Section 2: Programme Overview, Aims and Learning Outcomes

Part A: Programme Overview, Aims and Learning Outcomes

Overview: This programme is designed to provide a means by which experienced support staff, employed within an educational environment, can obtain a recognised qualification specific to their field and become more effective in their role by an increased reflection on practice. Successful students will be able to apply for progression to a relevant Honours degree.

Features of the programme: This programme has been designed to meet the needs of the workforce.

A reflective practice module based on professional standards within the workforce will underpin the study period to ensure strong links are constantly reviewed between theory and practice. This will give students opportunity to explore and embed their own developing professional identity, employability and career progression. Other modules address a wide range of relevant knowledge required to understand and critically engage with concepts of learning, teaching and development. This will include a range of perspectives and will embed the students own experiences as learners and practitioners.

Educational Aims: The aims of the programme are to:

Develop an understanding of the variety of roles played by professionals and practitioners in both formal and informal educational settings, enabling students to locate their own place and contribution to educational processes developing personal and professional skills

Provide students with broad and balanced knowledge and understanding of the principal features of education and theoretical perspectives in order to enhance their ability to construct reasoned arguments about educational issues

Broaden students' knowledge of educational practice from beyond their specific setting into the local, national and international arena.

Enable students to become accomplished, flexible practitioners who are able to respond to the needs of learners in educational settings

Provide a vocationally specific curricula in which academic study is closely integrated with reflection and investigation of work based practice

Enhance a range of professional, academic and lifelong learning skills, knowledge and understanding in support of workplace and academic learning, enhancement of current practice and preparation for career development and further study.

Programme Learning Outcomes:

On successful completion of this programme graduates will achieve the following learning outcomes.

Programme Learning Outcomes

- PO1. Identify their own value systems and respond to moral and ethical issues in debates, research and practice.
- PO2. Develop a critical understanding of educational theory, policy and research at local, national and international levels.
- PO3. Reflect on their own learning and performance, working effectively as an individual and as a member of a team.
- PO4. Critically engage with issues of equity, diversity, inclusion and social justice and the impact of this on practice, with reference to sustainable development goals.
- PO5. Recognise concepts of development and learning across the life course.
- PO6. Critically reflect on personal and professional practice, recognise areas of strength and and identify strategies for development.
- PO7. Design and carry out a small-scale research project on a specific issue within the relevant field.

Assessment strategy: The programme provides opportunities for learning in and from workplaces, developing a critical reflection process on this learning. Every opportunity will be taken to enhance learners' skills, knowledge and understanding alongside increased critical self-awareness and insight into their own personal potential. The assessment is 'for', not 'of' learning. The assessment for modules throughout the programme will draw upon the professional experience gained from

the workplace setting. This work based approach to student learning forms a development within the area of continuing professional development for a group of educationalists currently operating in a variety of learning environments. This programme seeks to develop consciously competent practitioners who are able to positively influence practice in their settings.

Student support: COBC

Specific support is available to all students in developing and enhancing their study skills through contact with the Programme Manager, the module leader, library support, Technology Supported Learning – online study skills, virtual learning environments; Peer Assisted Learning (PAL) ; personal academic tutors allocated at the start of the programme and technical and resource support through the Education Resource Centre.
