Section 2: Programme Overview, Aims and Learning Outcomes

Part A: Programme Overview, Aims and Learning Outcomes

Overview: The BA (Hons) Business Management with Accounting & Finance at Tianfu offers students a current and integrated business education covering the main disciplines and operational areas of business as well as the development of knowledge, skills and attributes relevant to an accounting and finance specialism. The curriculum aims to challenge students in their ways of thinking, behaving, learning, and issues of ethics & ethical decision making, sustainability and global citizenship are embedded throughout.

As a practice-focused programme, students engage with authentic learning, teaching and assessment approaches throughout the year. This final year programme consists of real-world practice modules including a capstone module which draws together learning into practice with direct emphasis on student centred practice-led activity which is CV enhancing and “real world”.

Features of the programme:

The BA(Hons) Business Management with Accounting and Finance (top up) is driven by the needs of organisations, with an emphasis on skills development and is for students who want the flexibility to discover new areas.

Students will learn about a range of organisational functions from enthusiastic, research-active experts and supportive tutors. Students gain real-world experience through access to guest speakers, case studies, competitions and online simulations, ensuring you graduate ready for work.

This one year programme has the following distinctive features:

Transferable enterprise employability skills: The programme focuses on developing a diversified skill set, including technical competencies, digital literacy, critical thinking, ethical values, and communication skills. This approach aims to produce graduates who are work-ready and able to succeed and flourish.

Practice-Led & engaged with industry: Grounded in a practice-led approach, the curriculum integrates cutting-edge research, ethics, and sustainability. This provides students with practical insights. Engaging closely with employers, entrepreneurs, and

professional bodies as relevant, students are encouraged to explore diverse applications of acquired skills. Integrated activities, such as fieldwork, pitches and industry guest lectures, enrich the learning experience and offer networking opportunities.

Digital Capability: Technology literacy will be essential for future business leaders to thrive and the programme recognizes the importance of digital literacy and integrates this into teaching students to use a range of digital tools effectively. Whilst the changes in this area are rapid, emerging technologies (ET) including Artificial intelligence (AI) are transforming modern business. As Business educators, we embed critical thinking and practical application that motivates learners to embrace new technologies and understand how they will be applied in future enterprises.

Commitment to Sustainability: Through immersive real-world case studies, students are prompted to appreciate and explore their role in fostering a sustainable future, fostering a mindset of responsibility and stewardship.

Interdisciplinary Approach: This programme is the result of a fusion between the expertise of Business Management and Accounting and Finance. It aims to cultivate managers who can think strategically, taking into account various dimensions and approaching problems from diverse angles and perspectives.

Professional Practice development: A distinctive feature of the programme is the academic and professional development stream, which cuts across the programme and is embedded as a core module throughout the year. This stream supports students' developmental journey, offering learners group mentor support and providing the structure to allow students to develop a compelling narrative of their degree journey to present to potential employers.

Educational Aims: The overarching aim of the University's Learning and Teaching Strategy is that "our students will enjoy a personalised, inclusive and transformative experience that empowers them to be engaged, committed and passionate learners who thrive in our university environment and achieve their best".

The BA Business Management with Accounting and finance (top up) actively seeks to provide personalised experiences for all learners, grounding student learning in the business environment and context wherever appropriate through engagement with professionals and authentic assessments that afford students' opportunities to test out concepts in practice and reflect on their own experience of organisations.

Student achievement is supported by a clear professional practice and personal development strand of transferable skills and entrepreneurial mindsets over the year that facilitates the transition into, through, and beyond the programme, and which underpins enterprise, employability, and lifelong learning.

Educational Aims:

1. Provide students with high quality learning and teaching experiences that are practice-led, and sustain a culture of student-centred learning, incorporating current research to ensure learning is research-informed
2. Provide students with an in-depth knowledge and critical understanding of the changing external environment, organisations and management of profit and not for profit businesses;
3. Develop students' independent thinking and informed understanding of critical contemporary business and accounting and finance issues and theoretical debates to work with academic theory in practice;
4. Develop students' analytical and enquiring approaches to the analysis of business problems so that considered and appropriate conclusions are drawn – which can be communicated effectively and appropriately.
5. Develop students' collaborative skills, strong sense of self and life-long learning skills, including ethical, personal, and social responsibility as global citizens.
6. Prepare students with the enterprise and employability skills and attributes

necessary to plan effectively for their chosen future and be able to undertake appropriate personal development for a career in business, management, accounting and finance and/ or further study.

Programme Learning Outcomes:

On successful completion of this programme graduates will achieve the following learning outcomes.

Programme Learning Outcomes

- PO1. Demonstrate a systematic understanding of global business environments and how key functional areas, particularly accounting and finance, interrelate to influence organisational performance.
- PO2. Ability to apply a conceptual understanding to devise, sustain and critically analyse arguments. Effectively solving problems with a critical appreciation of context, ambiguity, and uncertainty.
- PO3. Apply digital tools, teamwork, and financial analysis skills while communicating effectively with diverse audiences.
- PO4. Demonstrate self-awareness informing the learners' ongoing personal and professional development, alongside a reflective understanding of how the knowledge and skills developed throughout the programme can enhance their entrepreneurial thinking, practice, and employability.
- PO5. Demonstrate a critical understanding of the learners' role and social responsibilities as global citizens, and the sustainable development goals and activities of managers and organisations in society.

Assessment strategy: The programme is designed to maximise employability by developing technical competencies and professional skills essential for real-world success. Emphasising practical application, students engage in authentic assessments, case studies, and projects that foster problem-solving and decision-making skills. Professional attributes such as communication, teamwork, and leadership are cultivated through group work, presentations, and professional reports. Inclusive principles underpin assessment design, ensuring accessibility for all learners. Continuous formative feedback and early intervention support personalised learning. This holistic approach equips graduates with adaptability, technical expertise, and professional acumen for a dynamic business environment.

Assessments are designed programmatically so as to facilitate a progression from relevant L5 entry qualifications through to level 6 top up year of study:

Level 6 (evaluating and creating), a systematic understanding of a complex body of knowledge, some of it at the current boundaries of the academic discipline, with the ability to critically apply and evaluate arguments and assumptions appreciating uncertainty and the limits of knowledge.

Opportunities to demonstrate achievement of the learning outcomes are provided through the following assessment methods which are assessed against publicised marking criteria:

1. Regular formative assessment is used to monitor students' progress and provide feedback about knowledge and understanding gained and development of skills and attributes, providing an opportunity for identifying and rectifying students potential challenges, as well as contributing to summative assessment in some instances.
2. Presentations and Posters (individual and collaborative) are formally and informally assessed for content and process in modules. In addition to assessing the students' analytical skills and relevant theoretical understanding, these provide opportunities to assess students' oral communication skills and prepare them for presentation processes common in business environments, These include opportunities for peer review assessment, where group members can allocate marks to reflect each group member's contribution when working collaboratively. This also provides an opportunity for personal reflection.
3. Written assignments, projects, case study's, reports, and set exercises. These are expected to be well written and presented and are used to assess the students' development of key skills; as well as theoretical knowledge and critical understanding. They provide opportunities for in depth focus on specific business related issue.
4. Academic and Professional practice portfolio of evidence demonstrates that

students have developed the required professional skills and attributes for a career in business. Students will also reflect and comment on their own learning and personal development.

5. Formal examinations are used very occasionally and only if they are the most appropriate assessment approach for assessing students' theoretical understanding and critical abilities, and manage time effectively. The University has systems in place to ensure that examining procedures are moderated and regulated.

6. In line with inclusionary learning and teaching principles the programme provides alternative assessment proposals where students with logistical or other difficulties can elect to submit in an alternative format. This relates primarily to presentations/ vivas and in these instances students will be offered a choice of face to face, online or recorded where possible. With regard to group work this will be encouraged in many modules, collaborative working is assessed summatively in the academic and professional development module where group activities are undertaken and group mentor support is provided.

Student support: Tianfu College provides a well-structured and supportive environment designed to help students succeed academically, socially, and personally.

Across its campuses in Mianyang, Chengdu and Deyang, the university offers modern teaching and learning facilities, including more than 500 multimedia classrooms, extensive laboratory spaces, and dedicated buildings for practical and applied learning.

These resources ensure that students have access to contemporary technology and well-equipped learning environments.

The university maintains a large, well-resourced library containing over one million printed books and a similarly extensive collection of electronic resources. This supports independent study, research activity and academic development across a wide range of disciplines.

Student life is supported through a variety of sports, recreation, and campus living facilities, including modern sports complexes, open recreational spaces and well-maintained accommodation. Student housing is described as high-quality, with reliable amenities and comfortable living conditions that contribute to a positive residential experience.

Tianfu College also fosters a vibrant campus community through student organisations, activities, and events, encouraging engagement, leadership development and cultural participation. The university's emphasis on safe campus standards and strong administrative support ensures that students have access to guidance, welfare services and a secure learning environment.

Overall, Tianfu College provides a comprehensive network of academic, residential and extracurricular support designed to enable student success.

Part B: Programme Structure

Year 1

Students must take 120 credits from the modules in Year 1.
