities for students.

Detailed student handbooks and module guides.

Extensive specialist library.

On-line learning resources, internet, intranet and email access.

Dedicated office hours for all staff, student email system, trained counsellors for both pastoral and academic support.

Access to Student Experience Coaches and Year 1 Flourish Programme to support transition into university.

Gradation development planning and Personal Academic Tutors.

Specialist equipment, resources, and technical and instructing staff for media production.

A wide range of teaching and learning strategies and a varied range of assessment modes.

Early Assessment to encourage retention and progression.

A strong emphasis on developing analytical and critical skills.

A lively relationship between theory and practice.

Access to academic tutors and student advisors.

Problem-based and Enquiry-Based Approach to Learning.

Access to developmental opportunities such as placements and study abroad years that are recognised within, and contribute to, the programme.

The Sociology team contributes to a wide range of scholarship and professional and knowledge exchange activities which feed into teaching. Many operate within the UWE research centres including the Centre for Health and Clinical Research and the Centre for Appearance Research. Staff are also members of the Social and Public Policy Research Group themes including Identities, Inequalities and Societies;

Justice and Societies; Philosophical Approaches.

Research is integrated into teaching throughout this programme. Sessions are informed by activities of relevant staff research, and the Programme's research strengths are reflected in the design of the curriculum.

Students can engage with research active staff through diverse means which may include, for example, supervision of final year projects, volunteer research placements and support in attendance at relevant undergraduate conferences. Extra-curricular activities organized outside formal teaching sessions support the strengthening of associations between research activity and student learning.

Educational Aims: The educational aims of the programme are as follows:

To produce ready and able graduates. Graduates who are active citizens, making a real contribution to their communities, workplaces and society. Graduates with the skills, knowledge, attitudes and confidence to create, critique, and make a difference to the world beyond university. Graduates who are prepared for lifelong learning, personal and professional development, excellence and success in whatever fields they choose to work and participate. The core curriculum of the programme is designed with this objective in mind.

To provide a general educational experience through which students will acquire a range of cognitive and analytical skills and general transferable skills in relation to critical thinking, research and employability that will provide a foundation for independent sociological research, further graduate studies and career development across a broad range of professions and occupations. Examples of these skills include judging and evaluating evidence, data collection and interpretation, synthesizing information, formulating reasoned arguments.

Engaging students with core research and practice skills pertaining to Sociology academically and in society (e.g. the module, Research, Theory and Practice: Skills for Life and Work).

To foster critical study, collaborative, co-operative and, independent learning. This

aim includes the encouragement of reflexive self-awareness in group oriented and individual research and writing tasks. Reflexive self-awareness is also encouraged regarding the student's development as a competent and thoughtful social researcher and in terms of broader personal and professional development.

To provide a dedicated sociology programme enriched by research, scholarship and knowledge exchange and public engagement undertaken by members of the subject group.

To provide an educational experience that recognizes the importance of digital media and digital technology in the contemporary world and that involves the application and utilization of digital technology to teaching and learning across the programme.

To provide students with the skills that will enable them to develop a practice-oriented approach to sociological enquiry including the ability to apply sociological theories and concepts to 'real world' issues, problems and processes.

To provide an outward facing set of educational opportunities that include the opportunity to engage with and provide support to a range of partners and stakeholders in the Bristol area through placements, partnerships and community-focussed research.

To provide an inclusive programme that acknowledges the wide diversity of student learning styles, experiences and interests through provision of a flexible and varied programme.

Programme Learning Outcomes:

On successful completion of this programme graduates will achieve the following learning outcomes.

Programme Learning Outcomes

- PO1. Explain theories, concepts, and methodologies within sociology and evaluate their application.
- PO2. Identify and evaluate the social structures and processes that underpin continuity and change in a variety of contexts.
- PO3. Describe and evaluate social divisions and inequalities and their impacts on individuals and groups in contemporary, historical and comparative contexts.
- PO4. Identify and assess the value of sociological work in illuminating issues of social and public policy and in relation to current issues and debates.
- PO5. Explain and evaluate, through the use of reasoned argument, the relationships between sociological perspectives and evidence in a range of contexts.
- PO6. Retrieve and synthesize evidence from a range of primary and secondary sources, utilizing problem-solving skills to review and evaluate research findings, strategies and methods.
- PO7. Apply sociological theory, concepts, methods and data to an understanding of UWE's thematic strategic priorities - Climate Action and Sustainability, Health and Wellbeing, and Equality, Diversity and Inclusivity.
- PO8. Appreciate the value of inter-disciplinary investigation of contemporary themes of global relevance, such as: human rights; conflicts and identities of ethnicity, gender, or class; global intimacies and family life; culture and cultural change; and digital and AI technology.
- PO9. Demonstrate a range of communication and interactive skills in a variety of contexts and modes and for different audiences.

PO10. Reflect on and convey accumulated knowledge and skills in relation to academic, personal and professional development.

Assessment strategy: Knowledge and Understanding (subject specific)

Students acquire knowledge and understanding through a variety of teaching and learning methods and strategies. These include: lectures; seminar discussion groups; workshops; learning logs or journals; e-learning; group tutorials including problem-based learning groups; field-based tasks; role-play and simulations; individual and group oral, visual and written presentations; computer workshops; independent library studies (individual and collaborative); and independent

assessment preparation.

Programme Learning Outcomes (PLOs) 1-9 relating to the development of knowledge and understanding are achieved through the compulsory modules at levels 4-6. These compulsory modules look at social theory in an applied context, combining a range of theories/approaches over a wide range of social and historical contexts. These modules are organised around the general theme of Theory, Application and Method.

A range of option modules at level 6 allows students to develop these theoretical approaches, to gain more specialised knowledge of particular contexts, and to experience a range of assessment methods. Knowledge of research methods and strategies are developed through levels 4-6. Students may opt to develop these further. All students either undertake a project, which contains a taught research methods element, or a sociology placement, equivalent to 15-20 days work experience.

Assessment: Modules are assessed through a range of methods including essays, learning logs, critical reflection, seminar presentations, article and book reviews, annotated bibliographies, problem-based-learning tasks; viva; extended essays and projects.

Intellectual Skills (generic)

Programme Learning Outcomes 1-9, relating to the development of intellectual skills, are achieved through compulsory modules at levels 4-6 through methods of assessment and seminar work. Students are made aware of assessment criteria through information in module handbooks, feedback on assessment and through detailed discussion and preparation in seminars.

Assessment: Modules are assessed through a range of methods including essays, learning logs, critical reflection, seminar presentations, article and book reviews, annotated bibliographies, problem-based-learning tasks; viva; extended essays and projects.

Subject/Professional/Practical Skills (subject specific)

PLOs 1-9, relating to subject and practical skills, and PLO 10, relating to professional and practical skills, are developed through compulsory modules at Levels 4-6.

Students gain an intellectual understanding of methodological issues through compulsory modules, especially through seminar discussion and preparation for assessed work. Practical and professional skills derive from seminar preparation, other assessed work such as essays and reviews, and from work informed learning, live briefs and placements. The project/placement module combine all of these skills at a high level. Links between theory, methods and practice are specifically developed in compulsory modules and in the Level 6 project/placement module.

Optional modules allow students the opportunity to develop these skills more fully.

Assessment: Skills are assessed across a range of assessment methods. They are demonstrated at their highest level in the project/placement module, where students must demonstrate both understanding and the ability to apply this understanding in a practical research or work-based context. Compulsory modules allow students to focus explicitly on social and public issues and to connect these to research, theory and practice. This is most explicitly demonstrated in the Level 5 module, Research, Theory and Practice: Skills for Life and Work which connects academic knowledge and skills to work-based experience.

Transferable Skills and other attributes (generic)

The Sociology Programme provides students with a range of transferable skill and attributes in preparation for employment or further study. Digital Learning Technologies are central to the development of these transferable skills and are developed from level 4. Students are introduced to a variety technologies and platforms in the induction process and throughout the programme and have a detailed introduction to library skills. Opportunities to further develop digital skills are available in compulsory modules and all modules make use of the Blackboard Ultra virtual learning environment. Communication skills are developed through assessment methods such as essays, reflections, reviews, seminar presentations

and through seminar work. General student study skills are developed through the level 4 core modules Critical Thinking and Becoming a Social Scientist.

Assessment: The full ranges of assessments across the three levels of the programme contribute positively to the development and enhancement of transferable skills. Additionally, transferable skills are inculcated as students are required to work to strict assessment deadlines and, therefore, to develop skills of organisation, time management and effective use of information.

Student support: Dedicated Academic Personal Tutors (APTs) work with module leaders and year leaders to ensure support is tailored to students' needs at cohort and individual levels. APTs communicate regularly with tutees at group and individual level through email and 1-1 meetings. Module leaders track student attendance and low and non-engaging students are targeted for additional support and signposted to relevant professional services.

The programme team is dedicated to promoting a sense of belonging and cohort identity. A programme of regular social and extra and co-curricular events encourages engagement with staff and fellow students outside of taught sessions. This includes field trips, evening social events, co-curricular study skills support and research led activities, PG study advisory sessions, option module choice events and a range of activities connected to the yearly launch of NSS.

A programme of student rep recruitment ensures effective promotion of the student voice in informing and improving content and delivery of the programme. Year Leaders recruit PAL leaders and students are encouraged to attend PAL sessions. In addition, students are encouraged to make use of the study support outside of the programme, including the RA Fellows' writing support and the UWE Library study skills events and resources.

Throughout the programme students are supported to make connections between academic skills and knowledge and skills for a broad range of graduate careers and occupations. At level 4, an ILM qualification is embedded in two core modules and

students are required to reflect on their skills, personal development needs and career aspirations. Building on this, Level 5 students revisit and reflect on their skills and are supported to find and undertake a short placement as part of the core module Research, Theory and Practice. At Level 6, the core module Sociology Project and Placement incorporates an assessed skills exercise, reflecting on accumulated graduate skills and development needs. The module also provides students with an opportunity to undertake a 15-20 day placement, either with a partner organisation or an employer of their choice.

Year 3 Compulsory Modules Placement Year (Sandwich)

Students enrolled on this programme undertake a work-based placement in their third year between levels 5 and 6 of study. Students would be expected to identify a relevant placement opportunity and to apply with the support of careers, academic staff and where appropriate enterprise support. If successful the student would undertake the placement during their third year and be provided with a visiting tutor. The placement experience and developmental reflection would be captured and assessed as part of the Level 6 Social Sciences Placement Year module UZSY5D15-3. On completion of the placement year students would return to UWE and undertake their final year of degree study.

Part C: Higher Education Achievement Record (HEAR) Synopsis

Sociology is a critical and analytical subject area that focusses on developing an understanding of social institutions, social relations and social inequalities in a contemporary, historical and comparative perspective. Sociology at UWE is also an applied discipline and across the Programme students can apply sociological ideas and concepts to 'real world' situations and everyday experiences. Throughout their degree students will experience a range of learning (online/offline), teaching (lectures, seminars, workshops and TEL) and assessment (essays, exams, case studies, presentations) techniques. Consequentially, a sociology degree opens graduates up to a range of graduate level positions, including work in social work, teaching, public administration, police service, probation service, prison service, personnel management, charities and Third Sector organizations, welfare and community organizations and the business, finance and information sectors.

Part D: External Reference Points and Benchmarks

QAA Benchmarks for Sociology

UWE 2020 Strategy

Subject group research projects and activity

The QAA subject benchmark statements for Sociology have informed the design of the programme from the outset. The benchmarks were consulted during the planning process and at each stage of the design and development of the programme. They have influenced the selection of the educational aims and learning outcomes against which the teaching, learning and assessment processes have been specified.

University teaching and learning policies are embedded in the educational aims and learning outcomes of the programme. The University's commitment to promoting a diverse, integrated and flexible learning experience is reflected in the rich range of teaching, learning and assessment methods and strategies in evidence on the programme.

The research, scholarly and knowledge exchange activities and interests of staff have shaped the wide ranging sociological provision at all levels of the programme. In particular the influence is evidenced by the varied and stimulating choice of option modules at level 6.

Part E: Regulations

Approved to University Regulations and Procedures.
