Section 2: Programme Overview, Aims and Learning Outcomes

Part A: Programme Overview, Aims and Learning Outcomes

Overview: Criminology is a vibrant, multifaceted and multidisciplinary subject. The BSc (Hons) Criminology with Psychology programme at UWE has been designed to provide an intellectually stimulating and relevant learning experience that will produce graduates who are ready and able to realise their full potential, make a positive contribution to their communities, workplaces and society and play their full part in a global society and knowledge economy. The BSc (Hons) Criminology with Psychology is a three year programme, if full time (four year Sandwich, or six year part time). The programme aims to develop in its graduates the skills, knowledge, attitude and confidence to create, critique and make a difference to the world beyond university, and graduates who are prepared for lifelong learning, personal development and success in whatever field they choose to work and participate. The core curriculum of the programme, in particular, is designed with this objective in mind. The programme at UWE is distinctive for supplying students with placement opportunities across the criminal justice field, with research led teaching clearly embedded into the course as well as practitioner/professional based guest lectures.

Educational Aims: The BSc (Hons) Criminology with Psychology programme aims at Level 4 to provide students with a comprehensive introduction to the core disciplines of Criminology and Psychology, whereas at Levels 5 and 6 the programme is designed to help students develop an in-depth and detailed understanding of Criminology with additional, appropriate, Psychology content. The Criminology with Psychology programme aims to highlight how multi-disciplinary (i.e. incorporating sociology, psychology, media studies, and social policy) and applied (i.e. the impact that criminology has on criminal justice policy, practice and discourse) the subject area is and therefore how it directly links to employment opportunities.

In particular the programme aims to:

Provide a foundation in criminological knowledge that is relevant to a career in the criminal justice system.

Develop an understanding of the relationships between criminological theory and its application to a range of experience and behaviour – including of offenders, victims, and agents of criminal justice.

Clearly demonstrate how Criminology and Psychology apply to and interact with the real world, through a series of teaching innovations (TEL) and practical/practice based initiatives (placements, work based learning and invited speakers).

Impart a broad range of skills, discipline specific, cognitive and general transferable skills, which provide the student with a sound basis for further study.

Present multiple perspectives in criminology in a way that fosters critical comparison and evaluation.

Provide for students a generally enriching and interesting educational environment and experience; promote critical, creative and analytical thinking; and assist students to realise their potential.

Acknowledge and accommodate the wide diversity of student needs and interests through the provision of a flexible programme, which enables students to choose between a variety of modules, and which fosters their individual development.

Encourage scholarship and foster the virtues of objectivity, reflection, judgement, critical study, and independent learning (individual and collaborative).

Provide a general foundation for the world of work by equipping students with the broad range of skills, understanding and knowledge employed in a wide range of vocations.

Programme Learning Outcomes:

On successful completion of this programme graduates will achieve the following learning outcomes.

Part C: Higher Education Achievement Record (HEAR) Synopsis

The Criminology with Psychology degree is designed to promote a contemporary, multi-faceted and applied approach to the study of Criminology with Psychology. Criminology focuses on definitions and understandings of crime as well as criminal justice from a range of perspectives (victims, offenders, the state, and institutions). Criminology, especially the criminology taught at UWE, focuses on theoretical learning as well as the application of this knowledge to real world situations. Students will learn transferable skills throughout their degree and will experience a range of learning (online/offline), teaching (lectures, seminars, workshops and TEL) and assessment (essays, exams, case studies, presentations) techniques. Consequentially, a Criminology with Psychology degree opens graduates up to a range of graduate level opportunities in the criminal justice system and related charitable sectors.

Part D: External Reference Points and Benchmarks

The QAA subject benchmark statements for Criminology, as well as the Psychology Benchmarks, have informed the design of the programme from the outset. The benchmarks, and the external examiner, were consulted during the planning process and at each stage of the design and development of the programme. They have influenced the selection of the educational aims and learning outcomes against which the teaching, learning and assessment processes have been specified.

The UWE Bristol Strategy 2020 are is embedded in the educational aims and learning outcomes of the programme. The University's commitment to promoting a diverse, integrated and flexible learning experience is reflected in the rich range of teaching, learning and assessment methods and strategies in evidence on the programme.

The research, scholarly and knowledge exchange activities and interests of staff have shaped the wide ranging sociological provision at all levels of the programme. In particular the influence is evidenced by the varied and stimulating choice of option modules at levels 5 and 6.
