Section 2: Programme Overview, Aims and Learning Outcomes

Part A: Programme Overview, Aims and Learning Outcomes

Overview: The BA(Hons) Business and Events Management programme at UWE offers students a current and integrated education covering the main disciplines and operational areas of business, with a specific focus on the knowledge and skills required for a career in events management. The curriculum aims to challenge students in their ways of thinking, learning and behaving, and issues of ethics and ethical decision-making, sustainability and global citizenship are embedded throughout. The programme actively seeks input from the external environment through, for example, guest speakers and assessments that require students to test out concepts in practice and to reflect on their own experience of organisations. In addition, all students are encouraged by the curriculum to actively pursue work experience (e.g. via placement, internship or volunteering). Student achievement is supported by a clear personal development strand of transferable skills and 'brain habits' over all three levels, which facilitate the transition into Higher Education and underpin employability and lifelong learning.

Features of the programme: The overarching aim of the Faculty's Learning Teaching and Assessment (LTA) Strategy is 'to maximise student achievement (both in relation to award classification and to employability) and student satisfaction whilst maintaining appropriately rigorous academic standards and supporting the university's vision of becoming an inclusive and welcoming learning community, actively engaged with global society and based on values of mutual respect, critical engagement and self-awareness'.

The supporting objectives of the strategy are the:

Further development of intellectually vibrant, highly reflective, mutually respectful and diverse student and staff learning communities within the Faculty;

Increase in the use of links with the world external to UWE (including professional accreditation where possible) to inform curriculum design and delivery and provide lifelong learning opportunities;

Provision of an effective, efficient and supportive infrastructure for learning (organisation and management of programmes, student advice, communication with students etc);

Appropriate design and flexible delivery of curricula which provide an intellectually stimulating learning experience enabling students to develop as highly employable and internationally aware lifelong learners;

Provision of effective support for students making the transition to learning at UWE;

Provision of effective and ongoing developmental support for all staff; and

Use of effective strategies for assessment for learning.

Specifically, the programme builds on the University's established teaching and research expertise in tourism and events studies/management, and links with event organisations and venues in Southwest England, thus offering considerable potential for research-informed and experiential learning.

Educational Aims: The programme aims to enable students to:

Acquire a critical understanding of (event) organisations, their management and the changing external environment in which they operate, and of events as an area of academic and applied study, event planning and management, event attendees and clients, and events policy and strategy;

Be equipped with the employability attributes and skills necessary for career in business or events management (including self-employment);

Develop an analytical and enquiring approach in the analysis of business problems so that considered and appropriate conclusions are drawn, which can be communicated effectively in a variety of forms;

Have an informed understanding of critical contemporary issues and theoretical

debates, including ethics and ethical decision-making, sustainability and global citizenship;

Work with academic theory in practice; and

Develop a strong sense of self and the lifelong learning skills to make an ongoing contribution to society at large.

All students will be required to take one of a group of modules at level three which have a particular emphasis on the development of graduate attributes embedded in experiential activity which is CV enhancing and “real world”, engaging students beyond the campus.

Assessment strategy: Assessment is an integral part of the teaching and learning process. Students are exposed to a variety of assessment methods that test their ability to integrate theory and practice and which promote the growth of their lifelong learning skills. Assessment feedback helps students to ascertain their learning strengths and weaknesses and continuing development needs.

Assessments are designed to facilitate a progression through differing levels of complexity at each level of study:

At Level 1, a sound knowledge of the basic concepts of a subject.

At Level 2, a sound understanding of the principles of the field of study and the ability to apply these principles more widely.

At Level 3, an understanding of a complex body of knowledge, some of it at the current boundaries of the academic discipline.

The Faculty supports the University's current Academic Regulations and Procedures, and its requirement for controlled conditions to apply to part of the assessment of every module. Forms of assessment commonly used under controlled and non-controlled conditions are: invigilated timed assignments, including examinations; presentations; in-class tests; self and peer assessments; individual and group projects, and supervised mini-projects; dissertations; personal development portfolios; and employer and self-assessments of the placement.

All modules use a range of learning approaches including lectures, seminars, workshops, group work, case studies and exercises. Throughout, the learner is encouraged to undertake independent reading both to supplement and consolidate what is being taught/learnt and to broaden their individual knowledge and understanding of the subject.

Assessment of transferable skills is accomplished through a range of methods which include written individual and group coursework, peer assessment, employer assessment, self-assessment, tests, presentations, examinations and dissertations.

Student support: Learning Resources:

All modules make use of Blackboard for web-enhanced delivery, to at least the recommended minimum standard, and for communications with students. All modules have teaching/learning resource booklets, and most have set texts in accordance with the University's Reading Strategy. Additional support is provided through the library and an extensive student computing network.

Students are directed towards the University online Study Skills resources for the development of skills appropriate to the level and style of each module. Students will be directed on how the resources on this site should be used to develop the skills that will underpin their studies, in module handbooks and/or via Blackboard.

Student learning is fully supported by UWE Library Services through extensive print and electronic resources and a variety of learning spaces. Additional support is provided through the library by means of information and academic skills sessions and self-directed online tutorials available via the University Study Skills website, supported by the online library enquiry service. There is excellent access to electronic resources both on and off campus, facilitated by the extensive student computing network and Wi-Fi.

Student Support and Guidance:

Student support for all issues relating to the content, delivery and assessment of modules is provided by Module Leaders and, for more general academic and professional concerns, by Programme Managers. In addition, students can seek support from a Faculty Learning Support tutor to address specific study skills issues.

At each level students are supported by Personal Academic Tutors, where the role is primarily about being a first point of contact with concern for their well-being and progress. The aim is to help students in the achievement of their academic and employability goals. This is an academic role, and where students have problems of a personal nature they are to be referred as appropriate to UWE Student Services' Student Advisors and to UWE Careers regarding employability issues.

These Student Advisors provide timely, accurate and confidential advice where necessary on all aspects of the provision, for example coursework and examination arrangements, extenuating circumstances procedures, progression counseling, personal issues such as problems with studying or meeting deadlines, financial matters, ill health and so on (including, where relevant, how to access the wider support provided by the University). This service is supported by extensive online resources.

UWE careers acts as a recruitment service for employers.

Students and graduates are also supported by UWE Careers who help them to access skills, experience and knowledge to improve their employability prospects. The service provides high quality and professional advice and guidance focusing on enabling them to take control of and responsibility for their own career planning and progression/development. They can access support around finding vacancies for work experience, volunteering, part time work and internships, as well as events and workshops. UWE Careers provides recruiter-facing services including advertising graduate job vacancies, work experience and volunteering opportunities, and running both undergraduate and graduate internship schemes. There are also part time jobs advertised by the Student Union Jobshop. There is specialist support for international students including specific resources developed for a range of countries

where students are recruited from. Students are introduced to the service at the start of the course and are encouraged to use the service throughout their undergraduate programme, and for three years after graduation.

All students take part in an Induction programme at the start of their studies, supported by an online social networking site. Separate induction events are arranged for students who arrive as direct entrants at Levels Two or Three (e.g. international, Erasmus and UWE Federation students).

All new students are provided with a short Student Handbook to help them through their first weeks at university, and to act a guide to the complex information environment in which they now find themselves. The Faculty 'Current Student' web pages provide access to the more detailed and up-to-date information covering all aspects of academic and administrative procedures and support. These pages link closely to the student portal, myUWE and to the Student Services web pages, and act as a comprehensive 'faculty handbook'.

An important part of the programme is the involvement of students in matters relating to the student experience. Two or three student representatives are selected from each level of the programme to serve on the Student Representatives and Staff Forum (SRSF). These are held each term to discuss issues raised by students in relation to their experience of studying at UWE and on the programme. Issues raised are discussed in an inclusive and friendly atmosphere so that students feel able to contribute openly and honestly about their experiences. Any issues raised are taken forward for action by Programme Managers. Where appropriate, they may be discussed at Departmental Committees or Faculty Academic Standards and Quality Committee.

Support to students with disabilities is offered both at the faculty level under the remit of the Leader of WP, Disability and Schools Liaison, and centrally through the University's Disability Resource Centre. This acts as a holistic service for disabled students and applicants to the University, but also supports the academic and administrative staff who work with disabled students.

In addition to the above, UWE Student Services offers a range of services to support students during their time at university and beyond, including:

The University Health Centre, and general advice on 'Staying Healthy';

Careers and employability – advice on choosing a career, and finding student and graduate vacancies;

UWE volunteering – opportunities for students to get involved in the local community through the Community Volunteer Programme;

Student Advisors and Counseling, for anything from exam stress to homesickness and depression;

The Living Centre, for support with faith and spiritual matters;

Global student support, to help international students to make the most of living and studying in the UK;

Managing disability and dyslexia, to get help with all disability-related support needs; and

Money and visas, for financial checkups or help with UK visa requirements.

Part C: Higher Education Achievement Record (HEAR) Synopsis

Graduates will have studied various business disciplines, as well as event contexts, events planning and management, pervasive issues and project work (involving the staging and evaluation of a live event). In addition, they will have undertaken portfolio work, simulation games, site visits and (nonresidential) field trips, and possibly a placement or study year abroad and additional professional qualifications (e.g. CIM, ILM). They will be in possession of intellectual and transferable skills, the sum of which makes them suitable for a range of graduate employment positions, and subject, professional and practical skills that make them ideal for employment in the events industry (or the tourism industries more generally).

Part D: External Reference Points and Benchmarks

The learning outcomes of the programme map against the QAA Subject Benchmark Statements for General Business and Management (revised February 2007) and Hospitality, Leisure, Sport and Tourism (revised May 2008), and the following University strategies and policies:

Staff research projects. Wherever possible, members of staff are encouraged to utilise their research – and that of colleagues – to inform their teaching, both in terms of content and pedagogic approach.

Employer interaction and feedback. A forum of local tourism and events organisations has been created to facilitate dialogue between employers and the Tourism and Events team at UWE. This forum encourages discussion of how curriculum can best be designed to meet the needs of local organisations whilst also providing students with appropriate skills and knowledge sought in graduates. In this respect employers have a direct input into shaping the curriculum, as well as providing opportunities for work-based learning and project work.
