**Part 2: Description**

The programme aims to equip students with knowledge and understanding of:

- the English language in its own right, including varieties across the globe and all its forms, spoken, written and signed. Here, levels of analysis within the field of Linguistics are drawn upon in order to deepen understanding of the language, in particular relating to the grammar of English, pronunciation, semantics, pragmatics and discourse;
- the English language as a gateway to related thematic studies such as the history of the English language, world Englishes, intercultural communication, teaching English to speakers of other languages and creative writing;
- language and linguistic behaviour in a broad sense, including the structural, social and psychological aspects of language, in spoken and written form;
- the fact that human language and linguistic behaviour is highly structured and that the nature of these structures can be elucidated by systematic study through a range of theoretical and empirical methodologies;
- basic concepts, modes of analysis and theoretical approaches in several areas of study including phonetics, phonology, morphology, syntax, corpus linguistics and discourse;
- the role of language in society, the way language is acquired and the way it changes.

In addition, the programme aims to develop:

- appropriate linguistic tools and metalanguage to describe and analyse written and spoken discourse and visual images taking into account form, function and context;
- the ability to use language creatively and precisely for a range of purposes and audiences and of relevance to identified careers;
- generic intellectual skills – notably those of analysis, synthesis, evaluation and coherent presentation – in self-directed graduates possessing a high degree of literacy and English language awareness;
- key transferable skills emphasising self-motivation and self-reliance, co-operative interpersonal relations, information management, analysis, communication and critique;
- academic and professional research skills such as handling databases, the collation, analysis and re-presentation of data, reviewing, presentation skills, designing and conducting interviews and questionnaires, the use of tools for statistical analysis, transcription and corpus searches. Included in this are the ethical issues involved in collecting, storing and using participants' data. The aforementioned is of relevance both to the workplace and to postgraduate study;
- awareness of the applied nature of the programme, and the ways in which knowledge and skills gained are used in a variety of careers, as explored through different modules;
- awareness of students' own learning style, personality and values, as well as the value of their subject-specific knowledge and skills, in order for them to be in a position to identify their strengths, and as a result possible suitable careers.

**Programme requirements for the purposes of the Higher Education Achievement Record (HEAR)**

This programme brings together the analysis of language and its systems with an application of this knowledge to industry-facing scenarios and real world tasks. Levels of linguistic analysis (sound, grammar, meaning and discourse) are treated alongside social and psychological approaches to language. The English language is additionally explored in terms of intercultural communication, world Englishes, language teaching and creative writing. Teaching, learning and assessment across all modules focuses on the development of skills applicable to a variety of careers aimed at the Cultural Industries and beyond.

	UPNQ4P-30-2 Language Acquisition		

**Placement Year**

Students on the sandwich route (SW) must undertake and pass a work placement:.

During this time students must complete the 30 credit level 3 module, Professional Development on Placement UPNNA5-30-3

This module assesses the student's personal development, from the experience of placement, and their ability to identify issues relevant to their Placement's organisational context, and to then frame, scale and position a critical work-based enquiry relevant to the specialism of the degree.

This provides a rich process in which a student can make links between theory and practice, reassess themselves and confront the challenges of carrying out a role in a new organisation whilst knowing that they will have the opportunity to be supported if there is a problem and that they will be returning to the programme for a further period of reflection and learning after the placement is completed.

**To be eligible for Placement students would normally be expected to have passed a minimum of 210 credits**

	Compulsory Modules	Optional Modules	Interim Awards
Level 3	None	UPNQ9L-30-3 Teaching English to Speakers of Other Languages	BA English Language and Linguistics
		UPNQ9V-30-3 Creative Writing and the Self	300 credits

		UPNN35-30-3 Language Project	
		UPNQ9W-30-3 Gender, (Im)politeness and Power in Language	<b>HIGHEST AWARD:</b> BA(Hons) English Language and Linguistics
		UPNNCA-30-3 Language and Cognition	360 credits

**Part time:**

The following structure diagram demonstrates the student journey from Entry through to Graduation for a typical **part time student**.

There is nothing in the programme design which means that the modules cannot be spread out so that a part-time student takes one module per year from English Language and one from Linguistics. However, it would be preferable at level two to take Analysing Culture: Language and the Visual in advance of Language, Research and the Workplace so that the following year the student could carry out their project if desired having just completed the relevant research training. The ideal part-time student journey would therefore be as follows:

**Year 1.1**

UPNQ4J-30-1 Meaning: Style and Discourse

UPNQ4L-30-1 Applying Linguistics: Forensic Analysis

**Year 1.2**

UPNQ4H-30-1 English: Past, Present and Future  
 UPNQ4K-30-1 Constructing Language(s)  
**Year 2.1**  
 UPNQ4N-30-2 Studying Speech Communities  
 + 2 optional modules  
**Year 2.2**  
 UPNQ4P-30-2 Language Acquisition  
 + 2 optional modules  
**Year 3.1**  
 UPNN35-30-3 English Language Project (if desired)  
 One other option  
**Year 3.2**  
 Two options

#### Part 4B: Programme Structure (IU)

Credit is recognised for Levels 1 and 2 from modules offered on IU's English Linguistics degree programme.

Students select four modules from the choice of five listed below.

##### Full time

The full time programme is delivered over two semesters.

##### Part time

The part time programme is delivered over four semesters, and students can take the modules in any order.

	Compulsory Modules	Optional Modules
Level 3	None	UPNQ9L-30-3 Teaching English to Speakers of Other Languages  UPNQ9V-30-3 Creative Writing and the Self  UPNQ9P-30-3 Critical Discourse Analysis  UPNNCA-30-3 Language and Cognition  UPNQ9Q-30-3 Languages in the Mind

**Part 5: Entry Requirements**

The University's Standard Entry Requirements apply.

Research carried out in the Bristol Centre for Linguistics

The English Language and Linguistics programme has been rewritten to align with university strategy for programmes to be industry-facing and practice-based. As this is an open market programme offering no specific vocational training it is oriented towards a number of career paths which our students have traditionally followed or aspire to. For instance, the module Language, Research and the Workplace requires students to identify and prepare for a particular career alongside developing job application skills of wider relevance. In addition, the programme incorporates an adapted Level 2 module (Studying Speech Communities) which is partly grounded in the research carried out in our research centre, the Bristol Centre for Linguistics, providing an opportunity to offer innovative, research-led teaching.

The QAA subject benchmark statements (Linguistics and English) and to a lesser extent the HEA English Language Benchmark Statement were used to inform the academic content of the programme. The employability slant to the programme, embedded within different modules, has been introduced more explicitly to address the university and faculty strategy to improve students' employment prospects. Added to this, thought has been given to the student experience on this programme, with assessment forming part of a supportive and developmental framework for our students. This addresses elements of the National Student Survey. Staff research feeds into modules at various levels, and in particular at level three, where modules are created in line with staff expertise as well as what will develop and be of practical use to our students in the workplace. We have consulted closely our Careers colleagues, and part of the programme development was informed by a UWE Learning and Teaching Fellowship project run by a member of the team.
