

Part 2: Educational Aims of the Programme

The BA (Hons) Criminology and Sociology (with Foundation Year) combined honours is a four year (or a five year, with placement) programme. The programme aims to provide students with a comprehensive introduction to the related disciplines of Criminology and Sociology. The BA (Hons) Criminology and Sociology allows students to combine on an equal basis two subjects, offering a sound perspective on both subjects, with a good choice of option modules highlighting how these two disciplines interact. The BA (Hons) Criminology and Sociology programme has been designed to provide an intellectually stimulating and practically relevant learning experience.

The BA (Hons) Criminology and Sociology programme has the option to be entered via a thematically organised introduction to Social Sciences foundation year. At Level 0, the Programme aims to provide students with a grounding in social science academic and research skills and with a foundation in social, political, criminological and psychological concepts, theories and tools as they pertain to the disciplines of Criminology and Sociology. At Level 1, the Programme is designed to provide students with an introduction to the theoretical, methodological and practical aspects of the disciplines, with a particular focus on sociological and criminological theory, and the criminal justice system. Level 1 of the programme is also designed to develop critical thinking skills amongst students.

At Levels 2 and 3, the programme is designed to allow students to choose to major in criminology or sociology and to step off this programme onto the related Major/Minor combination, or to continue to study both subjects as a 50-50 option.

At Level 2, the joint honours programme is focused on the further acquisition of conceptual, theoretical and methodological skills with a particular focus on social inequality, social diversity and the police and prison systems. Level 2 of the programme is designed to develop research and employability skills amongst students. At Level 3 the programme is focused on the further acquisition of conceptual, theoretical and methodological skills and the application of these skills to specialised areas of criminological and sociological enquiry. This will be achieved through students taking a project or a placement module alongside a module on critical criminology and a range of other specialised option modules in criminology and sociology.

In particular the programme aims to:

- Introduce students to the multidisciplinary nature of Criminology and Sociology as defined as part of a wider Social Science framework (the foundation year).
- Offer a foundational pathway at Level 0 as part of the University's widening participation strategy.
- Produce ready and able graduates. Graduates who are active citizens, making a real contribution to their communities, workplaces and society. Graduates with the skills, knowledge, attitude and confidence to create, critique, and make a difference to the world beyond university. Graduates who are prepared for lifelong learning, personal-development, excellence and success in whatever fields they choose to work and participate. The core curriculum of the programme, in particular, is designed with this objective in mind.
- Provide a general educational experience through which students will acquire a range of cognitive and analytical skills and general transferable skills in relation to critical thinking, research and employability that will provide a foundation for independent sociological research, further graduate studies and career development across a broad range of professions and occupations. Examples of these skills include judging and evaluating evidence, data collection and interpretation, synthesizing information and formulating reasoned arguments.
- Foster critical study, collaborative, co-operative and, independent learning. This aim includes the encouragement of reflexive self-awareness in group oriented and individual

Part 2: Educational Aims of the Programme

research and writing tasks. Reflexive self-awareness is also encouraged in regard to the student's development as a competent and thoughtful social researcher.

- Provide a programme enriched by research, scholarship and knowledge exchange and public engagement undertaken by members of the subject-groups.
- Provide an educational experience that recognizes the importance of digital media and digital technology in the contemporary world and that involves the application and utilization of digital technology to teaching and learning across the programme.
- Provide students with the skills that will enable them to develop a practice-oriented approach to criminological and sociological enquiry including the ability to apply criminological and sociological theories and concepts to 'real world' issues, problems and processes.
- Provide an outward facing set of educational opportunities that include the opportunity to engage with and provide support to a range of partners and stakeholders in the Bristol area through placements, partnerships and community-focused research.
- Provide an inclusive programme that acknowledges the wide diversity of student learning styles, experiences and interests through the provision of a flexible and varied programme.

Programme requirements for the purposes of the Higher Education Achievement Record (HEAR)

Criminology and **Sociology** are contemporary, multi-faceted and applied subject areas. **Criminology** focuses on the social construction of crime and on criminal justice policy from a range of perspectives (victims, offenders, the state and institutions). **Sociology** focuses on understanding social institutions, social relations and social inequalities in a contemporary, historical and comparative perspective. At UWE, throughout their degree students will experience a range of learning (online/offline), teaching (lectures, seminars, workshops and TEL) and assessment (essays, exams, reflective assignments, case studies, presentations) techniques. A criminology and sociology degree opens graduates up to a range of graduate level positions, including in the criminal justice system, social work, teaching, public administration, personnel management, the Third Sector, and the business, finance and information sectors.

Part 3: Learning Outcomes of the Programme

The award route provides opportunities for students to develop and demonstrate knowledge and understanding, qualities, skills and other attributes in Criminology and Sociology. The learning outcomes from these modules and the ways in which the modules reflect the learning outcomes can be found in full in the programme specifications for BA (Hons) Criminology and BA (Hons) Sociology. The BA (Hons) Criminology and Sociology (with Foundation Year) programme offers a range of learning opportunities designed to enable students to demonstrate the following outcomes:

Part 4: Student Learning and Student Support

Teaching and learning strategies to enable learning outcomes to be achieved and demonstrated

At UWE, Bristol there is a policy for a minimum average requirement of 12hours/week contact time over the course of the full undergraduate programme. This contact time encompasses a range of face to face activities as described below. In addition a range of other learning activities will be embedded within the programme which, together with the contact time, will enable learning outcomes to be achieved and demonstrated.

On the Criminology and Sociology programme teaching is a mix of scheduled, independent and placement learning. For the BA (Hons) Criminology and Sociology (with Foundation Year) this will include:

Scheduled learning includes lectures, seminars, tutorials, project supervision, practical classes, workshops, and work based learning. Scheduled sessions may vary slightly depending on the module choices made.

Independent learning includes hours engaged with essential reading, case study preparation, assignment preparation and completion etc. These sessions constitute an average time per level as indicated in the table below. Scheduled sessions may vary slightly depending on the module choices made.

Placement learning: may include a practice placement, other placement, and year abroad.

Additional Study Opportunities

a. Year 2 Study Abroad Exchange

Students enrolled on this programme may be provided with the opportunity to access study abroad opportunities (typically, but not exclusively, via the Erasmus scheme) during year 2 as a direct replacement for their UWE study. Students on such exchange schemes will do so for either 1 or 2 semester(s) and will be expected to undertake learning relevant to their programme of study at UWE and to an equivalent level and credit value. Students will be required to agree their study abroad programme in advance with their programme leader which should be equivalent to at least 120 UWE credits (60 ECTS) for a full year exchange, or 60 UWE credits (30 ECTS) for a single semester exchange. Students are expected to study and pass the agreed modules (course/units) and to provide evidence of the achieved credit on their return to the UK. Any student failing to achieve the full credit amount while on exchange will be provided with the opportunity to make up credit through Independent study (to a maximum of 15 credits), or to undertake further study at level 2 at UWE if the shortfall is greater than 15 credits or advisable for the student's progress. Study abroad credit is recognised as pass/fail and therefore marks achieved through study abroad do not contribute to degree classification

b. Placement Year: Study Abroad

Students enrolled on this programme may be provided with the opportunity to study abroad in their third year between levels 2 and 3 of study. Students would be expected to undertake a relevant programme of learning agreed with their programme leader in advance. However, as this would not be directly replacing UWE modules and credit, the student would be able to expand their study beyond their immediate degree discipline. The study experience and developmental reflection would be captured and assessed as part of the Level 3 Social Sciences Placement Year module UZSY5D-15-3. On completion of the placement year students would return to UWE and undertake their final year of degree study.

Part 4: Student Learning and Student Support

c. Placement Year: Work-based placement (Employer-based or Entrepreneurial)

Students enrolled on this programme may be provided with the opportunity to undertake a work-based placement in their third year between levels 2 and 3 of study. Students would be expected to identify a relevant placement opportunity and to apply with the support of careers, academic staff and where appropriate enterprise support. If successful the student would undertake the placement during their third year and be provided with a visiting tutor. The placement experience and developmental reflection would be captured and assessed as part of the Level 3 Social Sciences Placement Year module UZSY5D-15-3. On completion of the placement year students would return to UWE and undertake their final year of degree study.

TEL: The use of TEL is an integral feature at all levels of study in each module on the program. MyUWE and Blackboard, the university supported learning portal and virtual learning environment, will be used to support students' learning, conduct activities, organise and communicate learning materials. Students will be able to engage with the material, other students and members of staff through these systems and make use of the various functionalities built into them (e.g., blogs, journals, audio, video, discussion boards, wikis, etc.) as appropriate and useful. In addition, students and tutors will be able to utilise TEL (e.g. Collaborate, Lync and Skype) to, where appropriate and useful, facilitate remote contact and thus increase flexibility and accessibility for students. Some modules will also potentially offer both generic and discipline-specific online content. Existing university resources will be utilised such as The Research Observatory (<http://ro.uwe.ac.uk/>) where appropriate. Learning technologies such as e-portfolios might also be exploited to potentially support students e.g. while on placement and to facilitate students' development and assessment of a portfolio of work.

Description of any Distinctive Features

- The programme offers entry via a Social Sciences interdisciplinary foundation year.
- An Induction Programme for incoming Level 0 students to support orientation and study skills.
- Academic Personal Tutors across all years of the programme.
- Student support mentors, graduate interns and PALs across all years of the programme.
- A core social science curriculum designed to deliver key skills in critical thinking, employability and research methods, with placement opportunities for all students
- Extensive specialist library as well as access to interrelated libraries with relevant material.
- On-line learning resources (Blackboard, library resources etc), internet, intranet and email access.
- Dedicated office hours for all staff.
- Professionally trained support staff equipped to aid students with issues related to both academic progression and personal development.
- Early Assessment in Year 0 and 1 modules to encourage retention and progression.
- A strong emphasis on developing analytical and critical skills.
- Graduation development planning.
- Access to developmental opportunities such as placements and study abroad years that are recognized within, and contribute to, the programme.
- Faculty study skills advisors who offer drop in sessions and individual support.
- The Criminology and Sociology teams contribute to a wide range of scholarship and professional activities which feed into teaching activities. Many operate within the Faculty's Research Centers.

Part 4: Student Learning and Student Support

- Research is integrated into teaching throughout this programme. Sessions are informed by activities of relevant staff research, and the departmental research strengths are reflected in the design of the curriculum.
- Students are able to engage with research active staff through diverse means which may include, for example, supervision of final year projects, volunteer research placements and support in attendance at relevant undergraduate conferences. Extra-curriculum activities organised outside formal teaching sessions support the strengthening of associations between departmental research activity and student learning.

Part 5: Assessment

Approved to [University Regulations and Procedures](#)

Assessment Strategy

Assessment strategy to enable the learning outcomes to be achieved and demonstrated:

A range of assessment methods are employed to monitor student attainment of the full range of Learning Outcomes. Assessment incorporates the Department's assessment strategy and The QAA Code of Practice on Assessment of Students. The principles, procedures and processes of assessment for each module are described in each module handbook, which is provided to each student (online) at the start of the module. All 30 credit modules will have assessments spread across the academic year whereas the optional 15 credit modules will typically have semester based delivery as well as assessments.

Effective learning is achieved by employing a range of assessment approaches across the suite of modules that recognize differential approaches to learning. The development of a flexible, inclusive and accessible curriculum ensures a high quality learning experience for all students. These assessments include:

- Essays
- Literature reviews
- Annotated bibliographies
- Web-based assignments
- Reflective journals and exercises
- Portfolios
- Oral, written and visual presentations
- Observational Reports
- Book reviews
- Tasks undertaken under examination conditions (closed or open-book)

Assessments are not intended simply to 'objectify' or measure student understanding, but also to facilitate student knowledge and understanding. Written coursework assignments are designed to ensure that students critically explore and evaluate key issues and ideas ('deep' rather than 'surface' learning), and opportunity is provided for them to negotiate their own written assignments in accordance with their own interests.

Part 5: Assessment

The foundation year assessments build skills native to Criminology and Sociology as part of a wider Social Sciences programme and tests knowledge retention appropriate to the Foundational Level. Students become progressively independent and reflective as they move through ascending levels of the programme.

Teamwork is monitored and evaluated especially by means of group presentations.

Self-management and self-motivation is required through the enforcement of deadlines for all coursework assessments, and in the independence required to manage self-selected essay and project assignments.

Quality Processes: The methods used to evaluate and improve the quality and standards of learning throughout the academic year include student feedback measures (student representatives, module feedback questionnaires and focus groups), standard university monitoring methods, reviews and consultation with external stakeholders and external examiners, and a series of strategic management meetings throughout the year to synthesize programme data/feedback and formulate/review action plans.

Part 7: Entry Requirements

For entry to the BA Criminology and Sociology (with Foundation Year) programme, students should have 48 UCAS tariff points.

For further details on entry requirements as of year and point of entry see UWE website: <http://courses.uwe.ac.uk/ML93/>

Part 8: Reference Points and Benchmarks

The QAA subject benchmark statements for Criminology and Sociology have informed the design of the BA (Hons) Criminology and Sociology (with Foundation Year) programme. The benchmarks were consulted during the planning process and at each stage of the design and development of the programme. They have influenced the selection of the educational aims and learning outcomes against which the teaching, learning and assessment processes have been specified.

The UWE Bristol Strategy 2020 policies is embedded in the educational aims and learning outcomes of the programme. The University's commitment to promoting a diverse, integrated and flexible learning experience is reflected in the rich range of teaching, learning and

Part 8: Reference Points and Benchmarks

assessment methods and strategies in evidence on the programme. The BA (Hons) Criminology and Sociology (with Foundation Year) programme is practice-oriented and applied in orientation and aims to deliver an outstanding learning opportunity supported by advanced digital technologies. The BA (Hons) Criminology and Sociology (with Foundation Year) programme aims to produce graduates ready and able to realise their full potential, make a positive contribution to society and their chosen field of employment or further study, and play their full part in the development of a sustainable global society and knowledge economy.

The research, scholarly and knowledge exchange activities and interests of staff have shaped the wide ranging criminological and sociological provision at all levels of the programme. In particular the influence is evidenced by the varied and stimulating choice of option modules at level 3. Feedback from student surveys and feedback from student representatives in a variety of deliberative fora have contributed to the design of the programme and this is reflected in the assessment, delivery and content of modules. Through consultation with careers and related services, the BA (Hons) Criminology and Sociology programme has been designed to incorporate key skills and attributes identified by employers. Further opportunities to develop engagement with employers are pursued through growing networks established through core features of the curriculum; notably work-based and community learning activities aimed at developing students' transferable skills, professionalism, self-confidence, civic leadership, and other attributes described under our core educational aims.

Part 5a: Assessment

Assessment Strategy

Assessment strategy to enable the learning outcomes to be achieved and demonstrated:

A range of assessment methods are employed to monitor student attainment of the full range of Learning Outcomes. Assessment incorporates the Department's assessment strategy and The QAA Code of Practice on Assessment of Students. The principles, procedures and processes of assessment for each module are described in each module handbook, which is provided to each student (online) at the start of the module. All 30 credit modules will have assessments spread across the academic year whereas the optional 15 credit modules will typically have semester based delivery as well as assessments.

Effective learning is achieved by employing a range of assessment approaches across the suite of modules that recognize differential approaches to learning. The development of a flexible, inclusive and accessible curriculum ensures a high quality learning experience for all students. These assessments include:

- Essays
- Literature reviews

Part 5a: Assessment

- Annotated bibliographies
- Web-based assignments
- Reflective journals and exercises
- Portfolios
- Oral, written and visual presentations
- Observational Reports
- Book reviews
- Tasks undertaken under examination conditions (closed or open-book)

Assessments are not intended simply to 'objectify' or measure student understanding, but also to facilitate student knowledge and understanding. Written coursework assignments are designed to ensure that students critically explore and evaluate key issues and ideas ('deep' rather than 'surface' learning), and opportunity is provided for them to negotiate their own written assignments in accordance with their own interests.

The foundation year assessments build skills native to Criminology and Sociology as part of a wider Social Sciences programme and tests knowledge retention appropriate to the Foundational Level. Students become progressively independent and reflective as they move through ascending levels of the programme.

Teamwork is monitored and evaluated especially by means of group presentations.

Self-management and self-motivation is required through the enforcement of deadlines for all coursework assessments, and in the independence required to manage self-selected essay and project assignments.

Quality Processes: The methods used to evaluate and improve the quality and standards of learning throughout the academic year include student feedback measures (student representatives, module feedback questionnaires and focus groups), standard university monitoring methods, reviews and consultation with external stakeholders and external examiners, and a series of strategic management meetings throughout the year to synthesize programme data/feedback and formulate/review action plans.

Assessment Map

The programme encompasses a range of **assessment methods** including essays, posters, presentations, written examinations. These are detailed in the following assessment map:

Part 5a: Assessment

Assessment Strategy

Assessment strategy to enable the learning outcomes to be achieved and demonstrated:

A range of assessment methods are employed to monitor student attainment of the full range of Learning Outcomes. Assessment incorporates the Department's assessment strategy and The QAA Code of Practice on Assessment of Students. The principles, procedures and processes of assessment for each module are described in each module handbook, which is provided to each student (online) at the start of the module. All 30 credit modules will have assessments spread across the academic year whereas the optional 15 credit modules will typically have semester based delivery as well as assessments.

Effective learning is achieved by employing a range of assessment approaches across the suite of modules that recognize differential approaches to learning. The development of a flexible, inclusive and accessible curriculum ensures a high quality learning experience for all students. These assessments include:

- Essays
- Literature reviews
- Annotated bibliographies
- Web-based assignments
- Reflective journals and exercises
- Portfolios
- Oral, written and visual presentations
- Observational Reports
- Book reviews
- Tasks undertaken under examination conditions (closed or open-book)

Assessments are not intended simply to 'objectify' or measure student understanding, but also to facilitate student knowledge and understanding. Written coursework assignments are designed to ensure that students critically explore and evaluate key issues and ideas ('deep' rather than 'surface' learning), and opportunity is provided for them to negotiate their own written assignments in accordance with their own interests.

The foundation year assessments build skills native to Sociology and Criminology as part of a wider Social Sciences programme and tests knowledge retention appropriate to the Foundational Level. Students become progressively independent and reflective as they move through ascending levels of the programme.

Teamwork is monitored and evaluated especially by means of group presentations.
