SECTION 2: PROGRAMME OVERVIEW, AIMS and LEARNING OUTCOMES

This section provides students with an overview of the programme, its aims and its learning outcomes. It sets out what prospective and registered students can expect to know, understand and be able to do on successful completion of the programme.

Please write this section in the first person, addressing your prospective students.

PART A: PROGRAMME OVERVIEW, AIMS and LEARNING OUTCOMES

1. (Programme) Overview

Early Childhood as an academic area is interdisciplinary in nature and aims to provide a base for a wide range of professional roles including in the provision of integrated care and education for children from birth. The programme aims to create graduates that are advocates for children who facilitate the recognition of rights for children to actively participate in their worlds. However, it is also recognised that graduates follow a wide range of professional paths on completion of the programme and so transferrable skills are also embedded throughout including research, critical analysis, problem-solving and teamwork.

At levels 4-6 the programme is themed, with children at the centre to ensure the lived experiences of children are foregrounded. These are:

Level 4 – Children’s Worlds

Level 5 – Practice with Children

Level 6 – Children’s Identities

The pedagogical approach of the programme is based on notions of best practice in the early childhood field and is centred around four main principles:

- Narrative, enquiry-led learning – students are supported to use their own experiences and childhood narratives to develop their understanding of children and childhood, challenge their own values and beliefs and critically engage with research evidence
- Rights – students have the right to be provided with a coherent and challenging programme which recognises and utilises their own perspectives, interests and knowledge
- Identities – students’ individual identities inform the pedagogical approach, assessment strategy and teaching and learning activities
- Relationships – respectful relationships are central to the learning process.

The design of the Programme gives students the opportunity to follow professional pathways that support a Practice, Research or Enterprise focus, according to modules chosen, and assessment focus within modules. Foundation Year modules prepare students for the academic requirements of the programme and provide a broad introduction to the content of work in this field. Level 4 modules will include elements of all pathways to supporting choices at Level 5. The ‘Working with All Children’ module at level 4 offers assessment differentiation for students wishing to engage with Graduate Competencies Level 6, or to focus on a more Researcher focus through observation and theoretical links.

Level 5 Semester 1 modules are shared across all pathways.

Level 5 Semester 2 can be studied at distance allowing for students to undertake a practice module in a wide variety of National and International environments. Students wishing to follow the Practice pathway will be required to take the ‘Professional Practice’ module and will therefore be required to remain at UWE to allow for observations of practice.

Level 6 modules are designed for students to develop their independence and bespoke focus.

PART A: PROGRAMME OVERVIEW, AIMS and LEARNING OUTCOMES**2. Educational Aims**

This programme aims to:

1. Support students in developing an understanding of physical, psychological, sociological, historical, political and philosophical accounts of children's development, learning and lived experiences in a range of practice and social contexts
2. Provide students with opportunities to understand and develop reflective practices.
3. Provide students with opportunities to critically evaluate policy, provision and practice with reference to identity, social justice and transformative practices.
4. Develop students' understanding of professional roles and responsibilities through theoretical study and work-related learning in a range of contexts
5. Enable students to develop a critical understanding of the significance and contested nature of ethical approaches, equality, diversity, inclusion and social justice through enquiry and research practices.
6. Enable students through the provision of pathways, to gain a wide range of skills and knowledge necessary to enhance postgraduate and career opportunities in early childhood, including digital literacy, problem-solving and research skills.
7. Develop students' skills and dispositions to become successful lifelong learners.

PART C: HIGHER EDUCATION ACHIEVEMENT RECORD (HEAR) SYNOPSIS

This Early Childhood programme involves a substantial amount of work related to sociological and psychological views of early childhood, child development, early childhood pedagogy, policy and practice. The programme also includes a significant amount of time spent working with children and practitioners in Early Years / Educational settings. The programme aims to create graduate that are advocates for children who facilitate the recognition of rights for children to actively participate in their worlds.

PART D: EXTERNAL REFERENCE POINTS AND BENCHMARKS

This programme has been designed to support students through a spiral engagement with core knowledge and skills that will support their achievement both in the degree and in their professional futures. Optional modules and assessments allow for bespoke engagement and will support students in achieving recognition in their chosen theme. This will include recognition in achieving the ESCDN Level 6 if chosen. The programme has been fully mapped against the QAA Benchmark statement for Early Childhood Studies.
