Part 2: Description**Broad Aims of the Programme**

- to provide an opportunity to develop a creative practice within fashion textiles and its related areas;
- to provide an experience of higher education in fashion textiles, and its related areas, that offers students choice and independence in determining their abilities and ambitions;
- to equip students with the intellectual, practical, critical and creative skills necessary for them to locate themselves and their practice within professional, social, historical and cultural contexts;
- to give students the confidence to develop informed and independent critique relevant to the subject area;
- to deliver key/transferable and professional practice skills as an integrated part of the curriculum;
- to respond to the demands of industry; namely fashion textiles and its related areas;
- to equip students with the necessary understanding of research techniques and appropriate methodologies;
- to sustain an environment in which individual students realise their full potential.

Specific Aims of the Programme**The Fashion Textiles programme aims to enable students to:**

- Develop clear, effective, creative and critical research and engagement with the practical, ethical, historical, social, cultural and professional issues which impact on Fashion Textile practice.
- Generate, test, develop and resolve creative ideas, practical outcomes, concepts, proposals, solutions and arguments in response to set briefs, design problems and / or as self-initiated activity;
- Demonstrate an understanding of the interrelationship between the requirements of industry and the development of fashion textile work appropriate to that industry;
- Implement processes of critical reflection, analysis and evaluation in the development of their creative practice;
- Gain the transferable and professional skills necessary to be able to work effectively and creatively in the fashion textile and associated creative and cultural industries;
- Develop confidence, initiative and an independent approach to fashion textile practice
- Communicate and present ideas and work using materials, processes and technology to develop and present professional solutions.
- Engage in industry/work related experience as part of the curriculum;

Part 2: Description

UWE Fashion Textiles delivers a holistic understanding of the Fashion Textile Design process and encourages students to develop design outcomes and solutions for range of Fashion Textile contexts.

As students' progress through the course they can specialize onto one of the creative platforms, which may include for instance: Fashion Design, Textile Design or Fashion Textile Futures.

The course ethos is driven by creativity and the development of an experimental playful approach to the exploration and resolution of ideas. This is underpinned by a robust core of technical, digital and conceptual skills development, and a pattern cutting curriculum to support the translation of ideas from 2D – 3D.

The modules have been structured in such a way so as to allow an early diagnostic period of study in which students are equipped with a range of creative and technical skills, design methodologies, and subject and contextual understanding. As students' progress throughout the programme they have the opportunity to identify and build on their individual strengths and interests, and to specialize onto one of the 3 fashion textile platforms, which may include for instance: Fashion Design, Textile Design, and Fashion Textile Futures.

The programme is underpinned by creative thinking, design development and skilled making. Using both traditional and digital processes, an exploration of the relationship between 2D-3D, and an understanding of current fashion textile practice and debates, students are encouraged to engage in both practical and speculative design work relevant to the subject. This synergistic approach means that the programme is inherently interdisciplinary and provides collaborative opportunities for industry engagement, knowledge exchange, research and partnership development

The programme develops highly skilled designers, makers and thinkers. Their excellent creative and technical skill base, and understanding of the whole fashion and textile design process is underpinned by an ability to generate and develop ideas and to adapt creatively. Sustainability is a core value of the Fashion Textiles programme and students are engaged in thinking and making in response to this through set projects, the development of individual design projects and speculative design work.

Students on the sandwich route (UWE only) will undertake a sandwich year in industry at the end of Level 2. Students will need to identify and negotiate their placements independently but with support from the module team. All placement destinations and timescales will need to be approved by the team.

Students based at UWE Bristol are required to make visits to London as part of their ongoing research and development, and where possible we run trips to design studios and agencies, factories and events that are relevant to the programme. Alexander College where possible will run trips to design studios and agencies, factories and events that are relevant to the programme in Cyprus.

Professional practice and industry preparation are embedded across all 3 levels of the programme and students are expected to undertake a work placement every year. (Placement opportunities may also include live briefs, collaborations, competitions and other externally facing work). Industry preparedness is vital to the success of our graduates and we work closely with industry partners to deliver live briefs and projects. Students at Alexander College will be supported by the Programme Leader in finding suitable work placements in Cyprus. UWE Students have the opportunity to take a year out to undertake a year in industry at the end of level 2. This option is currently not available to Alexander College, Cyprus students.

UWE Fashion Textiles aims to showcase and promote student and alumni design work at the most appropriate National and International events and industry platforms which may include for instance Premier Vision Paris. Alexander College where possible will promote and showcase student and alumni design work at the most appropriate National events and industry platforms in Cyprus.

Programme requirements for the purposes of the Higher Education Achievement Record (HEAR)

This is an industry facing programme that encourages students to engage in the development of fashion textiles using a range of materials, technologies and software alongside the traditional skills, techniques and craftsmanship of Fashion and Textile design. The translation of ideas from 2D to 3D is an essential part of the curriculum and students will develop garments, textile designs, fashion products and digitally enabled outcomes for application in the fashion textile industries. Graduates will be able to work across a number of areas in the creative industries which may include for instance fashion designer, textile designer, product developer and pattern cutter.

Placement Year

UWE Students on the sandwich route must undertake and pass a work placement. The sandwich year is not available to students studying at Alexander College, Cyprus:

During this time students must complete the 30 credit level 3 module, UADAVA-30-3 Fashion Textiles Development on Placement

This module assesses the student's personal development, from the experience of a work placement and their ability to identify and reflect on issues relevant to their Placement's organisational context.

This provides a rich process in which students can make links between their professional ambitions and studio practice, whilst confronting the challenges of carrying out a role in an industry context knowing that they will have the opportunity to be supported if there is a problem and that they will be returning to the programme for a further period of development, reflection and learning after the placement is completed.
