Section 1: Key Programme Details

Part A: Programme Information

Programme title: Business Computing {Foundation} [Frenchay]

Highest award: BSc (Hons) Business Computing

Interim award: BSc Business Computing

Interim award: DipHE Business Computing

Interim award: CertHE Business Computing

Awarding institution: UWE Bristol

Affiliated institutions: Not applicable

Teaching institutions: UWE Bristol

Study abroad: No

Year abroad: No

Sandwich year: Yes

Credit recognition: No

Department responsible for the programme: FET Dept of Computer Sci & Creative Tech, Faculty of Environment & Technology

Contributing departments: Not applicable

Professional, statutory or regulatory bodies: Not applicable

Apprenticeship: Not applicable

Mode of delivery: Full-time, Sandwich

Entry requirements: For the current entry requirements see the UWE public website.

For implementation from: 01 September 2021

Programme code: N11A00

Section 2: Programme Overview, Aims and Learning Outcomes

Part A: Programme Overview, Aims and Learning Outcomes

Overview: This programme requires students to develop abilities in business skills, computer science and data analytics in order to fulfill the emerging roles in the field of data analytics within organisations. Data production is quickly outpacing organisations' abilities to benefit from it to generate intelligence and insight. Students are therefore expected to develop proficiency in identifying and specifying data analytics projects, gathering/organizing/linking data, designing user interaction, undertaking data analysis, develop information systems to gain business insight and finally communicating results to stakeholders. It provides a solid foundation for lifelong learning, emphasizing the development of knowledge, skills and professional values.

Educational Aims: The BSc Business Computing programming has the following general aims:

To produce graduates with a balance of domain knowledge, a practical awareness of coding, tools and data extraction and transformation.

To provide students with a broad background of business operations, procedures and culture applicable to a career in an IT environment

To inculcate in students problem-solving and other transferable skills that will be valuable to them in any career

To develop students' knowledge and practical skills to select and employ appropriate techniques and methods for understanding and developing information systems in business contexts

To continue the development of those general study skills that will enable students to

become independent, lifelong learners

The BSc Business Computing programming has the following specific aims:

To provide a coherent and broad based coverage of the theory of data analytics and its application to practical problems

To provide insight into the range of business areas and specific domains where analytics may be applied to available data in order to further organizational goals;

To develop both personal and inter-personal skills to enable students to work closely and communicate with others

To provide students with a set of problem-solving, modeling and analytics skills appropriate to IT related business systems development and operations

The ability to work in an analytic role within cross-disciplinary teams.

To encourage students to uphold professional, ethical and social standards and to keep up to date with recent technological and theoretical developments

The use of real datasets, case studies and industry challenges to ensure the currency and relevance of material provided and to help contextualize course content.

Programme Learning Outcomes:

On successful completion of this programme graduates will achieve the following learning outcomes.

Knowledge and Understanding

- A1. The function of different business units and the value of intelligence to business efficiency and strategy
- A2. Business organization, operations, finance, human resource management and strategic issues and the relationship to Information Systems.

- A4. The value of data to businesses, consumers and the economy as a whole, and the major mechanisms through which value is created from data
- A5. Selection and application of statistical methods and statistical inference
- A6. Application and evaluation of machine learning and text mining techniques
- A7. Theoretical and contemporary issues surrounding business in general and business analytics in particular
- A8. Knowledge and understanding of investigative techniques in business analytics
- A9. Ethical, legal and professional issues in data-related work
- A10. Programming language concepts; syntax and semantics; top-down development; programming to satisfy designs
- A11. Relational databases; logical and physical database design; database query languages' data schemas
- A12. Being professional in a technical environment

Intellectual Skills

- B1. Problem formulation and problem solving
- B2. Analysis and Critical Thinking
- B3. Synthesis of different types of information
- B4. Evaluation
- B5. Balance conflicting objective
- B6. Ability to make decision In a variety of context

Subject/Professional Practice Skills

- C1. Use of data analysis tools and libraries for data retrieval, manipulation, storage and transformation
- C2. Employ a range of tools and notations to support the activities listed above; e.g. editors, compilers, design workbenches, HTML, CGI, Java etc
- C3. Analyse problems and develop solutions using leading ideas and techniques

- C4. Model business systems and solutions using standard tools and techniques
- C5. Apply descriptive, predictive, and prescriptive analytics techniques on structured, semi-structured and unstructured data to extract patterns, forecast trends, run what-if scenarios, and determine the optimal course of action
- C6. Model and design procedures, data structures, information systems
- C7. Visualisation and communication of results

Transferable Skills and other attributes

- D1. Team working
- D2. Interdisciplinary working
- D3. Communication skills
- D4. Progression to independent learning
- D5. Comprehension of professional literature; to read and use literature sources appropriate to the discipline to support learning activities

Part B: Programme Structure

Year 1

Full-time and Sandwich students must take 120 credits from the modules in Year 1.

Year 1 Compulsory Modules (Full-time and Sandwich)

Full-time and Sandwich students must take 120 credits from the modules in Compulsory Modules (Full-time and Sandwich).

Module Code	Module Title	Credit
UFCFQN-30-0	Computational Thinking and Practice 2022-23	30
UFCFRN-30-0	Creative Technology Studies 2022-23	30
UFCFPN-30-0	Information Practitioner Foundations 2022-23	30
UFCFTN-30-0	Web Foundations 2022-23	30

Year 2

Full-time and Sandwich students must take 120 credits from the modules in Year 2.

Year 2 Compulsory Modules (Full-time and Sandwich)

Full-time and Sandwich students must take 120 credits from the modules in Compulsory Modules (Full-time and Sandwich).

Module Code	Module Title	Credit
UFCFP3-30-1	Business Applications 2023-24	30
UFCFR3-30-1	Information Technology 2023-24	30
UFCF83-30-1	IT Practice: Skills, Models and Methods 2023-24	30
UMAD4U-15-1	Understanding Business and Financial Information (Business, International and Management) 2023-24	15
UMODDP-15-1	Understanding Organisations and People (Marketing, Events and Tourism) 2023-24	15

Year 3

Full-time and Sandwich students must take 120 credits from the modules in Year 3.

Year 3 Compulsory Modules (Full-time and Sandwich)

Full-time and Sandwich students must take 90 credits from the modules in Compulsory Modules (Full-time and Sandwich).

Module Code	Module Title	Credit
UFCFV4-30-2	Data, Schemas and Applications 2024-25	30
UFCFKM-30-2	Foundation of Business Analytics 2024-25	30
UFCFN6-30-2	IT Practice: Collaborative Project 2024-25	30

Year 3 Optional Modules (Full-time and Sandwich)

Full-time and Sandwich students must take 30 credits from the modules in Optional Modules (Full-time and Sandwich).

Module Code	Module Title	Credit
UFCFX3-15-3	Advanced Topics in Web Development I 2024-25	15
UMKDQD-15-2	Marketing Planning and Practice 2024-25	15
UFCFB6-30-2	Object-Oriented Systems Development 2024-25	30
UFCFG6-30-2	Project Management 2024-25	30
UFCFD5-15-3	Technical Writing and Editing 2024-25	15

Year 4

Full-time students must take 120 credits from the modules in Year 4.

Sandwich students who take a placement year or a year abroad will take one of the following modules: Professional Experience (UFCFE6-15-3) or International Experience (UFCFWJ-15-3)

Year 4 Compulsory Modules (Full-time)

Full-time students must take 75 credits from Compulsory Modules (Full-time).

Module Code	Module Title	Credit
UFCFMM-30-3	Business Intelligence and Data Mining 2025-26	30
UFCFB5-15-3	Ethical and Professional Issues in Computing and Digital Media 2025-26	15
UFCFRB-15-3	Security Management in Practice 2025-26	15
UFCFLM-15-3	Sustainable Business and Computing 2025- 26	15

Year 4 Compulsory Modules Choice (Full-time)

Full-time students must take 30 credits from the modules in Compulsory Modules Choice (Full-time).

Module Code	Module Title	Credit
--------------------	---------------------	---------------

UFCFM5-30-3	Information Systems Dissertation 2025-26	30
UFCFFF-30-3	Software Development Project 2025-26	30

Year 4 Compulsory Modules Choice (Sandwich)

Sandwich students must take 15 credits from the modules in Compulsory Modules Choice (Sandwich).

Module Code	Module Title	Credit
UFCFWJ-15-3	International Experience 2025-26	15
UFCFE6-15-3	Professional Experience 2025-26	15

Year 4 Optional Modules (Full-time)

Full-time students must take 15 credits from the modules in Optional Modules (Full-time).

Module Code	Module Title	Credit
UMKDMQ-15-3	Digital Marketing Communication 2025-26	15
UFCF95-15-3	Entrepreneurial Skills 2025-26	15
UFCFVJ-15-3	Professional Development 2025-26	15
UFCFM6-15-3	Requirements Engineering 2025-26	15

Year 5

Sandwich students must take 105 credits from the modules in Year 5.

Year 5 Compulsory Modules (Sandwich)

Sandwich students must take 75 credits from Compulsory Modules (Sandwich).

Module Code	Module Title	Credit
UFCFMM-30-3	Business Intelligence and Data Mining 2026-27	30
UFCFB5-15-3	Ethical and Professional Issues in Computing and Digital Media 2026-27	15

UFCFRB-15-3	Security Management in Practice 2026-27	15
UFCFLM-15-3	Sustainable Business and Computing 2026-27	15

Year 5 Compulsory Modules Choice (Sandwich)

Sandwich students must take 30 credits from the modules in Compulsory Module Choice (Sandwich).

Module Code	Module Title	Credit
UFCFM5-30-3	Information Systems Dissertation 2026-27	30
UFCFFF-30-3	Software Development Project 2026-27	30

Part C: Higher Education Achievement Record (HEAR) Synopsis

This programme requires students to develop abilities in business skills, computer science and data analytics in order to fulfill the emerging roles in the field of data analytics within organisations. Data production is quickly outpacing organisations' abilities to benefit from it to generate intelligence and insight. Students are therefore expected to develop proficiency in identifying and specifying data analytics projects, gathering/organizing/linking data, designing user interaction, undertaking data analysis, develop information systems to gain business insight and finally communicating results to stakeholders. It provides a solid foundation for lifelong learning, emphasizing the development of knowledge, skills and professional values.

Part D: External Reference Points and Benchmarks

The following reference points and benchmarks have been used in the in the design of the programme:

The Subject Benchmarking Statements for the computing field (<http://www.qaa.ac.uk/en/Publications/Documents/SBS-Computing-16.pdf>) was consulted in designing this programme. The skills recommended for computing students cover three broad categories: computing-related cognitive skills, computing-related practical skills and generic

skills for employability. The design of the programme has ensured that the skills specified for each category (and relevant to this programme) is incorporated within existing or new modules for the programme.

Additionally, the Subject Benchmarking Statements for the Business and Management field (<http://www.qaa.ac.uk/en/Publications/Documents/SBS-business-management-15.pdf>) was also consulted with the aim of incorporating knowledge and understanding of some of the areas recommended for business students as well as some of the key practical skills relevant for this programme.

QAA UK Quality Code for HE

Framework for higher education qualifications (FHEQ)

Subject benchmark statements

Strategy 2020

University policies

The programme includes the level 6 Ethics and Professional Issues module and the Individual Project, making it a candidate for BCS accreditation.

Part E: Regulations

Approved to University Regulations and Procedures.
