Placement or Study Year Abroad (SYA)

For the award of the sandwich title (SW) students must choose one of the following options both of which aim to enable students to contextualise their academic learning in an applied business and/or cultural context:

1. Work Placement: a significant period of paid employment or self-employment normally in the field relevant to the specialism of the degree.

During this time students must complete and pass the 15 credit level 3 module, Learning, Enquiry and Development on Placement UMCD9X-15-3. This module assesses the student's personal development, from the experience of placement and their ability to identify issues relevant to their Placement's organisational context and to then frame, scale and position a critical work-based enquiry relevant to the specialism of the degree.

2. Study Year Abroad, which consists of two semesters of study at a partner institution abroad.

During this time students must complete and pass the 15 credit level 3 module, Learning and Development on Study Year Abroad (UMCD9Y-15-3). This modules assesses assess the student's personal development from the experience of SYA and their ability to evidence cross-cultural awareness and analysis of the country in which they have been studying.

In addition, whilst at the partner institution students must have studied and attempted assessments in modules totalling 60 ECTS, of which 50-55 ECTS should

be in modules related to their programme of study at UWE with a further 5-10 ECTS in the language of the host country. If the advent of failing any modules students must be able to demonstrate engagement i.e. that they have attended classes and sat the exams.

To be eligible for either Placement or SYA students must have passed a minimum of 210 credits

Part 7: Student Learning

Teaching, learning and assessment strategies to enable learning outcomes to be achieved and demonstrated

At UWE, Bristol there is a policy for a minimum average requirement of 12 hours/week contact time over the course of the full undergraduate programme. This contact time encompasses a range of face-to-face activities as described below. In addition a range of other learning activities will be embedded within the programme which, together with the contact time, will enable learning outcomes to be achieved and demonstrated.

On the BA (Hons) Marketing programme teaching is a mix of scheduled, independent and placement learning:

Scheduled learning includes lectures, seminars/workshops, 'lectorials' (a mix of lecture and seminar), 'webinars' (synchronous online seminars) group project supervision and individual supervision, some of which may also be facilitated in an online environment. Scheduled sessions may vary slightly depending on the module choices made.

Independent learning includes hours engaged with essential reading, preparation for classes, reviewing lecture content, case study preparation, assignment preparation and completion, exam revision etc. Scheduled sessions may vary slightly depending on the module choices made.

Placement learning For students on the sandwich programme this is either:

- **Placement option** – a significant period of paid employment or self-employment. A typical placement lasts for 40 weeks or more, although shorter periods in employment may also be possible subject to meeting the academic requirements of the placement module.
- **Study Year Abroad option** - Two semesters of study at a partner institution abroad

Description of Distinctive Features and Support

The overarching aim of the Faculty's Learning Teaching & Assessment Strategy is 'to maximise student achievement (both in relation to award classification and to employability) and student satisfaction whilst maintaining appropriately rigorous academic standards and supporting the university's vision of becoming an inclusive and welcoming learning community, actively engaged with global society and based on values of mutual respect, critical engagement and self-awareness'.

The supporting objectives of the strategy are the:

- further development of intellectually vibrant, highly reflective, mutually respectful and diverse

Part 7: Student Learning

student and staff learning communities within the Faculty

- increase in the use of links with the world external to UWE (including professional accreditation where possible) to inform curriculum design and delivery and provide lifelong learning opportunities
- provision of an effective, efficient and supportive infrastructure for learning (organisation and management of programmes, student advice, communication with students etc)
- appropriate design and flexible delivery of curricula which provide an intellectually stimulating learning experience enabling students to develop as highly employable and internationally aware lifelong learners
- provision of effective support for students making the transition to learning at UWE
- provision of effective and ongoing developmental support for all staff
- use of effective strategies for assessment for learning

Curriculum Design Content & Organization

The programme is delivered within the Business School Undergraduate Scheme, which allows credit accumulation and flexibility in the student learning process.

The Scheme is structured on the basis of 15 and 30 credit semesterised modules. Each semester consists of a 12 week teaching block following by a period of assessment. In each semester students study one 30 credit module and two 15 credit modules. Students therefore study 60 credits (3 modules) each semester and 120 credits per level (6 modules in total).

The programme is organised within and between each of the three levels, where it is designed to provide a coherent set of modules at each level and to allow students to develop and progress through each level; in relation to knowledge and understanding, cognitive, subject-specific and study skills.

The programme utilizes a Level One that is common with the majority of the programmes of the Undergraduate Scheme, this allows students the maximum flexibility to transfer in or out of this programme and to pursue the course of study that is most appropriate to their emergent subject and/or professional interests.

1. Level One provides students with a general business foundation to enable them to develop the skills and underpinning disciplinary areas for subsequent levels of study.
2. Level Two is structured around the key functional areas of business with a strong focus on the marketing function and provides a strong grounding in the essential principles and practice of marketing. Students also develop research skills that link to the Level 3 Project.
3. Level Three has been designed to integrate the academic knowledge gained in the first two levels of study to enable students to gain a deep understanding of the inter-disciplinary nature of business and also to allow them to focus on marketing topics that are of universal importance. Integration is in part achieved through the choice of Level 3 project, which range from a more traditional dissertation project in the Critical Business Enquiry Project; to an applied Work-based Enquiry Project (based on Placement or concurrent work experience); to a new business launch or creating a business case project in the Enterprise Project. In addition students have a choice of six optional modules, which focus on specific areas of interest, pervasive and contemporary issues, including Interactive & Digital Marketing, Social Marketing and Global Marketing. These optional modules allow level three students to develop a deep understanding of the areas of business in which they have a specialist interest.

Teaching, Learning & Assessment

The teaching, learning and assessment strategy of the Faculty encourages students to assume responsibility for many aspects of their learning and staff to take responsibility for facilitating that learning. The balance of student and staff responsibility varies according to individual student profiles, academic level and according to the nature of the learning outcomes the students are expected to meet. Ultimately, the aim of this programme is to enable students to progress to a high level of autonomy in their learning and to view that learning as an ongoing process over which they have some control, about which they are able to make active choices, and which they are free to challenge.

Part 7: Student Learning

To achieve this, an appropriate blend of learning approaches and opportunities have been integrated throughout the programme with an overall emphasis on active student participation. The Faculty 'blend' consists of face to face learning in large and small groups (lectures and seminars/ workshops) supported by on-line learning Blackboard, together with exposure to real life examples through case studies, occasional organisational visits and guest practitioner speakers. There is a significant requirement for students to work independently throughout the programme – both individually and in groups - with the level of this independence increasing as the student moves from level one to level three.

Included within the programme is a clear personal development strand of transferable skills and “brain habits” of the sort which facilitate the transition into HE and underpin employability and lifelong learning. These Personal and Academic Literacies – study, research, and employability skills – are developed at all levels of the programme through the 30 credit modules as follows:

	Personal and Professional (Employability) Strand	Enquiry Strand (Research & Academic Skills development)
Level 1	Meeting the Management Challenge	Engaging with Critical Business Enquiry
Level 2	Consumer Behaviour and Professional Practice	Methods of Enquiry
Level 3	Contemporary Issues in Marketing	Work-based Enquiry Project or Critical Business Enquiry Project or Enterprise Project

Whilst the 30 credit modules provide the focus for the development of skills, subject specific, professional and transferable skills are further developed throughout the programme and in more depth in identified modules i.e. analytical and interpretive skills (*Integrating Marketing Communications*), numeric and problem-solving skills (*Financial Aspects for Marketing, Events and Tourism*), self-reflective capabilities (*Principles and Practice of Marketing*) and presentation skills (*Principles and Practice of Marketing*).

The teaching and learning methods used in the programme intend to challenge the existing perspectives of the students and encourage creative thinking. Thus many of the approaches used, including those that are case based, set concepts and problems in a wide range of contexts to add depth and complexity and to ensure an applied focus.

Teaching is based on research literature, professional experience and significant use of debate and discussion. Through didactic pedagogy students are challenged to defend their thinking. A final Level project allows students to explore a substantial issue utilising appropriate concepts, frameworks and methodologies in a highly independent manner. A final Level Three capstone module requires students to integrate learning from the total programme and to reflect on how this prepares them for a future in complex and changing organisations.

All sandwich students will undertake a work placement of a minimum of 40 weeks normally in an area of a business related to the specialism of the degree and this provides a rich process in which student can make links between theory and practice, reassess themselves and confront the challenges of carrying out a role in a new organisation whilst knowing that they will have the opportunity to be supported if there is a problem and that they will be returning to the programme for a further period of reflection and learning after the placement is completed.

In addition to Placements there are opportunities for Study Year Abroad in a number of partner institutions who are able to offer relevant Business courses in English. Students are allocated to these places through a competitive process.

During Placement or Study Year Abroad students complete one 15 credit Level 3 module (*Learning, Enquiry & Development on Placement* or *Learning & Development on Study Year Abroad*).

Part 7: Student Learning

Assessment is an integral part of the teaching and learning process. Students are exposed to a variety of assessment methods that test their ability to integrate theory and practice and which promote the growth of their life-long learning skills. Assessment feedback helps students to ascertain their learning strengths and weaknesses and continuing development needs.

Assessments are designed to facilitate a progression through differing levels of complexity at each level of study:

- At level 1, a sound knowledge of the basic concepts of a subject.
- At level 2, a sound understanding of the principles of the field of study and the ability to apply these principles more widely.
- At level 3, an understanding of a complex body of knowledge, some of it at the current boundaries of the academic discipline.

The faculty supports the University's current Academic Regulations and Procedures, and its requirement for controlled conditions to apply to part of the assessment of every module. Forms of assessment commonly used in controlled and non-controlled conditions assessment are: invigilated timed assignments including examinations, presentations, in-class tests, self and peer assessments, individual and group projects and supervised mini-projects, dissertations, personal development portfolios and employer and self-assessment of the placement.

Learning Resources

All modules make use of Blackboard for web enhanced delivery to at least the recommended minimum standard and for communications with students. All modules have teaching/learning resource booklets and most have set texts in accordance with the university's Reading Strategy. Additional support is provided through the library and an extensive student computing network.

Students are directed towards the University Library online MySkills resource for the development of skills appropriate to the level and style of each module. Students will be directed on how the resources on this site should be used to develop the skills that will underpin their studies in module handbooks and/or via Blackboard.

Additional support is provided through the library by means of information skills sessions embedded at module level and self-directed online tutorials. There is also an extensive programme of regular workshops including referencing management, database searching and finding journal articles. The library offers zoned space from silent to group study and student bookable rooms. There is excellent access to electronic databases on campus through the extensive student computing network and wifi. Most databases are also available off campus and supported by the online library enquiry service.

Student Support & Guidance

Student support for all issues relating to the content, delivery and assessment of modules is provided by Module Leaders, and for more general academic and professional concerns, by Programme Managers.

At each level students are supported by Academic Personal Tutors, an academic member of staff who will have access to information on the performance and profile of the student, allowing them to effectively support students' personal and academic development. This is an academic role and where students have problems of a personal nature they are to be referred as appropriate to UWE Student Services Student Advisors and to UWE Careers regarding employability issues. In addition, students can seek support from the Faculty's Academic Support Centre, an initiative intended to support the learning of all students within the faculty by offering one-to-one appointments to discuss individual learning issues and workshops covering a range of topics relevant to learning.

These Student Services Student Advisors provide timely, accurate and confidential advice where necessary on all aspects of the provision, for example coursework and examination arrangements, extenuating circumstances procedures, progression counselling, as well as personal issues such as

Part 7: Student Learning

problems with studying or meeting deadlines, financial matters, ill health and so on, including when relevant how to access the wider support provided by the University. This service is supported by extensive online resources.

The UWE Careers Placement Support Team provides extensive support for students in preparation for their placement period and acts as a recruitment service for employers.

Students and graduates are also supported by UWE Careers who help them to access skills, experience and knowledge to improve their employability prospects. The service provides high quality and professional advice and guidance focusing on enabling them to take control of and responsibility for their own career planning and progression/development. They can access support around finding vacancies for work experience, volunteering, part time work and internships, as well as events and workshops. UWE Careers provides recruiter facing services including advertising graduate job vacancies, work experience and volunteering opportunities, and running both undergraduate and graduate internship schemes. There are also part time jobs advertised by the Student Union Jobshop. There is specialist support for international students including specific resources developed for a range of countries where students are recruited from. Students are introduced to the service during the induction to the course and are encouraged to use the service all through their undergraduate programme and for three years after graduation.

All students take part in an Induction programme at the start of their studies. Separate induction events are arranged for students who arrive as direct entrants at levels 2 & 3.

All new students are provided with a short Student Handbook to help them through their first weeks at university and to act a guide to the complex information environment in which they now find themselves. Together with the student portal myUWE, the university's [Essential Student Information](#) web pages provide support and the more detailed and up to date information to students.

An important part of the programme is the involvement of students. Two or three student representatives are elected to serve on the Student Representatives & Staff Forum meetings that are held each term to discuss issues raised by students in relation to their experience of studying at UWE and on the programme. The meetings are arranged by cluster group and are chaired by programme managers. The aim of the meetings is to discuss issues raised by students in an open and friendly atmosphere so that students feel able to contribute openly and honestly about their experiences. Any issues raised are taken forward by programme managers. Where appropriate they may be discussed at Departmental Committees or Faculty Academic Standards and Quality Committee.

Support to students with disability is coordinated centrally through Disability Services. This acts as a holistic service for disabled students and applicants to the University but also supports the academic and administrative staff who work with disabled students.

In addition to the above The University's Student Services offers a range of services to support students during their time at university and beyond:

University Health Centre and general advice on Staying Healthy;
Careers and employability, advice on choosing a career, and finding student and graduate vacancies;
UWE volunteering, opportunities for students to get involved in the local community through the Community Volunteer Programme;
Student Advisors & Counselling for anything from exam stress to homesickness and depression;
The Living Centre, for support with faith and spiritual matters;
Global student support, to help international students to make the most of living and studying in the UK;
Managing disability and dyslexia, to get help with all disability related support needs;
Money and Visas, for financial check-ups, or help with UK visas.

Part 8: Reference Points and Benchmarks

The following reference points and benchmarks have been used in the design of the programme:

The learning outcomes of the programme map against both the QAA subject benchmark statement for General Business & Management and the following University and Faculty strategies and policies:

University strategies and policies

- University's Vision & Mission – I.N.S.P.I.R.E.
- University Strategic Plan
- UWE Charter

Faculty strategies and policies:

- Blended Learning Framework
- Curriculum Principles
- Employability Strategy
- Faculty of Business and Law LTA Strategy

Staff research projects

- Where ever possible staff are encouraged to utilize their research – and that of colleagues – to inform their teaching, both in terms of content and pedagogic approach

Employer interaction and feedback

- Employers and alumni are regularly consulted to ensure the currency and relevance of the programme

This specification provides a concise summary of the main features of the programme and the learning outcomes that a typical student might reasonably be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of individual modules can be found in module specifications, available on the University's website.
